# ABOUT FIMO®

## Our Vision, Our Mission, Our Values

### KNOW-HOW AND MODERNITY

In a constantly evolving market, such as Telecommunications, FIMO® Group is committed to always provide customers with “on purpose” studied, designed and manufactured components. All FIMO® solutions, aimed at solving any possible installation problem, are fully supported by a continuous efforts and investment into research and development, technology innovation, manufacturing process optimization and excellence in execution.

With over 80 years of history and experience, a significant geographical presence, the Group is strongly positioned at the high-tech end of the telecom accessories sector.

FIMO® has solid technical and ethical foundations and his business approach is a perfect blend of technical know-how and managerial modern vision.

### OUR VISION, OUR MISSION, OUR VALUES

The FIMO® Group's vision and mission provide the fundamental engine of our daily engagement. Our values drive our commitment to customers and work.

#### Our vision

We are convinced that the development of telecommunications is a cornerstone for the

evolution of modern society. We believe in creating value through significant products and services in the telecommunications sector. And we do so in light not only of efficiency, but also of sustainability and ethics.

#### Our mission

We work in such a way as to establish an essential partnership with our customers. This is why we let ourselves be guided by research and innovation, which drive us to optimise our production processes and ensure improved levels of technology and performance.

#### Our values

**Reliability** – our teams are able to combine engineering knowledge, design and experience in the field to ensure the highest quality results.

**Innovation** – for more than 80 years, our constant drive to evolve and to evolve the market has been a fundamental part of our DNA.

**Speed** – we act quickly and effectively to reach the excellence. Communication is the main pillar of our process: we reach outstanding results starting from listening and understanding customer needs.

#### • WALL ENTRIES

#### • TELECOM INFRASTRUCTURE

Cable Clamps and  
Grounding Kits Solutions

### OUR CUSTOMERS ... OUR FOCUS

FIMO has established strong relationships with the major players in the Telecommunication industry thanks to a unique understanding capability of their primary needs. Customer centricity, guaranteed by ensuring that customers are always at the centre of FIMO business's philosophy, operations and ideas, is a constant behaviour of the Group and is reflected from product design through to delivery, and provision of a constantly monitored level of service.

### SUPPORTING THE SUSTAINABLE DEVELOPMENT OF THE WORLD'S TELECOM INFRASTRUCTURE

The FIMO® Group's solutions are designed to support the development of the world's telecoms infrastructure. Supporting the infrastructures of many of the world's leading telecoms operators, the FIMO® Group delivers solutions that help link communications to communities around the globe.

Our business is made up of three business units – Components, Concealing and Subsystems.

#### Components

Any kind of cable clamps and fixing devices, weatherproofing kits, grounding kits, wall entries and other components repre-

sents one of the widest offer of these products to the market, delivered through a state-of-the-art supply chain. FIMO® offers a comprehensive range of products, services and the knowledge required to meet the increasing demands of our customers in terms of quality, efficiency and cost-effectiveness.

**Concealing**

Rooftop solutions, fake trees, architectural solutions, all of them perfectly integrated with the surrounding environment.

FIMO® group provides to its customers these top quality solutions combined with an end-to-end support, going from listening to customer needs, to designing a tailor made solution, to support him until the installation.

**Subsystems**

FIMO® Group provides small cells and DAS solutions, cabinet, energy saving cabinets, boxes, harnesses, and whatever is needed to smartly connect the different parts of telecom installation.

An unbeatable supply chain together with the capability to design tailor made solution made FIMO® group solution the best choice for telecom players for what concerns interconnection bespoke devices.

**OUR PEOPLE ... OUR STRENGTH**

FIMO strongly relies on the expertise of its people to provide valuable solutions and services to all major customers involved in projects on every continent.

Our people are our most valuable asset and we are continuously investing in their capabilities, training and expectations. We strongly support the value of teamwork and we consider the quality of our human resource management as fundamental to the success of our business.

# Cable Clamps

Product Catalogue

# Cable Clamps

Cable clamps for coaxial, fiber optic and power cables. FIMO cable clamps are suitable for a quick, safe and secure installation of cables and pipes on any kind of support.

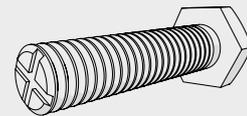

*Schellen für Koaxialkabel, optische Faser- und Stromkabel. Die Kabelschellen von FIMO eignen sich für die schnelle und sichere Installation von Kabeln oder Verlegerohren auf jeglichen Auflagen.*

**Self-Locking System Patented**

**Ribbed Pressure Plate Pat.**

**Self-Locking Screw Pat.**

**Patented**

**sRF - Self-locking Cable Clamps**  
Secure and Safe Locking

Self-locking sRF fasteners are the optimal solution for an easy and quick fastening to various supports of: coaxial cables, wave guides and fiber optic cables.

The cables are firmly secured, without danger of deformation, by calibrated saddles which hold them without crushing. The installer can visually control the pressure exerted by the screw (pat.). Between 1 and 12 cables can be fastened with the same clamp. The calibrated saddles, secured by a clip, can be inserted either frontally or laterally in the bow.

**Main features:**

- simple and strong structure
- secured components with easy mounting
- selected high quality materials
- resistance to atmospheric factors (U.V. rays, salty air, a.s.o.)
- high resistance to temperature variations (from -30°C to +120°C)
- absolute safety for cables and installers
- easy and quick installation

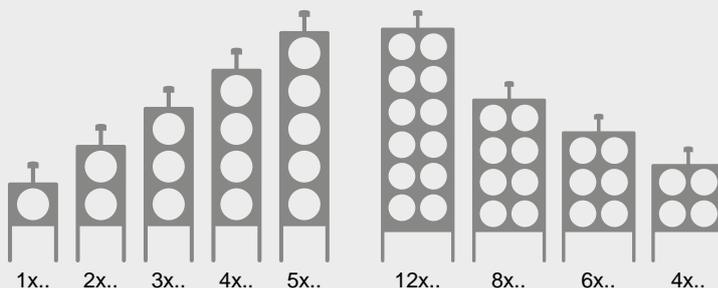

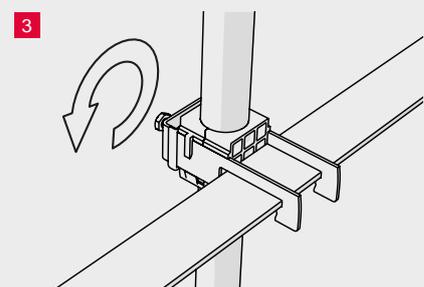

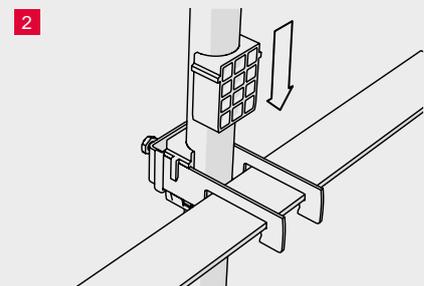

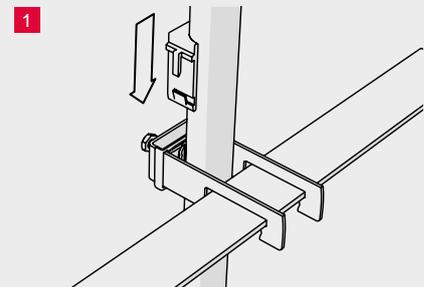

**sRF - Selbstsichernde Kabelschellen**  
Rutschfest und überdrucksicher

Die selbstsichernden Kabelschellen der Serie sRF sind die optimale Lösung für eine bequeme und schnelle Befestigung von Koaxialkabeln, Wellenleitern und optischen Faserkabeln an verschiedenartigen Gerüsten. Die Kabel werden fest, ohne schädlichen Überdruck, durch formschlüssige Klemmwannen gehalten.

Das Montagepersonal kann den Befestigungsdruck visuell selber kontrollieren (Pat.). Mit einer Schelle können 1 bis 12 Kabel befestigt werden. Die Wannen werden unverlierbar durch einen Clip am Stahlbügel gehalten und können beliebig seitlich oder frontal eingeschoben werden.

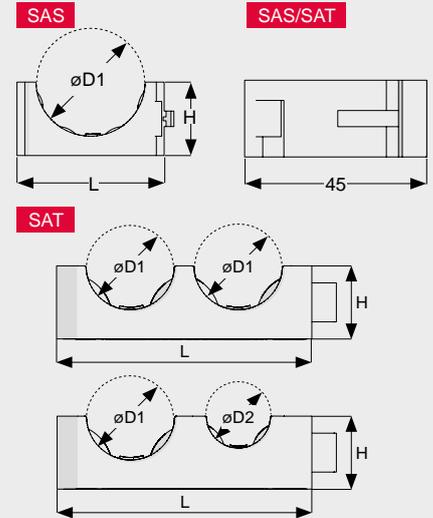

**Haupteigenschaften:**

- Einfach und robust
- Unverlierbare und bequem anzuwendende Einzelteile
- Hochwertiges Material
- Witterungsbeständig (U.V., Meeresluft, usw.)
- Temperaturbeständigkeit (-30°C bis +120°C)
- Sicherheit für Kabel und Montagepersonal
- Leichte und schnelle Montage

# SAS - SAT

## Saddles

**SAS - Single Calibrated Saddles**  
**SAT - Twin Calibrated Saddles**

The SAS and SAT saddles are supplied with the sRF cable clamps and RF Q collars. The internal indentation allows gripping on the cable without compressing nor deforming it. The closure of the cables is calibrated.

**SAS - Einspurige Klemmwannen**  
**SAT - Zweispurige Klemmwannen**  
Die Klemmwannen SAS und SAT gehören zum standardmäßigen Lieferumfang der sRF-Klemmen und RF Q-Schellen.  
Sie haften durch interne Spezialnoppen am Koaxialkabel, ohne es weder zusammenzudrücken noch zu verformen. Die zwei kombinierten Wannen entsprechen dem Standarddurchmesser der Koaxialkabel, die formschlüssig eingebettet werden.

# SRF A3

Cable Clamps

### sRF A3 - Self-Locking Cable Clamps

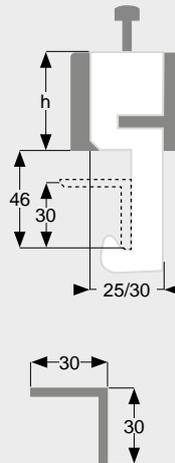

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on 30x30 mm angular**

### sRF A3 - Selbstsichernde Kabelschellen

Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofilen **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Winkeleisen 30x30 mm.**

**SRF A3**  
**On Angular**

# SRF A4

## Cable Clamps

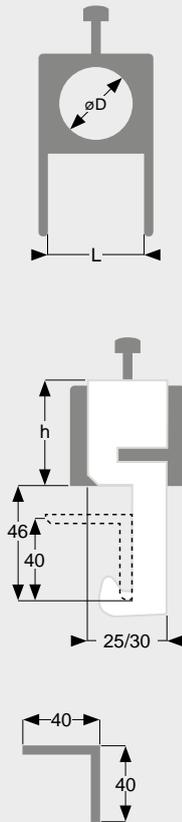

### SRF A4 - Self-Locking Cable Clamps Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on 40x40 mm angular**

### sRF A4 - Selbstsichernde Kabelschellen Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofilen **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Winkeleisen 40x40 mm.**

#### MATERIAL

#### Metal Parts

AISI 304  
Stainless Steel

#### Saddles

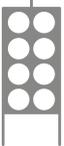

Fiberglass P.A.  
U.V. Resistant  
Halogen Free

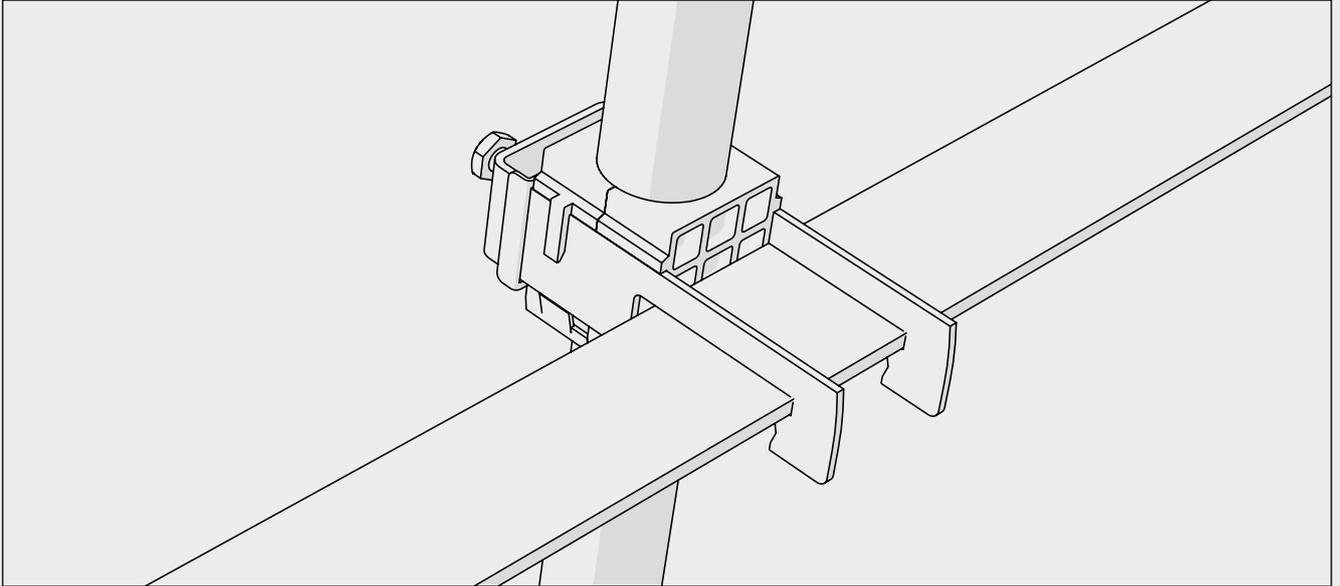

#### Colour

Black  
(Grey On Request)

**SRF A4**  
**On Angular**

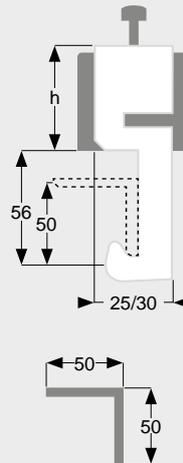

**sRF A5 - Self-Locking Cable Clamps**  
Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on 50x50 mm angular**

**sRF A5 - Selbstsichernde Kabelschellen**  
Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofile **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Winkeleisen 50x50 mm.**

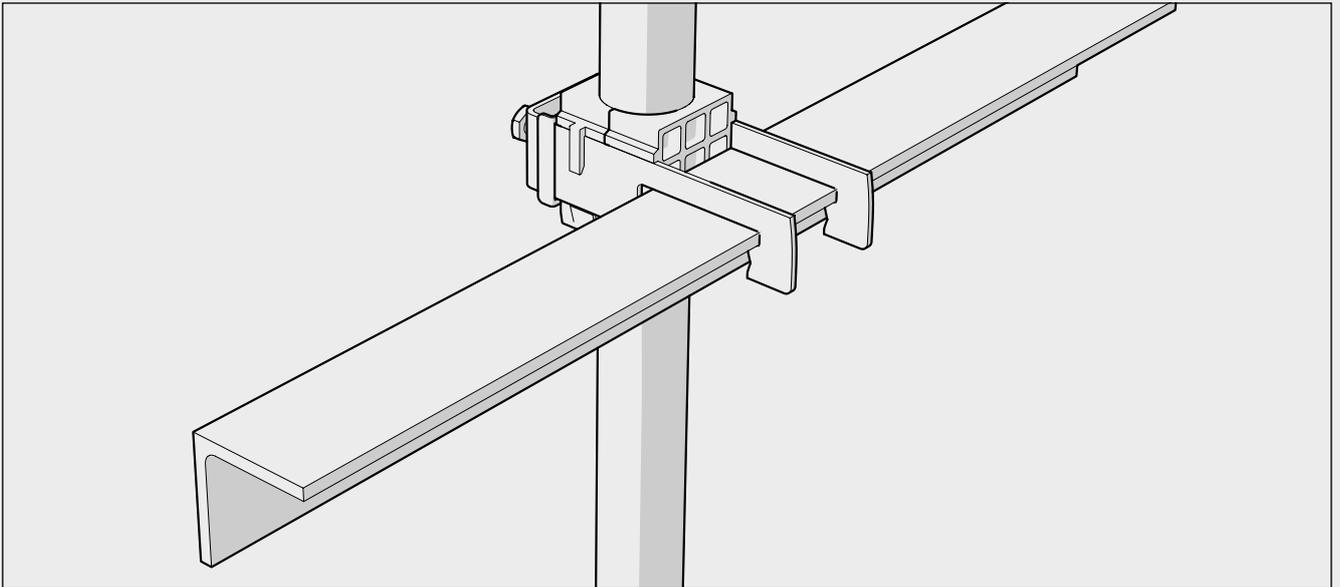

**MATERIAL**

<b>Metal Parts</b>	AISI 304 Stainless Steel
<b>Saddles</b>	Fiberglass P.A. U.V. Resistant Halogen Free
<b>Colour</b>	Black (Grey On Request)

# SRF B

## Cable Clamps

### SRF B - Self-Locking Cable Clamps

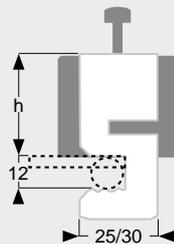

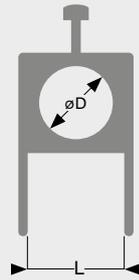

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on flat and round 3-12 mm**

### sRF B - Selbstsichernde Kabelschellen

Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofilen **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Für Flach- und Rundeisen 3-12 mm.**

#### MATERIAL

#### Metal Parts

AISI 304  
Stainless Steel

#### Saddles

Fiberglass P.A.  
U.V. Resistant  
Halogen Free

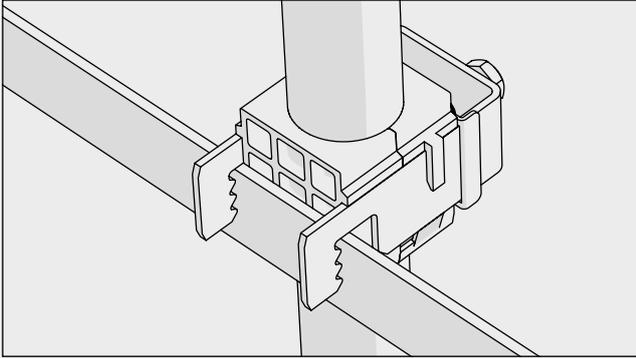

#### Colour

Black  
(Grey On Request)

### SRF E - Self-Locking Cable Clamps Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on:** section 40x22, flat and round 3-12 mm.

### SRF E - Selbstsichernde Kabelschellen Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofile **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Für:** C-Profilschienen 40x22, Flach- und Rundeisen 3-12 mm.

SRF E  
On Round

SRF E  
On Round

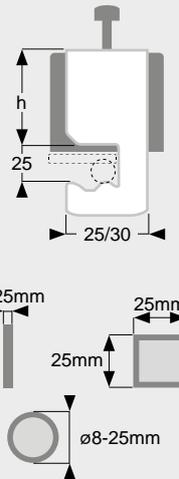

**sRF M - Self-Locking Cable Clamps**  
Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.  
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.  
**Hooking on round  $\varnothing$  8-25 and flat 3-25 mm.**

**sRF M - Selbstsichernde Kabelschellen**  
Komplett mit kalibrierten Wannen

Für 1/ 2/ 3/ 4/ 5/ 6/ 8/ Koaxialkabel sRF.  
Können zusammen mit den elastischen Klemmprofilen **GRE-GRR-GRQ** auch für Wellenleiter eingesetzt werden.  
**Für Rundeisen  $\varnothing$  8-25 und Flacheisen 3-25 mm.**

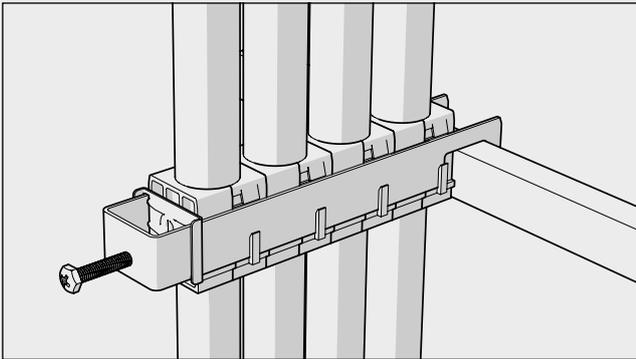

**MATERIAL**

<b>Metal Parts</b>	AISI 304 Stainless Steel
<b>Saddles</b>	Fiberglass P.A. U.V. Resistant Halogen Free
<b>Colour</b>	Black (Grey On Request)

**Self-Locking System Patented**

**Ribbed Pressure Plate Pat.**

**Self-Locking Screw Pat.**

**Patented**

**mRF - Self-locking Cable Clamps**  
**Secure and Safe Locking**

Self-locking mRF fasteners are the optimal solution for an easy and quick fastening to various supports of: coaxial cables and fiber optic cables.

The cables are firmly secured, without danger of deformation, by calibrated saddles which hold them without crushing. The installer can visually control the pressure exerted by the screw (pat.). Between 1 and 3 cables can be fastened with the same clamp. The calibrated saddles, with flexible hinge, can be inserted either frontally or laterally in the bow.

**Main features:**

- simple and strong structure
- selected high quality materials
- resistance to atmospheric factors (U.V. rays, salty air, a.s.o.)
- high resistance to temperature variations (from -30°C to +120°C)
- absolute safety for cables and installers
- easy and quick installation

**mRF - Selbstsichernde Kabelschellen**  
**Rutschfest und überdrucksicher**

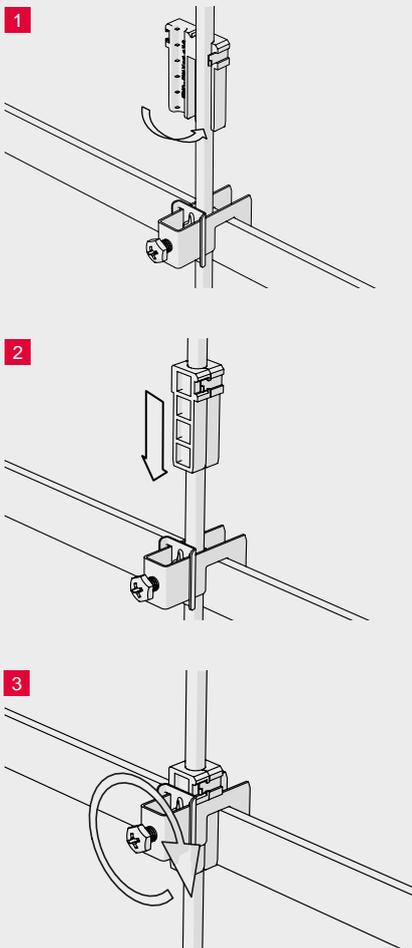

Die selbstsichernden Kabelschellen der Serie mRF sind die optimale Lösung für eine bequeme und schnelle Befestigung an verschiedene Strukturen, wie:

Koaxialkabel und optische Glasfaserkabel. Die Kabel werden fest, ohne schädlichen Überdruck, durch formschlüssige Klemmwannen gehalten.

Das Montagepersonal kann den Druck der Befestigungsschraube selbst beobachten (Pat.). Mit einer Schelle können 1 bis 3 Kabel befestigt werden. Die Klemmwannen können beliebig seitlich oder frontal durch ein flexibles Scharniergelenk eingeschoben werden.

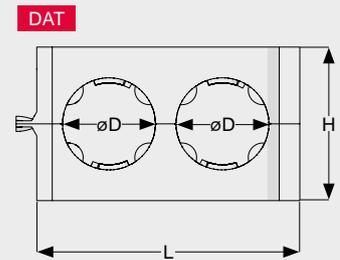

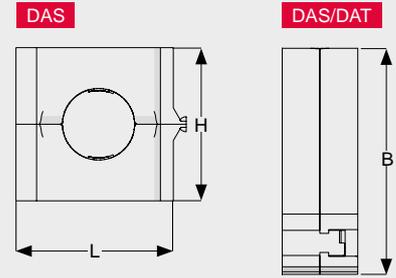

**Haupteigenschaften:**

- Einfach und robust
- Hochwertiges Material
- Witterungsbeständig (U.V., U. V.-Strahlung, salzhaltige Luft, usw.)
- Temperaturbeständigkeit (-30°C bis +120°C)
- Sicherheit für Kabel und Montagepersonal
- Leichte und schnelle Montage

## Saddles

### MATERIAL

<b>Saddles</b>	Fiberglass P.A. U.V. Resistant Halogen Free
<b>Colour</b>	Black (Grey on Request)

### DAS - Calibrated Double Saddles With Flexible Hinge

### DAT - Calibrated Double Twin Saddles With Flexible Hinge

The two hinged half saddles are calibrated on the diameter of coaxial cables. Its closure system allows a provisional locking onto the cable, allowing to slip and being introduced laterally inside the bow of the mRF cable clamp.

### DAS - Einspurige Klemmwannen mit flexiblem Scharniergelenk DAT - Zweispurige Klemmwannen mit flexiblem Scharniergelenk

Die beiden klappbaren Halbsättel mit Schnappverschluss sind auf den exakten Durchmesser von Koaxialkabeln kalibriert, mit Schnappverschluss, für eine unverlierbare Befestigung auf dem Kabel selbst. Die Wanne gleitet frei auf dem Kabel und kann problemlos und schnell in die mRF-Minischelle eingeschoben werden.

### mRF B - Self-Locking Mini Cable Clamps With Hinged DAS/DAT Saddles

Speedy and easy installation due to the special hinged **DAS/DAT** saddles. The hinged saddles are applied allowing a provisional locking onto the cables. The saddles slip on the cable for insertion in the bow. Final locking by tightening the self-locking screw.

**Hooking on flat and round 3-12 mm**

### mRF B - Selbstsichernde Mini-Klemmen Mit DAS/DAT Klappwannen

*Schnelle und leichte Installation dank der DAS/DAT-Wanne.*

*Die auf den Kabeln angebrachten Wannen sind unverlierbar;*

*Sie können frei auf den Kabeln gleiten und in den Stahlbügel der Schelle eingeschoben werden. Die Blockierung erfolgt durch eine selbstsichernde Schraube.*

**Für Flach- und Rundeisen 3-12 mm.**

**BRF - Self-Locking Cable Clamps complete with Calibrated Stainless Steel Saddles**

Stainless Steel Clamps for large Cable and Pipe diameters.  
Reccommended for coax cables in broadcasting installations.

**Versions:**

1. **BRF A5** hooking on flat 50x50 mm angular
2. **BRF C** hooking on **PCI 40x22** section
3. **BRF M** hooking on flat 3-25 and rond 8-25

**Use:**

For 1 cable or tube diam. = D

**BRF - Selbstsichernde Kabelschellen komplett mit kalibrierten Wannen, aus Edelstahl**

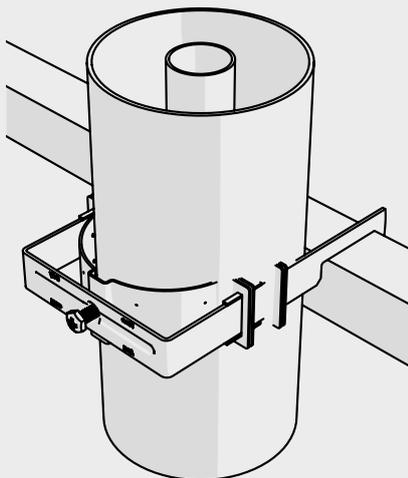

Edelstahlschellen für die Verlegung von Kabeln und Röhren mit großem Durchmesser. Besonders empfohlen für Koaxialkabel in Rundfunk-Anlagen.

**Versionen:**

1. **BRF A5** Montage auf Winkelisen 50x50 mm
2. **BRF C** Montage auf C-Profilschienen 40x22
3. **BRF M** Montage auf Flach- 3-25 und Rundeisen 8-25

**Einsatz:**

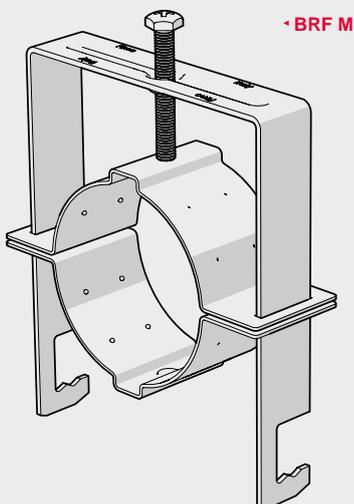

Für 1 Kabel oder Rohr, Durchmesser = D

**OX - Clamps for Power Cables and Pipes**  
Secure and Safe Locking

OX cable clamps are suitable to install cables and pipes to different structures. OX cable clamps are provided with **SEP** "V" profile saddles, and suitable for a large range of cable diameters. Stocking is simplified

**OX - Schellen für Elektro-Kabel und Verlegerohre**  
*Rutschfest und überdrucksicher*

*OX Kabelschellen eignen sich besonders für die Verlegung von Elektrokabeln und Schutzrohren.*

*Die "V"-Profilwannen SEP decken einen breiten Durchmesserbereich ab. Dadurch ist eine vereinfachte Lagerhaltung gewährleistet.*

## Saddles

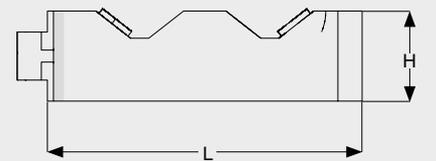

### MATERIAL

<b>Saddle</b>	Fiberglass P.A. U.V. Resistant Halogen Free
<b>Colour</b>	Black (Grey on Request)

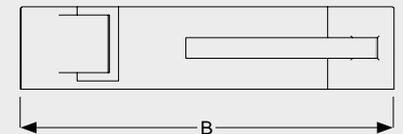

### SEP

### SET

### SEP/SET

### SEP - "V" Profiled Saddles

The SEP saddles of OX cable clamps, have a large "V". Profile, that allows the fastening of a large range of cables and pipes.

### SEP - "V"-Profil Klemmwannen

Die SEP-Klemmwannen der OX-Schellen unterscheiden sich durch ein breites „V“-Profil. Somit wird eine große Spannweite für die Befestigung von Kabeln und Rohren erlangt.

### USO-USC

Single Clamps for Coaxial Cables

#### Versions:

- **USO** for flat iron with holes
- **USC** for flat, round, angular

#### Components:

1. **SAM** single Saddle of Talc Reinforced P.P
2. Threaded Bar - **BFI M8** (M10 on request)
3. **RPI 10/20** flat Washers
4. **DAI 8** Hexagon nuts
5. Flexible Hinge

#### Use:

Fixing 1 to 4 coaxial cables.

**GRE-GRQ-GRR** elastic cushions allow fastening of waveguides.

#### Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

### USO-USC

Einzel-Schellen für Koaxialkabel

#### Versionen:

- **USO** für gelochtes Flacheisen
- **USC** für Flach-, Rund- und Winkelisen

#### Zusammensetzung:

1. **SAM** kalibrierte Einzelwanne aus glasf. Verst. H.D.P.E.
2. Gewindestange - **BFI M8** (M10 auf Wunsch)
3. Unterlegscheiben **RPI 10/20**
4. Sechskantmutter **DAI 8**
5. Flexibles Scharniergelenk

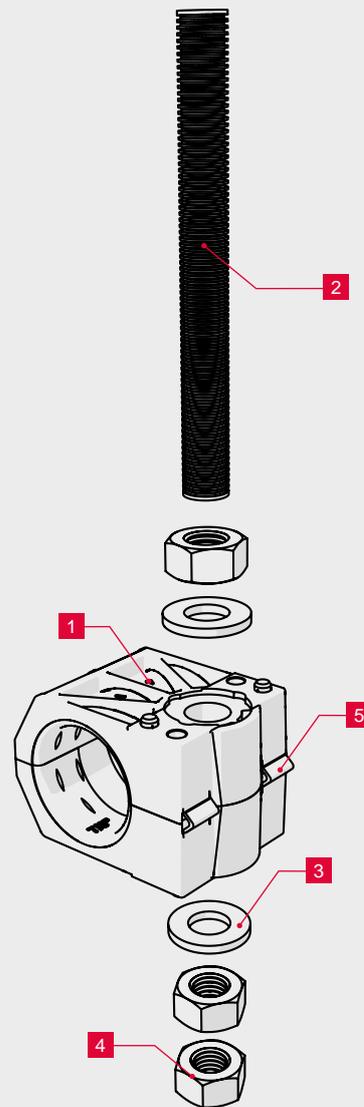

#### Einsatz:

Befestigung von 1-4 Koaxialkabeln.

Mittels elastischen Klemmprofilen **GRE-GRQ-GRR** auch von Wellenleitern.

#### Optionen:

Auf Wunsch mit Gewindestange, Muttern und Unterlegscheiben M10 und 3/8".

# SAM

## Saddles

### SAM - Hinged Single Saddles

The internal indentation allows gripping on the cable without compressing nor deforming it. The saddle size is calibrated and corresponds to the diameter of the coaxial cables.

A flexible hinge (patented) allows a controlled opening and closing of the two shells

### SAM - Einzelwannen mit Scharniergelenk

Sie haften durch interne Spezialnoppen am Koaxialkabel, ohne es weder zusammenzudrücken noch zu verformen.

Die Wanne entspricht dem Standarddurchmesser der Koaxialkabel, die formschlüssig eingebettet werden.

Ein flexibles Scharniergelenk (Pat.) erleichtert das Zusammenklappen der zwei Halbwannen

### MATERIAL

<b>Metal Parts</b>	Stainless Steel
<b>Saddle</b>	Fiberglass P.P. U.V. Resistant Halogen Free
<b>Colour</b>	Black

#### UMO-UMC

##### Twin Coaxial Cable Clamps

#### Versions:

- **UMO** for flat iron with holes
- **UMC** for flat, round, angular

#### Components:

1. **SEB** double saddles made of fiberglass reinforced P.P.
2. Threaded bar - **BFI M8 (M10 on request)**
3. **DAI 8** Hexagonal Nuts
4. **REI 8** Elastic Washers

#### Use:

Fixing 1 to 8 coaxial cables.

**GRE-GRQ-GRR** elastic cushions allow fastening of waveguides.

#### Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

#### UMO-UMC

##### Doppel-Schellen für Koaxialkabel

#### Versionen:

- **UMO** für Flacheisen mit Löchern
- **UMC** für flache, runde und Winkeleisen

#### Bauteile:

1. **SEB** Doppelwannen aus verstärktem P.P.
2. Gewindestange - **BFI M8 (M10 auf Anfrage)**
3. **DAI 8** Sechskantmutter
4. **REI 8** Elastische Unterlegscheiben

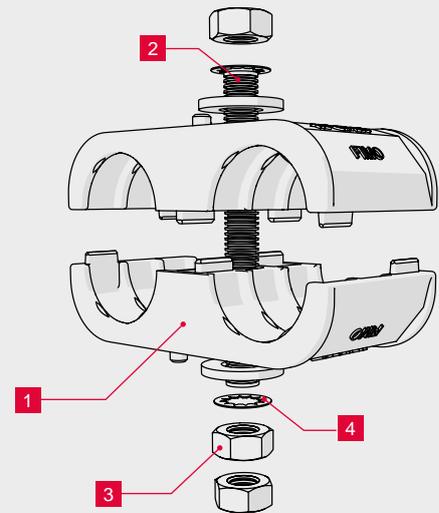

#### Gebrauch:

Befestigung von 1 bis 8 Koaxialkabeln

**GRE-GRQ-GRR** elastische Klemmprofile ermöglichen die Befestigung von Wellenleitern.

#### Optionen:

Auf Anfrage verfügbare Gewindestange, Mutter und Unterlegscheiben M10 und 3/8".

## Calibrated Double Saddles

### MATERIAL

<b>Saddle</b>	Fiberglass P.P. U.V. Resistant Halogen Free
<b>Colour</b>	Black

### SEB - Calibrated Twin Saddles

The internal indentation allows the cable grip without compressing nor deforming it. The two saddles fitting is calibrated and corresponds to the diameter of the coaxial cables.

### SEB - Kalibrierte Doppelwannen

Die innere Vertiefung ermöglicht die Kabelzugentlastung ohne zusammen zudrücken oder zu verformen.  
Die zwei Wannens-Befestigung ist kalibriert und entspricht dem Durchmesser der Koaxialkabel.

### UMO - Twin Cable Clamps for Flat Iron with Holes

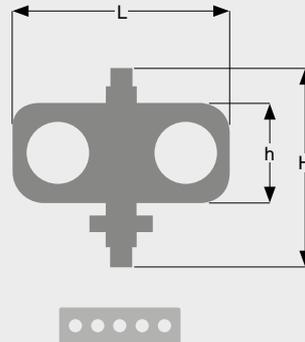

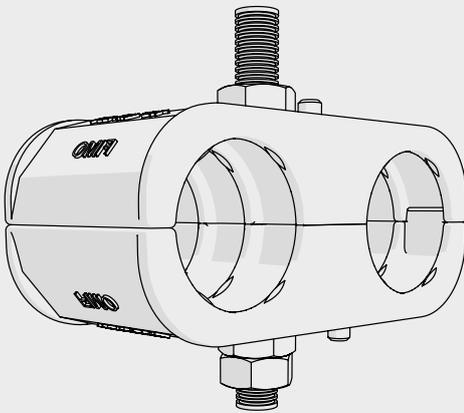

**Composition:**

**SEB** Saddle + M8 threaded bar + nuts + washers

### UMO - Doppel-Kabelschelle für Flacheisen mit Löchern

**Zusammensetzung:**

**SEB** Wanne + M8 Gewindestange + Muttern + Unterlegscheiben

**LCO-LCC**  
Fasteners for Side Insertion

**Versions:**

- **LCO** for flat iron with holes
- **LCC** for flat, round, angular

**Components:**

1. **SAL** double Saddle in H.D.P.E.
2. Threaded Bar - **BFI M8**
3. **PSL** steel Flanges
4. **REI 8** Elastic Washer
5. **DAI 8** Hexagonal Nuts

**Use:**

Fixing 1 to 6 coaxial cables.

**GRE-GRQ** elastic cushions allow fastening of waveguides.

**Options:**

Available upon request threaded bar, nuts and washers M10, M12 and 3/8".

**LCO-LCC**  
Schellen mit seitlicher Einführung

**Versionen:**

- **LCO** für gelochtes Flacheisen
- **LCC** für Flach-, Rund- und Winkeleisen

**Zusammensetzung:**

1. **SAL** Doppelwanne H.D.P.E.
2. Gewindestange - **BFI M8**
3. Druckplatten **PSL**
4. **REI 8** Sicherungsscheiben
5. **DAI 8** Muttern

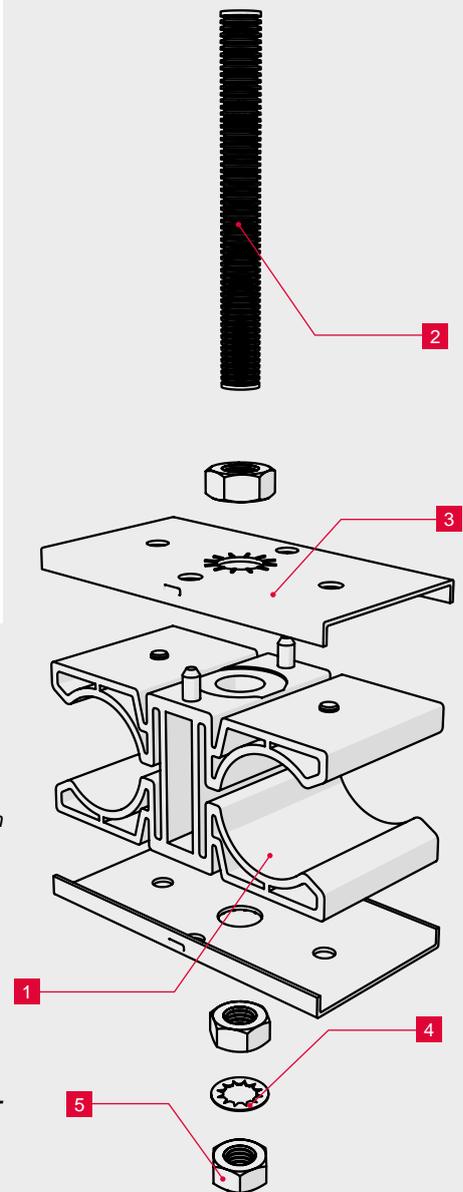

**Einsatz:**

Befestigung von 1-6 Koaxialkabeln.

Mittels elastischen Klemmprofilen **GRE-GRQ** auch von Wellenleitern.

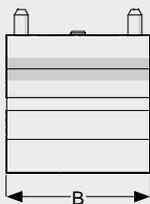

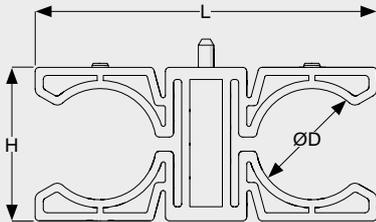

**Optionen:**

Auf Wunsch mit Gewindestange, Muttern und Unterlegscheiben M10, M12 und 3/8".

2. Gewindestange - **BFI M8**
3. **DAI 8** Muttern
4. **RPI** Flache Unterlegscheiben
5. Flexibles Scharniergelenk

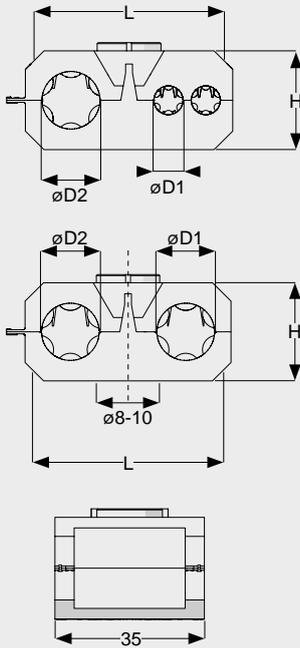

#### Einsatz:

Befestigung von 1-6 Koaxialkabeln.  
Befestigung von RG Kabel und LWL.

#### Optionen:

Auf Wunsch mit Gewindestange, Muttern und Unterlegscheiben M10 und 3/8".

### SAC - Calibrated Double Saddles with Flexible Hinge for RF, RG and FO

SAC Mini double saddles are used for small diameter cables.

They consist of two hinged calibrated half saddles that snap down on **couples of cables**, remaining blocked on the cables to be fixed.

The two cables, can be led to the fixing point and finally blocked there **through M8/ M10 threaded bars and screws, or sRF Cable Clamps.**

Cables are gently held, thanks to the internal special geometry of the saddles. They are specially recommended for **RG and FO cables.**

### SAC - Kalibrierte Doppelwannen mit Schnappverschluss für RF, RG und LWL

Die **SAC Mini-Doppelwannen** sind besonders für kleine Kabeldurchmesser geeignet. Die zwei Halbschalen werden durch ein flexibles Scharniergelenk zusammengehalten. Sie werden jeweils auf **zwei Kabel** aufgesetzt und eingerastet.

Die zwei Kabel werden so gehalten, an die Befestigungsstelle geführt und mittels **M8/ M10 Gewindestangen bzw. Schrauben oder sRF-Schellen** befestigt.

Die Kabel werden dank der kalibrierten Sättel der SAC-Doppelwannen schonend geführt.

Sie sind besonders geeignet für **RG-Kabel und LWL.**

**SEC - Double Saddles for a Wide Range of Diameters**

SEC mini saddles are used for small diameter cables. The innovative design of the saddle allows the fixing of cables with a wide range of diameters. The two saddles fitting corresponds to the diameter of a wide range of POWER and FO cables.

**SEC - Doppelwannen Decken einen Großen**

*Kabeldurchmesserbereich ab SEC Mini-Wannen werden für Kabel von kleinem Durchmesser verwendet. Das innovative Design der Wanne ermöglicht die Befestigung der Kabel und deckt einen großen Durchmesserbereich ab. Die zwei Wannen-Befestigung entspricht dem Durchmesser einer Vielzahl an POWER und FO Kabeln.*

## Universal Adaptor

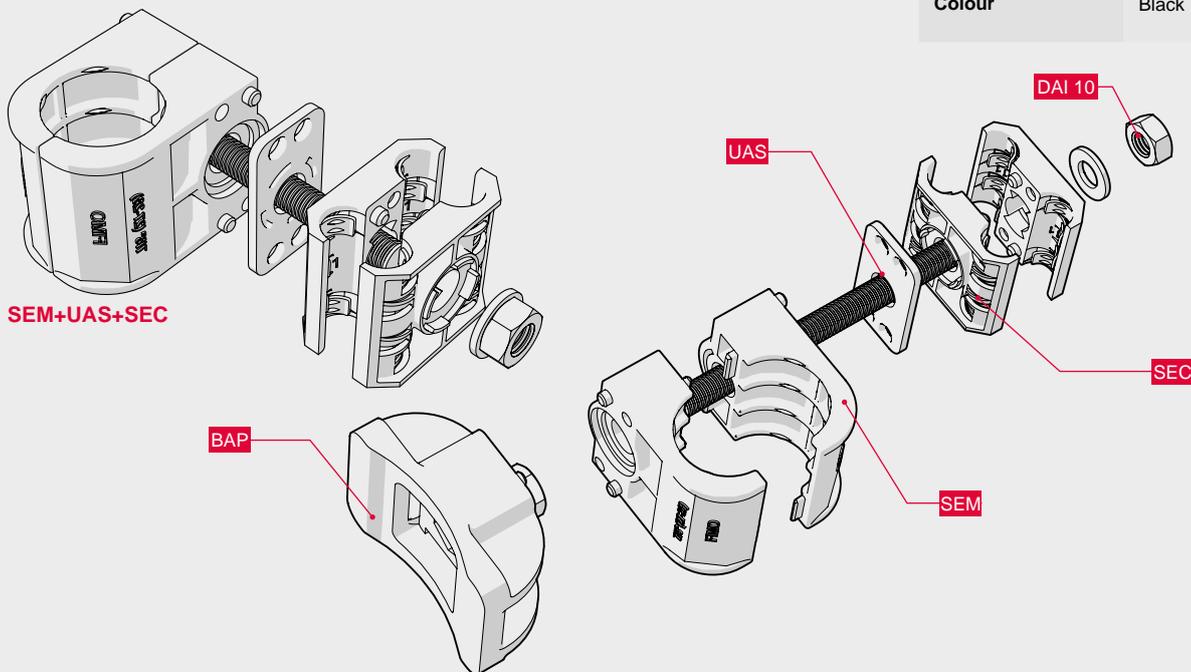

### UAS - Universal Adaptor for Saddles

**UAS** Universal Adaptor for saddles is a plastic spacer used to combine different models of FIMO saddles.  
**UAS** is also combinable with **BAP 10** plastic socle.

### UAS - Universaladapter für Wannens

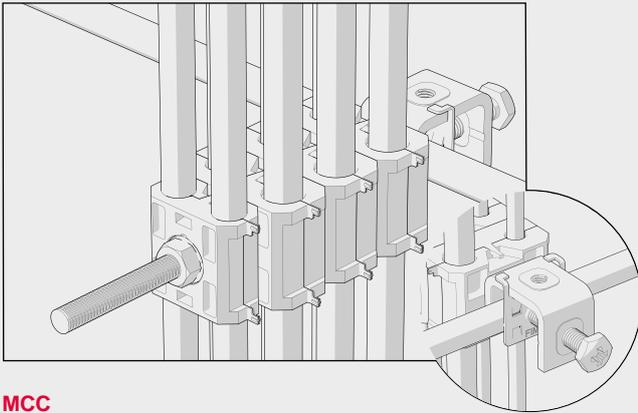

**UAS** Universaladapter für Wannens ist ein Kunststoff-Zwischenstück, verwendet um verschiedene Modelle von FIMO Wannens zu kombinieren.  
**UAS** ist auch kombinierbar mit **BAP 10** Kunststoffsockel.

# SDS M

## No Tools Stackable Modular Double Saddles

### MATERIAL

Saddle	P.A. U.V. Resistant Halogen Free
Colour	Black

### SDS M - No Tools Stackable Modular Double Saddles

SDS M no tools stackable modular double saddles are used for small diameters cables.

SDS M consists of a central body and modular fasteners for a quick side insertion of cables. Security Clips prevent accidental exit of cables from its housing.

The central body can be connected with a M8 screw to any type of clamp (**MAM 8**, **MBM 8**, **MIM 8**) or socle (**BAM**, **BOM**).

Two slides on the central body allow the stack up of other SDS M saddles without any hardware like threaded bars, washers and nuts.

The side modular fasteners are locked on the body of the saddles through a central slide and allow a fast and safe fixing of power and fiber optic cables without the use of tools.

### SDS M - Stapelbare, modulare Doppelsättel ohne Werkzeuge

SDS M - Stapelbare, modulare Doppelsättel werden für Kabeln mit geringem Durchmesser benutzt. cables.

SDS M besteht aus einem zentralen Hauptteil und modularen Verbindungselementen für einen raschen seitlichen Einschub der Kabel. Sicherungsclips verhindern, dass die Kabel ungewollt aus ihren Gehäusen austreten. Der zentrale Hauptteil kann mit einer M8-Schraube an jede Klemmentype (**MAM 8**, **MBM 8**, **MIM 8**) oder Sockel (**BAM**, **BOM**) angeschlossen werden.

Zwei Gleitstücke am zentralen Hauptteil ermöglichen den Aufsatz anderer SDS M-Sättel, ohne dass dazu Gewindestangen, Unterlegscheiben oder Muttern benötigt werden.

Die seitlichen, modularen Verbindungselemente sind am Hauptteil der Sättel mit einem Zentralgleitstück fixiert und erlauben eine rasche und sichere Befestigung von Strom- und Lichtwellenleiterkabeln ohne Einsatz von Werkzeugen.

# SOX

## Saddles

### SOX - "V" Profiled Saddles for BFI 8 Threaded Bars

The **SOX** saddles of UX clamps, have a large "V" profile, that allows the fastening of a wide range of cables and pipes.

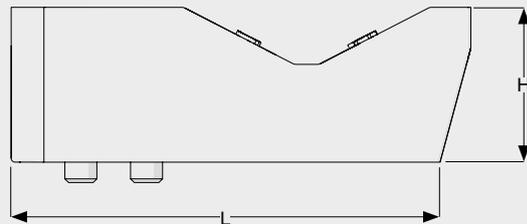

### SOX - "V"-Profil Klemmwannen für Gewindestangen BFI 8

Die **SOX**-Klemmwannen der Serie UX unterscheiden sich durch ein breites „V“-Profil. Somit kann ein großer Durchmesserbereich für die Befestigung von Kabeln und Rohren abgedeckt werden.

**UXC - Clamps for Power Cables and Pipes**

UXC cable clamps are equipped with SOX "V" profile saddles. A single clamp is suitable for various cables and pipes, with a large diameters range.

**Composition:**

SOX saddles + M8 threaded bars + nuts + washers + MIM 8 mini clamps

**UXC - Schellen für Elektro-Kabel und Verlegerohre**

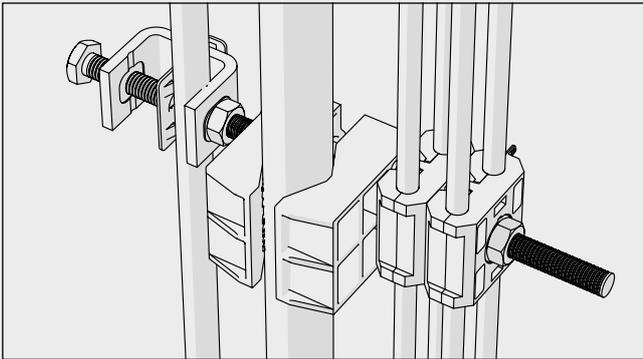

Die UXC-Schellen sind mit „V“-Profil Klemmwannen der Serie SOX ausgestattet. Dadurch kann unter Verwendung einer einzelnen Schelle ein großer Durchmesserbereich von Kabeln und Rohren abgedeckt werden.

**Zusammensetzung:**

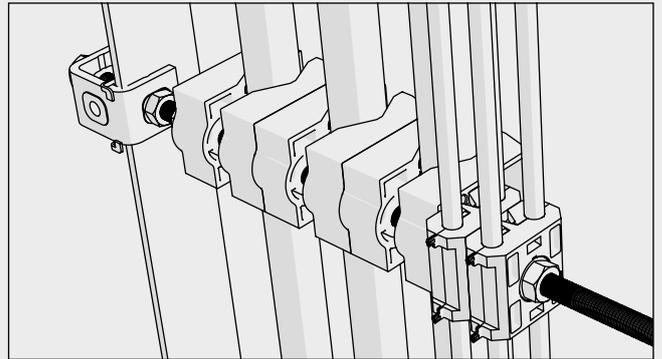

SOX-Klemmwannen + Gewindestift M8 + Muttern + Scheiben + Mini-Klemme MIM 8

**SAS M - Single Saddles for a Wide Range of Diameters**  
**SAT M - Double Saddles for a Wide Range of Diameters**

The **SAS M** and **SAT M** saddles are supplied with the OX cable clamps and are used for small diameter cables. The innovative design of the saddles allows the fixing of cables the a wide range of diameters. The two saddles fitting corresponds to the diameter of a wide range of cables.

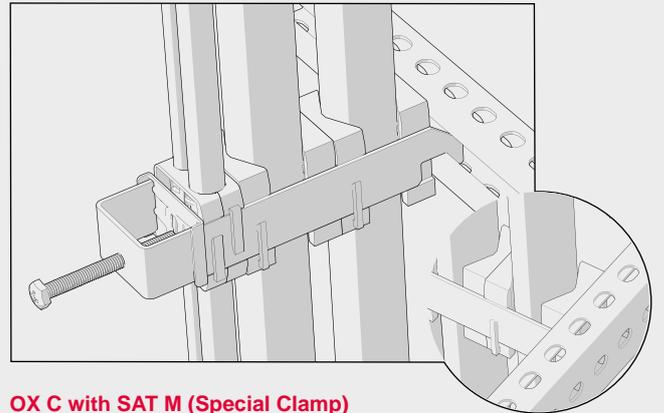

**SAS M - Einzelsitze für eine große Auswahl an Durchmessern**  
**SAT M - Doppelsitze für eine große Auswahl an Durchmessern**

Die Sitze **SAS M** und **SAT M** werden mit OX-Kabelklemmen geliefert und für Kabel mit kleinem Durchmesser verwendet. Das innovative Design der Sitze ermöglicht die Befestigung von Kabeln mit einer großen Auswahl an Durchmessern. Die Schließung von zwei passenden Sitzen passt sich dem Durchmesser einer breiten Palette von Kabeln an.

#### SAT H – Double saddles with embedded thermoplastic elastomeric cushion

The SAT H double saddles are supplied with OX cable clamps and are recommended for FO cables.

The saddles are realized combining an outer plastic body with an inner thermoplastic elastomeric cushion, which protects the outer jacket of the cables.

The innovative design of the thermoplastic elastomeric cushions allows a secure fixing of cables with a wide range of diameters.

#### SAT H - Doppelsättel mit innenliegender Dichtung aus thermoplastischem Elastomer

SAT H-Doppelsättel werden mit OX-Kabelschellen geliefert. OX und werden für LWL-Kabel empfohlen. Die Sättel werden durch die Kombination eines äußeren Kunststoffkörpers und einer innenliegenden Dichtung aus thermoplastischem Elastomer, die den äußeren Kabelmantel schützt, hergestellt.

Das innovative Design der thermoplastischen Elastomer-Dichtung ermöglicht die sichere Befestigung von Kabeln mit einem breiten Spektrum an Durchmessern.

### Snap-in Hangers for Electrical Cables and Pipes

The **EMC** snap-in hangers consist of an elastic stainless steel clip connected, by central rivet, with a hanging and supporting adapter/soacle. The hanger is 360° revolving.

It can be fixed onto various structures, such as angulars, flats, tubes and "C" sections. Four hanger sizes only allow 9 to 52 mm diameter cables hanging.

By means of an usual hose-clamps the **EMC-U** version can be applied to structures of any kind of form and dimension.

### Schnellmontage-Schellen für Elektro-Kabel und Verlegerohre

**EMC** Schnellmontage-Schellen bestehen aus einem elastischen Edelstahl-Clip, der mit einer Niete an einem Adapter bzw. Sockel befestigt ist. Die Schelle ist so 360° drehbar. Die verschiedenen Ausführungen können direkt an Winkel-, Rund- und Flacheisen sowie „C“-Profile montiert werden. Mit nur vier Abmessungen können Kabel und Rohre ab Durchm. 9 mm bis 52 mm schnell und ohne Werkzeug verlegt werden. Die Version **EMC-U** ermöglicht in Verbindung mit handelsüblichen Schlauchklemmen die Befestigung an Gerüsten jeglicher Form und Abmessung.

#### EMC-A

Snap-in hangers, suitable for 3 to 8 mm thick flat or angular structures.

360° revolving.

Quick and safe installation, with no tools

#### EMC-A

Schnellmontage-Schellen mit Spezialsockel für Befestigung an Flach-/Winkel-eisen, Stärke 3 - 8 mm.

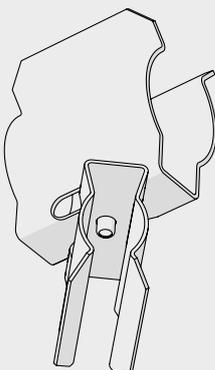

360° drehbar.

Schnellmontage ohne Werkzeug.

#### EMC-C

Snap-in hangers bayonet hooking on **PCI B 40x22** sections (EMC-C). The hanger is 360° revolving.

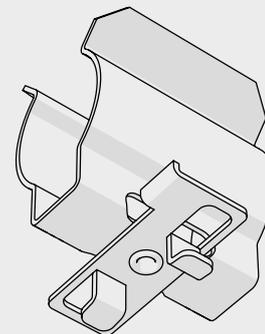

Quick and safe installation by self-locking rotation into the "C" section, with no tools.

#### EMC-C

Schnellmontage-Schellen mit Bajonett-Verschluss zur Befestigung auf C-Profil **PCI B 40x22** (EMC-C). 360° drehbar.

Die Schnellmontage auf dem Profil erfolgt ohne Werkzeug durch seitliches Einrasten.

#### EMC-M

Snap-in hangers suitable for Ø 16÷22 mm rounds.

360° revolving.

Quick and safe installation with no tools.

#### EMC-M

Schnellmontage-Schellen mit Spezialsockel zur Befestigung auf Rundeisen Ø 16÷22 mm.

360° drehbar.

Schnellmontage ohne Werkzeug.

#### EMC-U

Snap-in hangers to be fixed on various structures by means of the **FAS, FAU** stainless steel hose clamps or **BIT 19** strip.

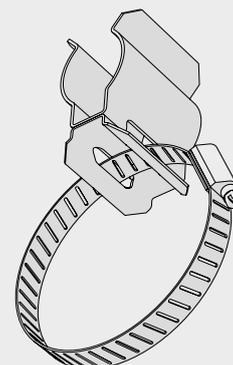

360° revolving.

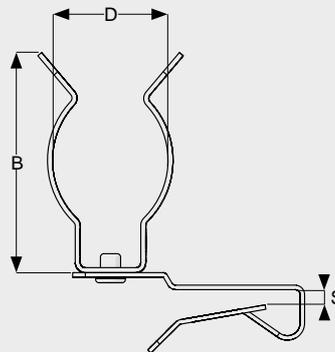

Quick and safe installation with no tools.

#### EMC-U

Schnellmontage-Schellen mit Spezialsockel zur Befestigung mittels Bandschellen **FAS, FAU** oder Stahlband **BIT19** an Masten und Gerüste. 360° drehbar.

Schnellmontage ohne Werkzeug.

# SCC · MRM 6

## Click Collars and Clamps

1

### SCC - Click Collars MRM 6 - Fastening Clamps

The **SCC round collar** has been especially designed for quick installation of HF and DC cables as well as for pipes, using high flexible stainless steel.

The cables will be secured by a manually easy to reopen grid system.

The base has been formed giving optimal and stable support for various surfaces as well as for direct combination with the **FIMO MRM 6 special stainless steel clamp**.

This will ensure easy mountings of **SCC round collar** on round, flat and rectangular steel profiles.

Furthermore the **SCC round collar** can be installed using standard fastening devices on walls and profiles.

Two lateral slots along the lower base will allow the use of steel straps for mounting on masts with any diameter.

The progressive ratcheting of the locking system will easily allow for all clamp sizes the adjustment for different cable & tube diameters.

The locking is in any case easy, secure and long-living.

### Technical Features of SCC round collar and MRM 6 clamp

**SCC:** Monoblock body made of flexible stainless steel, ratchet-tightening and opening by hand, without tool. Mounting via standard screws, plugs, steel straps and special FIMO **MRM 6** clamp.

**MRM 6:** Monobloc body with M6 tightening screw. Additional M8 screw available for other applications.

### SCC - Clic-Rundsellen MRM 6 - Halteklemmen

Die **SCC-Rundschelle** ist im Wesentlichen kreisförmig und oben offen, um Elektro- und Koaxialkabel sowie Rohre verlegen zu können. Sie ist aus hochflexiblem Edelstahl hergestellt. Die Kabel werden schnell mit einer leicht manuell wieder zu öffnenden Rasterung verschlossen. Das Unterteil ist zur stabilen Auflage für unterschiedliche Oberflächen wie Wände, Masten, Profile geformt. Die Befestigung erfolgt über die üblichen Befestigungsteile wie Schrauben, Dübel u.Ä. Die vorgesehene **MRM 6 Edelstahl-Klemme** rastet perfekt in das Unterteil der **SCC-Rundschelle** ein und ermöglicht die leichte Montage an Flach- und Winkel-Eisen sowie Rundprofilen. Zwei Einschlitzungen auf dem Unterteil der **SCC-Rundschelle** ermöglichen die Befestigung mittels Stahlband an Masten jeglicher Durchmesser. Die **SCC-Rundschelle** ist in jedem Fall leicht zu öffnen und zu spreizen, um das zu befestigende Kabel oder Rohr einzuführen. Anschließend wird sie durch einen einfachen Druck auf die oberen Kanten wieder geschlossen.

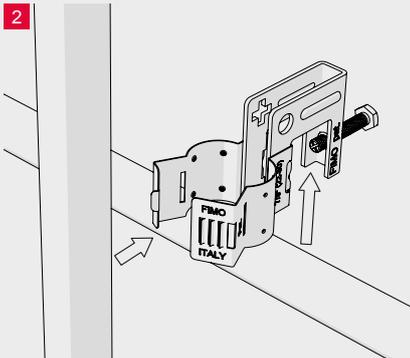

Die progressive Rasterung des Verschlusssystems erleichtert für jede Schellengröße jeweils das Anpassen an verschiedene Kabel- und Rohr-Durchmesser. Die Befestigung ist jedenfalls leicht, sicher und dauerhaft.

### Merkmale der SCC-Schelle und der MRM 6 Klemme

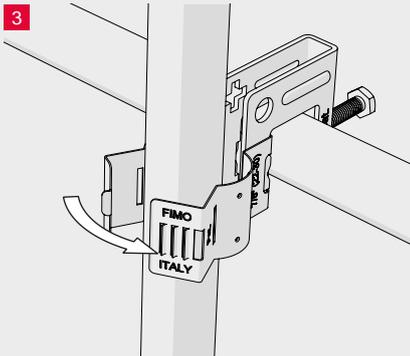

**SCC:** Einteiliger Körper aus flexiblem Edelstahl Riegelverschluss und Öffnung per Hand, ohne Werkzeug Befestigung mit üblichen Schrauben, Dübeln, Bandschellen und auch mittels der FIMO MRM 6 Spezialklemme.

**MRM 6:** Einteiliger Körper mit M6 Befestigungsschraube. Auf Wunsch zusätzliche M8 Schrauben für andere Befestigungen.

SCC + FAU

SCC + MRM

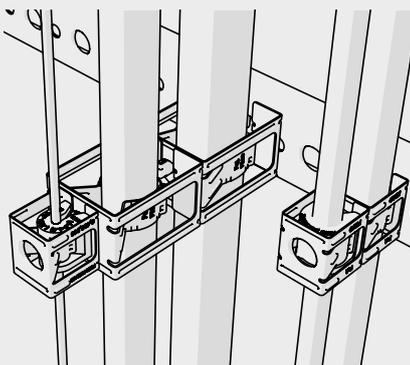

SCP + GRR

**MATERIAL**

AISI 301 Stainless Steel

**SIC - Speedy Snap-in Clamps**  
For Cables and Pipes

**SIC** square shaped clamps. The high flexible Monobloc stainless steel body, with corresponding claws, allows an easy handling by snapping into 19 mm (3/4") wide round holes.

After widening the lower opening of the clamp it can be superimposed onto the cable or rigid line. The final mounting is performed by locking the clamp into the perforation of the according socket.

An inner bracket pair holds the cable in a position by applying elastic pressure with its variable geometry.

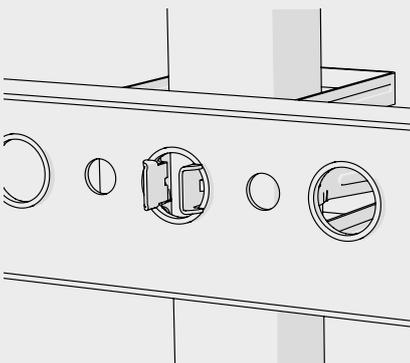

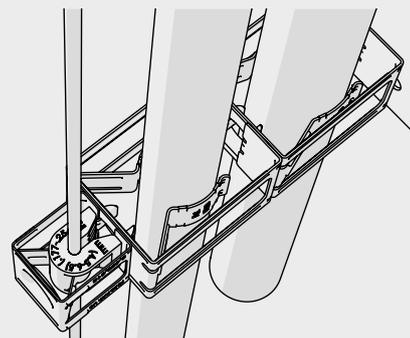

The top boring with a diameter of 19 mm facilitates the mounting and stacking of further **SIC** clamps.

By using an adaptor, the **SIC** clamp can also be fastened to various flat and rectangular irons, respectively to standard "C" profiles.

The mounting can be performed quickly, conveniently and without the need of tools. Only 4 clamps version/dimensions are sufficient in order to install the majority of coaxial cables for the telecommunications industry (1/2" - 7/8" - 1.1/4" - 1.5/8"), as well as electrical cables and pipes.

**Technical features:**

- Monobloc Stainless steel body
- Elastic, simple and strong structure
- Freehand speedy mounting
- Uphead installation
- Secure and soft fastening of cables

**SIC - Schnellmontage Kabelschellen**  
für Elektro-Kabel und Verlegerohre

Die **SIC** Schnellmontage-Schellen haben eine quadratische Form.

Sie haben einen einteiligen Edelstahlkörper und eine elastische Struktur. Diese kann am Unterteil leicht aufgeweitet werden, der über entsprechend große Krallen verfügt.

Die Schelle wird zuerst auf Kabel oder Rohre aufgesetzt. Danach erfolgt die Endbefestigung durch Einrasten in die Lochung mit einem Durchm. 19 mm (3/4") des vorgesehenen Halters.

Ein in der Quadratschelle nach innen gerichtetes Klammerpaar hält das Kabel mit elastischem Druck sehr sicher fest.

Die obere Bohrung der Quadratschellen ermöglicht die Aufnahme weiterer ähnlicher Schellen.

Die **SIC** Schnellmontage-Kabelschellen werden schnell und leicht auf angebracht vorbereitete Profile mit Lochungen mit einem Durchmesser von 19 mm befestigt und können mittels eines Adapters auch an verschiedenen Flach- und Winkleisen sowie an handelsüblichen „C“-Profilen befestigt werden.

Die Montage erfolgt jeweils schnell, bequem und ohne Verwendung von Werkzeugen. Nur 4 Schellen-Typen/-Abmessungen reichen für die Installation der meisten Koaxialkabel (1/2" - 7/8" - 1.1/4" - 1.5/8") sowie Elektrokabel und Rohre.

**Charakteristik:**

- Einteiliger Edelstahl-Körper
- Elastische, einfache und robuste Struktur
- Schnelle Montage,,
- ohne Werkzeug
- Staplungsmöglichkeit mehrerer Schellen, auch
- verschiedener Größen
- Sichere und schonende Halterung der Kabel

### SIC H Hybrid Snap-in Cable Clamps

The SIC H quick cable fasteners have the shape of a square collar. Consisting of a stainless-steel body and a plastic fastening system, they are characterized by an elastic structure.

In this way, they can be easily spread out at the base, on which the plastic hooked feet are attached. First plugged into cables or pipes, they are then inserted into 19 mm (3/4") holes in specific dedicated structures. The collars have two shaped fins on the sides facing the inside, so as to securely but elastically hold the installed cable. The upper side of the square collars has a hole to accommodate other similar collars.

SIC H quick cable fasteners are quickly and easily applied on special profiles with holes diam. 19 mm, as well as on adapters specifically designed to be applied to structures of all kinds, such as flat irons, angles and commercial C-profiles. Quick assembly is performed in any case without the help of any tools. The plastic feet make possible to electrically insulate the cable clamp from the structure on which they are fixed or from another SIC H cable clamp (when stacked together).

The product thus created, allows to significantly reduce the phenomenon of passive intermodulation (PIM).

### SIC H Hybrid Snap-in Cable Clamps

SIC H-Schnellkabelklemmen haben die Form eines quadratischen Kragens. Sie bestehen aus einem rostfreien Stahl einem Gehäuse aus Edelstahl und einem Kunststoff-Befestigungssystem und zeichnen sich durch eine elastische Struktur aus.

Auf diese Weise können sie leicht an der Basis, an der die Kunststoff-Füße befestigt sind, erweitert werden.

Zunächst auf Kabel oder Rohre eingerückt, werden sie dann in speziell vorbereitete Löcher mit einem Durchmesser von 19 mm (3/4") eingesetzt. Die Kragen haben an ihren Seiten zwei nach innen gerichtete Formlamellen, um das verlegte Kabel sicher, aber flexibel zu halten. Die Oberseite der Vierkantkragen hat ein Loch zum Auffangen von anderen ähnlichen Kragen.

SIC H Schnellkabelklemmen werden schnell und einfach auf entsprechend vorbereiteten Profilen mit einem Lochdurchmesser von 19 mm angebracht. Ebenso können sie auf Adaptern eingesetzt werden, die speziell zur Anwendung für Strukturen aller Art wie Flacheisen, Winkel- und kommerzielle "C"-Profile, konzipiert worden sind. Eine schnelle Montage erfolgt in jedem Fall ohne den Einsatz von Werkzeugen. Die Plastikfüße erlauben die elektrische Isolation von den Kabelklemmen, an denen sie befestigt sind oder von einer anderen SIC H Kabelklemme (wenn aufeinander gestapelt).

Das so entstandene Produkt ermöglicht es, das Phänomen der passiven Intermodulation (PIM) deutlich zu reduzieren.

### FEATURES & BENEFITS

- Monobloc steel body + plastic feet
- Simple, robust and elastic structure
- Hand-applied, fast, tool-free
- Possibility of overlap several collars, even of different sizes
- Soft and elastic hold of the cables
- Ideal for reducing passive intermodulation PIM

### EIGENSCHAFTEN & VORTEILE

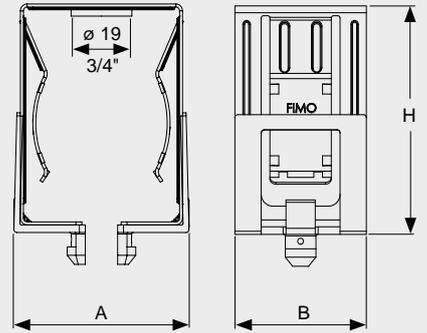

- Monoblock-Stahlgehäuse + Kunststofffüße
- Einfache, robuste und elastische Struktur
- Kann von Hand, schnell und ohne Werkzeug angebracht werden
- Auch stapelbar zwischen verschiedenen Größen
- Elastische und nicht-aggressive Kabeldichtung
- Ideal zur Reduzierung der passiven Intermodulation PIM

### SIC P Plastic Snap-in Clamps

SIC P plastic snap-in clamps have been specifically designed for a quick and tool-less installation of cables. The high flexibility of the body, obtained with high-performance compound and optimal design, allows an easy handling by snapping into 19 mm (3/4") wide round holes.

After superimposing the clamp onto the cable, the SIC P can be mounted by locking it into the perforation of the according socket.

An inner bracket pair holds the cable in position by applying elastic pressure with its variable geometry. Two pairs of flaps extending from the base cooperate with the brackets to further increase the axial retention of cable especially with bigger diameter cables. The high security factor K allows horizontal as well as vertical installations.

The head portion with the pass-through circular opening facilitates the mounting and stacking of further SIC P clamps, allowing mutual rotation and twistability.

4 versions, all sharing a common external frame, guarantee the capability to install cables in the range spanning from 4 to 17 mm, covering the majority of fiber optic cables, jumpers, electrical cables and pipes commonly used in the telecommunications industry.

### SIC P Plastic Snap-in Clamps

SIC P-Kunststoffkabelklemmen sind für die schnelle und werkzeuglose Installation von Kabeln konzipiert. Die hohe Verformbarkeit des Körpers, die durch die Verwendung von Materialien mit hohen mechanischen Eigenschaften und durch das optimierte Design erreicht wird, ermöglicht eine einfache Handhabung des Produkts, das in Bohrungen mit einem Durchmesser von 19 mm (3/4") eingesetzt werden kann. Nach dem Aufstecken der Kabelklemme auf das Kabel kann SIC P durch Einklemmen in die speziell gebohrte Struktur installiert werden.

Ein Paar interner Halterungen blockiert das Kabel, indem sie dank ihrer variablen Geometrie elastischen Druck ausüben. Ein Paar Flügel, die sich von der Basis aus erstrecken, arbeitet mit den Halterungen zusammen, um den axialen Halt des Kabels insbesondere bei Kabeln mit größerem Durchmesser weiter zu erhöhen. Der hohe Sicherheitsfaktor K ermöglicht den Einsatz sowohl in vertikalen als auch in horizontalen Installationen.

Das Oberteil der Kabelklemme mit der kreisrunden Durchgangsöffnung erleichtert die Montage und das Stapeln weiterer SIC P-Kabelschellen, indem sie sich miteinander drehen und verdrehen lassen. Vier Versionen, die sich einen einzigen Außenrahmen teilen, garantieren die Möglichkeit der Installation von Kabeln mit einem Durchmesserbereich von 4 bis 17 mm, der die meisten der im Telekommunikationssektor üblichen Glasfaserkabel, Jumper, elektrischen Kabel und Rohre abdeckt.

### FEATURES & BENEFITS

- Free hand, quick and easy installation
- Stackable and twistable (up to three clamps)
- Easily removable without tools
- Suitable for horizontal and vertical installations
- Single external frame for 4 versions (range: 4 – 17 mm diameter cables)
- Optimal design and high-performance compound with high mechanical resistance and flexibility
- High security factor K in all axial tests
- High ice and wind load resistance (up to 300 km/h)

### EIGENSCHAFTEN & VORTEILE

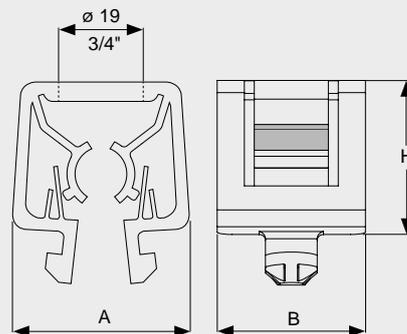

- Handapplikation, schnelle und einfache Installation
- Stapelbar und drehbar (bis zu 3 Krügen)
- Ohne Werkzeug abnehmbar
- Geeignet für vertikale und horizontale Installationen
- Einzelner Außenkörper für 4 Versionen (Bereich: 4 - 17 mm Kabeldurchmesser)
- Optimales Design und Hochleistungsmaterial mit hoher mechanischer Festigkeit und Flexibilität
- Hoher Sicherheitsfaktor K bei allen axialen Prüfungen
- Hohe Widerstandsfähigkeit gegen Eis- und Windlasten (bis zu 300 km/h)

### MATERIAL

Rubber EPDM, U.V. Resistant

### SRG Safe Rubber Guard

SRG rubber guards combined with SIC and SIC H snap-in clamps are the perfect solution for a quick, easy and safe installation of coaxial, fiber and power cables. SRG rubber guard allows safe locking of coaxial, fiber optics and power cables, protecting cable and its jacket. SRG rubber guards sizes cover a wide diameter range (4.5 – 40 mm / .177 – 1.574 inches) of fiber optic and power cables.

### FEATURES & BENEFITS

- Strong and elastic structure
- Outer frame optimized for a smooth cable insertion
- One-hand instant mounting
- Safe and flexible fastening of cables
- Ideal for reducing passive intermodulation PIM

### SRG Schutzdichtungen

SRG-Schutzdichtungen kombiniert als Schnellbefestigungen SIC und SIC H sind die perfekte Lösung für die einfache, schnelle und sichere Installation von Koaxial-, Lichtwellenleiter- und Energiekabeln. SRG-Schutzdichtungen ermöglichen die sichere Klemmung von Koaxial-, Lichtwellenleiter- und Energiekabeln, indem sie das Kabel und dessen Außenmantel schützen. Die SRG-Dichtungsvarianten decken den gesamten Durchmesserbereich (4,5 - 40 mm / .177 - 1.574 Zoll) von Lichtwellenleitern und Energiekabeln ab.

### EIGENSCHAFTEN & VORTEILE

- Widerstandsfähige und elastische Struktur
- Optimierte äußere Struktur für einfache Kabeleinführung
- Schnelle Installation mit einer Hand
- Sichere und flexible Blockierung der Kabel
- Ideal zur Reduzierung der passiven PIM-Intermodulation

**SRR**  
Round Reduction Cushions for a wide range of cables' diameters.

SRR round reduction cushions allow a safe fixing of coaxial, fiber optic and power cables with a wide range of diameters. They consist of two hinged half cushions with an innovative internal structure designed to be easily shaped around cables with a wide range of diameters. SRR round cushions guarantees a secure locking of cables, protecting cable and its jacket. Two cushions are covering the entire diameter's range (4-32 mm / .157 -1.260 inches) of fiber optic and power cables. SRR round reduction cushions can be combined either with **SIC** snap-in cable clamps or with **SEB** calibrated double saddles

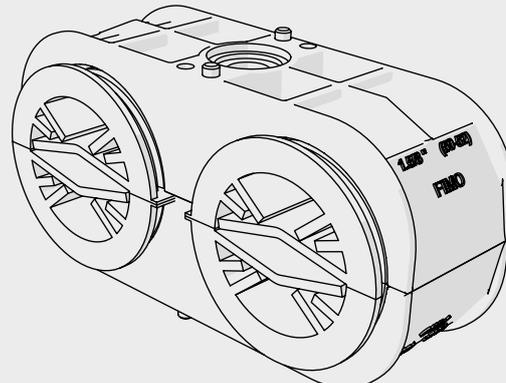

**Not Available for US market**

**SRR**

Heavy Duty monobloc bidirectional plastic clamp available with three 3/4" holes and slots for the installation with two plastic tie wraps to various structures like poles and pylons. The 3/4" holes allow the combination with SIC H and SIC P snap-in cable clamps. Two specific plastic reduction inserts (ISP 3/4" – 3/8" V and O) are foreseen for the installation with a 3/8" locking screw on flats, rounds and angular, and for the installation of cable blocks with 3/8" hardware.

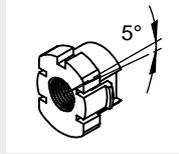

Universal-Kunststoffklemme mit drei Bohrungen 3/4" und zwei Schlitze für die Montage mit Kunststoffbindern an verschiedenen Strukturen wie Pfosten und Maste. 3/4"-Bohrungen ermöglichen die Verwendung in Kombination mit Kabelklemmen SIC H und SIC P. Zwei spezifische Einsätze (ISP 3/4"-3/8" V - ISP 3/4"-3/8" O) sind für die Installation mit Feststellschrauben an flachen, runden und eckigen Kommas und für die Montage von Sätteln mit Gewindestangen 3/8" vorgesehen.

## Square Collars

### MATERIAL

<b>Collar</b>	AISI 304 Stainless Steel
<b>Saddles</b>	Fiberglass P.A., U.V. Resistant Black Colour Halogen Free

### RF Q - Square Collar With SAS/SAT Calibrated Saddles

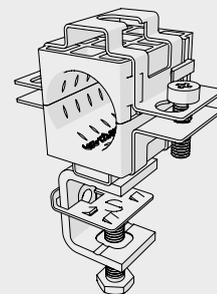

The **RF Q** square collar is formed by two shells joined by cylindrical headed cross-slotted screws.

The parts are pre-assembled and without any loose parts. A  $\varnothing 8,5$  hole allows the installation of M8 screws.

Combined with **MAM**, **MBM**, **MCM** and **MIM** multidirectional clamps, **BAM** socles or **GOP** round collar it allows fastenings on any structure with any orientation.

### RF Q - Quadratschelle Mit kalibrierten Wannen SAS/SAT

Die **RF Q** Quadratschelle besteht aus zwei Schalen, welche mittels M6-Zylinderkopfschrauben mit Kreuz-/Schlitz zusammengehalten werden. Für einfachste Montagevorgänge sind die Teile unverlierbar zusammengebaut. Ein Befestigungsloch  $\varnothing 8,5$  ermöglicht die Befestigung mit M8-Schrauben. Zusammen mit den ausschwenkbaren Klemmen **MAM**, **MBM**, **MCM** und **MIM**, dem Sockel **BAM** oder **GOP**-Schelle können sie bequem auf jedem Profil und mit jeder Ausrichtung befestigt werden.

## Single Hanger Adaptor

### SHA - Single Hanger Adaptor

Socle to be applied with strips or hose clamps to various structures like poles and pylons. Available versions with two different heights (35 and 55 mm) and with two different holes ( $3/8$ " threaded and  $3/4$ "). The versions with  $3/4$ " holes can be used in combination with SIC clamps or IS  $3/4$ " -  $3/8$ " reduction insert.

### SHA - Einfachsocket

Mit Stahlband oder Schellen an verschiedene Strukturen wie Rund- oder Gittermasten zu befestigen. Es sind Versionen mit verschiedenen Höhen (35 und 55 mm) und zwei verschiedenen Bohrungen ( $3/8$ " mit Gewinde und  $3/4$ ") erhältlich. Die Versionen mit einer Bohrung von  $3/4$ " können zusammen mit SIC-Kabelschellen oder dem Reduziereinsatz IS  $3/4$ " -  $3/8$ " eingesetzt werden.

## Collars

### MATERIAL

AISI 304 Stainless Steel

### GO - Round Collar

The GO collar is formed by two shells connected by two cylindrical headed M6 screws with cross/screwdriver cut. It is pre-assembled in order to avoid losing any parts. A central  $\varnothing 8,5$  mm hole allows the installation on supports with M8 screws. The M8-threaded hole of the upper shell allows more fastenings on the top.

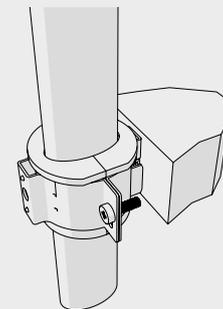

The nominal diameter D fits with the outer diameters of the **GRE**, **GRR** and **GRQ** elastic cushions.

### GO - Rundschelle

*Die GO-Schelle besteht aus zwei Schalen, die mittels M6-Schrauben zusammengehalten werden. Diese Schalen sind so montiert, dass bei der Montage keine Teile verloren gehen können.*

*Die Zentralbohrung von  $\varnothing 8,5$  mm des Unterteils ermöglicht eine Befestigung mit M8-Schrauben an Halterungen. Eine M8 Gewindebohrung des Oberteils ermöglicht weitere Kombinationen.*

*Der Nenndurchmesser D passt zu den Außendurchmessern der Klemmdichtungen **GRE**, **GRR** und **GRQ**.*

# ANG 8 - SNO 8

FASTENING DEVICES  
PRODUCT CATALOGUE

## Supports

### ANG 8 - Angular

With M8 threaded hole and  $\varnothing$  9 hole for installations on different FIMO components.

### ANG 8 - Winkelteil

Mit M8 Gewindeloch und  $\varnothing$  9 Bohrung für die Befestigung an verschiedenen FIMO Teilen.

#### MATERIAL

AISI 304 Stainless Steel

CODE	ARTICLE	DESCRIPTION	BOX	WEIGHT
61 1804 0008	ANG 8	Angular with M8 and $\varnothing$ 9 holes	20	22

### SNO 8 - Angle Bracket

Formed by two ANG 8 angulars connected through a socket head screw and an elastic washer. Ideal for multidirectional installations.

### SNO 8 - Winkelgelenk

Bestehend aus zwei ANG 8 Winkelteilen, verbunden mit einer Inbusschraube und Federscheibe. Ideal für 3D Montagen.

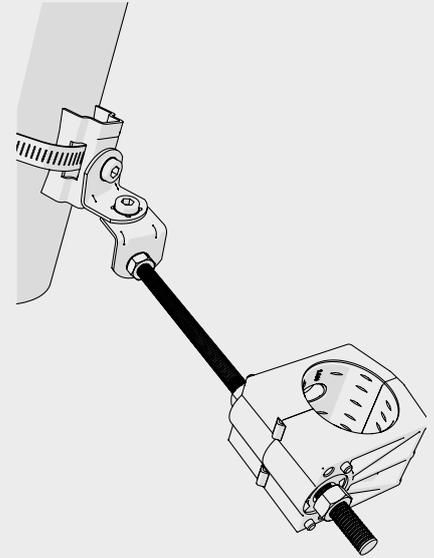

#### MATERIAL

AISI 304 Stainless Steel

# HANGER KIT BAC

## Fastening System

FASTENING DEVICES  
PRODUCT CATALOGUE

### MATERIAL

<b>Metal Parts</b>	AISI 304 Stainless Steel
<b>Cushion</b>	Black EPDM, U.V. Resistant

### Fastening System on Pylon For Flexible Waveguides

Antivibration hanger kit for fastening waveguides near antennas, even in harsh environments. Twistable and adjustable to different lengths.

#### Components:

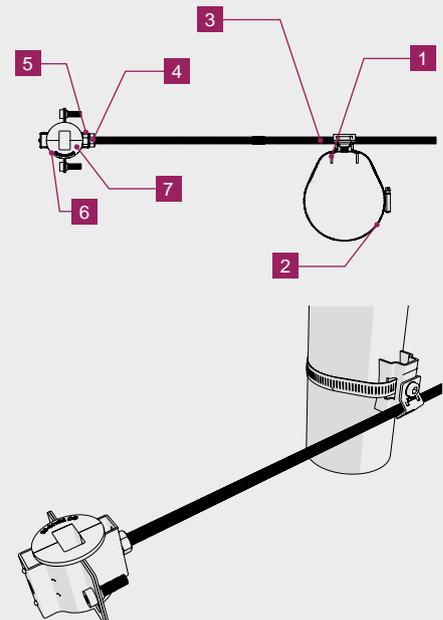

1. **BAC 8** - Socle with bow
2. **FAU 150/14** - Endless hose clamp
3. **BFI 8x400** - Threaded bar
4. **DAI 8** - M8 hexagonal nut
5. **REI 8** - Elastic washer
6. **GO** - Round collar
7. **GRQ** - Cushion

### Mast-Befestigungssystem für flexible Wellenleiter

Vibrationsfestes Haltesystem von Hohlleitern in Antennennähe auch bei extremen Bedingungen.  
Richtbar und regelbar.

#### Zusammensetzung:

1. **BAC 8** – Sockel mit Bügel
2. **FAU 150/14** – Endlose Schlauchklemme
3. **BFI 8x400** – Gewindestange
4. **DAI 8** – M8 Sechskantmutter
5. **REI 8** – Sicherungsscheibe
6. **GO** – Rundschelle
7. **GRQ** – Dichtung

## Hoisting Grips

### CLS - Lace up Hoisting Grips for Coaxial Cables and Elliptical Waveguides

Lace up hoisting grips are designed for hoisting cable or waveguide safely up a tower so that mechanical connection to an antenna can be made.

### CLS - Ziehstrümpfe für Koaxialkabel und elliptische Hohlleiter

Ziehstrümpfe werden verwendet, um Kabel oder Wellenleiter auf sichere Weise an einen Mast hochzuziehen, sodass der mechanische Anschluss an der Antenne vorgenommen werden kann.

### MPS - Clamp for Ladders

Hanging element which allows additional side fixings to ladders. It can be used in combination with brackets, threaded bars, collars and other accessories. It is useful when ladders are overcrowded.

#### Description:

- hanging bow
- protection and stabilization plate
- M8 locking screw
- Ø 8,5 hole for M8 screws/threads

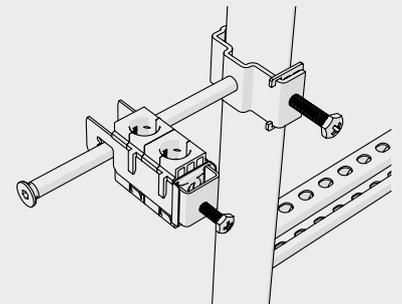

### MPS - Spezialklemme für Kabelleiter

*Praktisches Befestigungselement zum seitlichen Anbau an bereits überfüllten Kabelleitern.*

*Kombinierbar mit Konsolen, Gewindestangen, Rundschellen usw. für die Verlegung von weiteren Kabeln mittels Schellen usw.*

#### Beschreibung:

- Haltebügel
- Schutz und Halteplatte
- M8 Befestigungsschraube
- Bohrung Ø 8,5 für M8-Gewindestifte

### RAC Cable Clamps for Radiating Cables

RAC cable clamps are used for the installation of radiating cables in tunnels. RAC clamps may be installed with or without spacers. RAC cable clamps are designed with two clips coupled to a central snap-in cap. The two clips allow a quick insertion of the cable, while the central snap-in cap assures the final locking. RAC Cable Clamps are designed also for installations in high speed railway tunnel applications (up to 350 km/h).

### RAC Schellen für abstrahlende Kabel

RAC-Schellen werden für die Verlegung von abstrahlenden Kabeln an Wänden in Tunneln und Tiefbauten verwendet. RAC-Schellen sind eine Kombination von zwei elastischen Clips mit einem mittigen Verschluss-Bügel. Die beiden Clips ermöglichen eine bequeme und schnelle Vorbefestigung des Kabels. Der mittige Verschluss-Bügel sorgt für einen schnellen Schnappverschluss für eine sichere End-Verriegelung. RAC-Schellen werden auch in Tunneln von Hochgeschwindigkeitszügen (bis zu 350 km/h) eingesetzt.

## Safety Collars

### MATERIAL

Collar	AISI 304 Stainless Steel
Saddles	Fiberglass, PA, U.V. Resistant
Colour	Black

### RF Q - Square Collar for Radiating Cables Complete with SAS rigid Calibrated Saddles

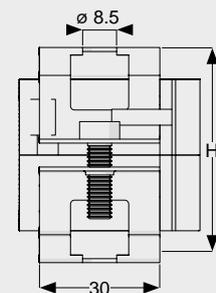

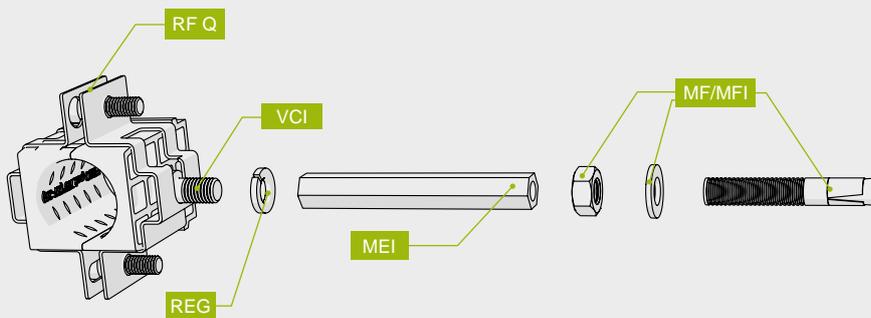

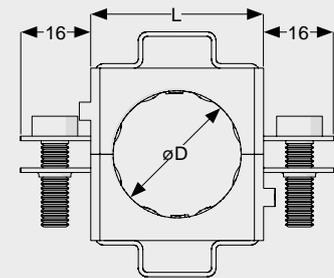

The **RF Q** square collar is formed by two shells joined by M6 screws and calibrated saddles **SAS**.

It is recommended in combination with **RAC** clamps for radiating cables.

Whether inserted at a suitable distance (10-15 m) among **RAC** clamps, it prevents radiating cable lines from falling down, in case of fire.

### RF Q – Quadratschelle für Abstrahlende Kabel komplett mit kalibrierten SAS Wannen

Die **RF Q** Quadratschelle besteht aus zwei Schalen, welche mittels M6-Schrauben zusammengehalten werden, und kalibrierten **SAS**-Wannen. Es wird eine Verwendung mit **RAC**-Schellen empfohlen. Es wird eine Verlegung in angemessenen Abständen (10-15 m) zwischen den **RAC**-Schellen empfohlen, um die Anlage im Brandfall vor einem Zusammenbruch zu schützen.

## Safety Collars

### SCC

#### Click Collars for Radiating Cables

The **SCC round collar** has been especially designed for quick installation of HF and DC cables as well as for pipes.

It is recommended in combination with **RAC** clamps for radiating cables. Whether inserted at a suitable distance (10-15 m) among **RAC** clamps, it prevents radiating cable lines from falling down, in case of fire.

### SCC

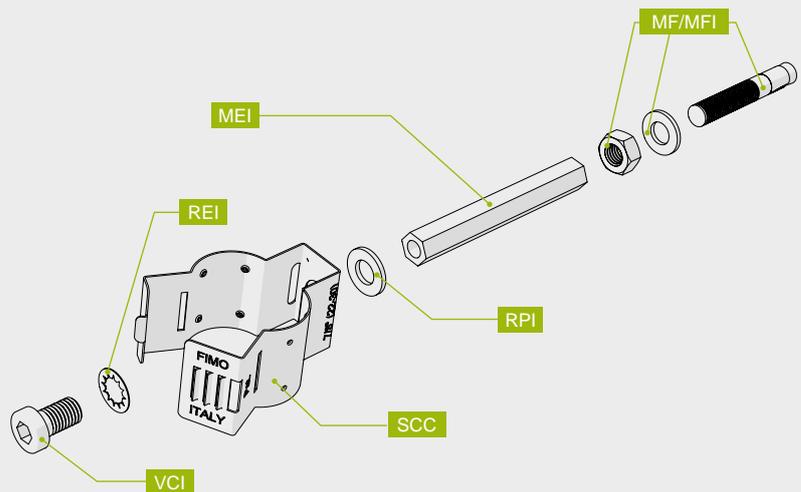

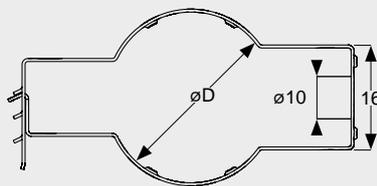

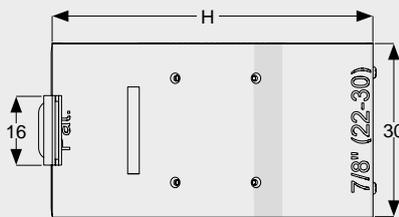

#### Clie-Rundsellen für abstrahlende Kabel

Die **SCC-Rundselle** ist im Wesentlichen kreisförmig und oben offen, um Elektro- und Koaxialkabel sowie Rohre verlegen zu können.

Es wird eine Verwendung mit **RAC**-Schellen empfohlen. Es wird eine Verlegung in angemessenen Abständen (10-15 m) zwischen den **RAC**-Schellen empfohlen, um die Anlage im Brandfall vor einem Zusammenbruch zu schützen.

### RAW Monoblock Radiating Cable Clamps

The RAW cable clamps are used to fasten radiating cables to walls and ladders in railway, motorway and underground tunnels. The RAW cable clamps include integrated spacer for the installation of cables directly on walls. Foreseen two versions with spacer 50 mm and 80 mm. The RAW cable clamps are designed to allow fast and easy installation of radiating cables. The RAW cable clamps are suitable for durable fastening of radiating cables also for installation in high speed railway tunnel applications (up to 350 km/h)\*.

\*Combined with MF and MFI Steel Anchors

### RAW Einteilige Schellen für abstrahlende Kabel

RAW-Schellen werden für die Verlegung von abstrahlenden Kabeln an Wänden in Tunneln und Tiefbauten von Eisenbahnen, Autobahnen und U-Bahnen verwendet. Die RAW-Schellen haben für die direkte Wandbefestigung des abstrahlenden Kabels einen integrierten Abstandhalter. Sie werden in den Versionen mit Abstandhalter von 50 mm und 80 mm angeboten. RAW-Kabel sind für eine einfache und schnelle Installation von abstrahlenden Kabeln entwickelt.

Sie sollen auch innerhalb von Tunneln für Hochgeschwindigkeitszügen (bis zu 350 km/h) eine haltbare Installation der abstrahlenden Kabel gewährleisten\*.

\*Zusammen mit Stahldübeln MF und MFI

## Monoblock Radiating Cable Clamps for Ladders

RADIATING CABLE FIXINGS  
PRODUCT CATALOGUE

### MATERIAL

<b>Body</b>	PA6V0 Self Extinguishing Halogen Free UL94 - V0
<b>Operating Temperature</b>	- 40°C + 125°C
<b>Colour</b>	Black

### RAW – APP

#### Monoblock Radiating Cable Clamps for Ladders

The RAW – APP cable clamps have been especially designed for quick installation of radiating cables on ladders, provided with rectangular slots 9x35 mm and 11x35 mm.

The RAW – APP cable clamps can be safely installed on metal ladders with thickness 1.25 – 1.5 mm, and include integrated spacer (80 mm).

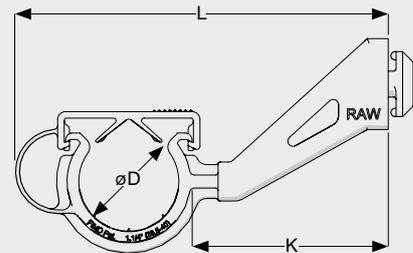

The RAW – APP cable clamps are designed to allow fast installation of radiating cables on ladders without need of tools. For installation insert the cable clamp in the rectangular slot on ladder and rotate till lock position.

To prevent cable lines from falling down, in case of fire, a RAW + RSD cable clamp can be installed among RAW – APP cable clamps, using metal screws and nuts, at a suitable distance of 5 – 10 m.

### RAW – APP

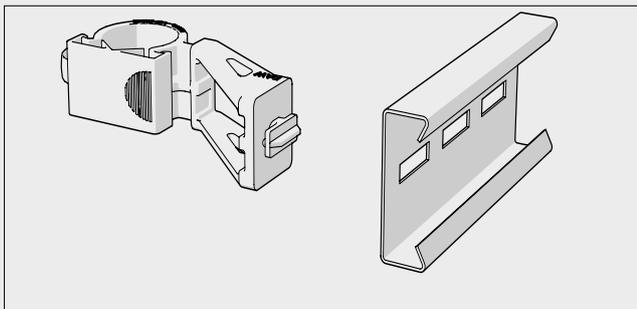

#### Monoblock-Kabelklemmen für abstrahlende Kabel auf Leitern

RAW - APP Kabelklemmen sind für die schnelle Installation von abstrahlenden Kabeln auf Leitern mit rechteckigen Fenstern 9x35 mm und 11x35 mm ausgelegt. Die RAW - APP Kabelklemmen können auf Metalleitern mit einer Stärke von 1,25 - 1,5 mm montiert werden und haben den 80 mm Abstandhalter integriert. Die RAW - APP Kabelklemmen sind für die schnelle Verbindung von abstrahlenden Kabeln auf Leitern ohne Verwendung von Werkzeugen konzipiert. Zur Installation führen Sie die Kabelklemme in das rechteckige Fenster auf der Leiter ein und drehen Sie sie in die Verriegelungsposition. Um das System im Brandfall gegen Absturz zu schützen, ist es möglich, ein RAW + RSD in geeigneten Abständen (5 - 10 m) mit Hilfe von Metallschrauben an den RAW - APP - Kabelklemmen zu installieren.

## Steel Anchors

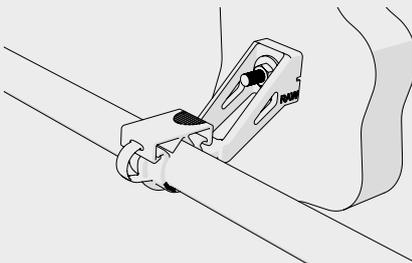

**MFI - AISI 304 Steel Anchor**  
**MF - Steel Anchor Galvanized Steel**

Fixing of radiating cable clamps on MEI brackets or directly to wall.  
Best for speedy mountings on concrete.

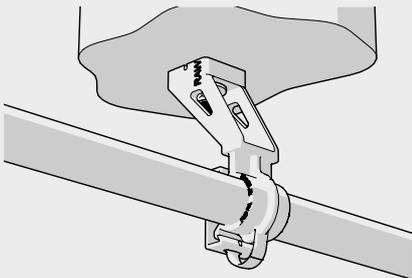

**MFI - Stahlanker AISI 304**  
**MF – Verzinkter Stahlanker**

*Befestigungselement für die Installation von Schellen für abstrahlende Kabel auf MEI-Abstandstücken oder direkt auf der Wand. Schnelle Verlegung, ideal für kompakte Materialien.*

## Radiating Cable Clamps for Ladders

RADIATING CABLE FIXINGS  
PRODUCT CATALOGUE

### MATERIAL

<b>Body</b>	PA6V0 Self Extinguishing Halogen Free UL94 - V0
<b>Operating Temperature</b>	- 40°C + 125°C
<b>Colour</b>	Black
<b>COL</b>	AISI 301 Stainless Steel

### RAX + COL

#### Radiating Cable Clamps for Ladders

The KIT RAX + COL cable clamps are used in tunnels to fasten radiating cables on specific sections (e. g. OEGLAND SYSTEM LOE – 55, LOE – 75, LOE – 100). The KIT RAX + COL cable clamps are designed to allow fast click-on ladder installation of cables without need of tools. The RAX monobloc cable clamps include integrated spacer (90 mm).

The COL clip-on ladder hanger is made with AISI 301 Stainless Steel for adaptive and tight fastening on cable ladders. Customized click-on hooks are available upon request.

### RAX + COL

#### Schellen für abstrahlende Kabel auf Kabel-Leitern

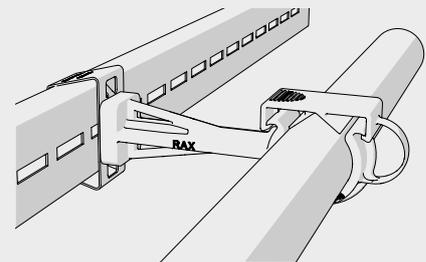

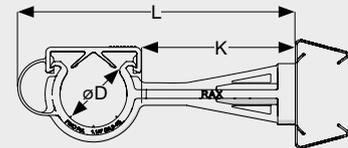

Die Schellen KIT RAX + COL werden in Tunneln zur Befestigung von abstrahlenden Kabeln auf spezifischen Abschnitten verwendet (z. B.: OEGLAND SYSTEM LOE – 55, LOE – 75, LOE – 100).

Die Schellen KIT RAX + COL wurden für eine schnelle Befestigung von abstrahlenden Kabeln auf Kabel-Leitern entwickelt, ohne die Verwendung von Werkzeug.

Die einteiligen RAX-Schellen haben einen Abstandhalter von 90 mm integriert.

Das Schnellbefestigungssystem COL aus Edelstahl AISI 301 für eine anpassbare und sichere Befestigung auf Kabel-Leitern.

Kundenspezifische Befestigungssysteme auf Wunsch.

# KIT SCC + COL

## Safety Collar for Radiating Cables on Ladders

MATERIAL	
SCC	AISI 301 Stainless Steel
MEI	AISI 304 Stainless Steel
COL	AISI 301 Stainless Steel

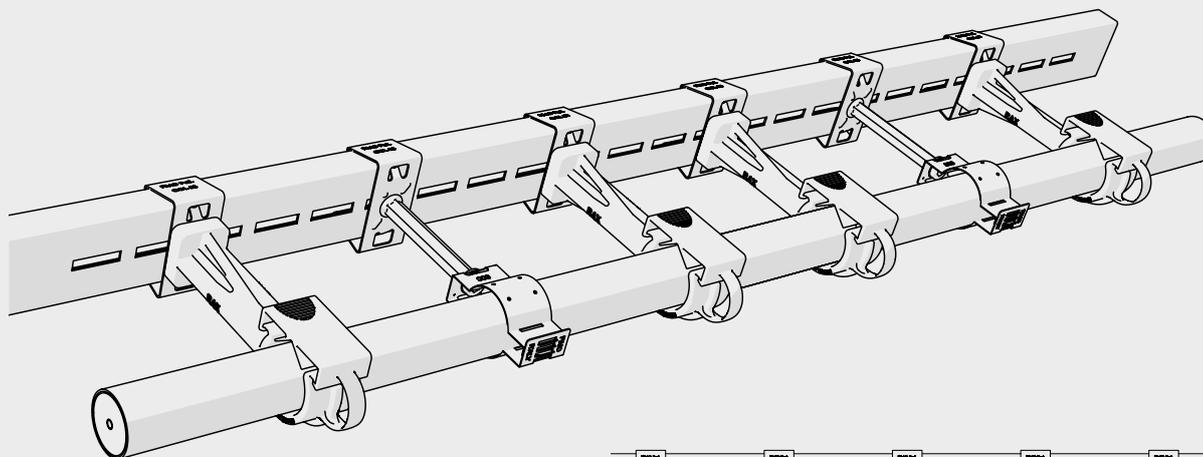

### KIT SCC + COL Safety Collar for Radiating Cables on Ladders

The KIT SCC + COL safety collar has been especially designed for quick installation of radiating cables on ladders. It is recommended in combination with KIT RAX + COL clamps for radiating cables. Whether inserted at a suitable distance (10 – 15 m) among KIT RAX + COL clamps, it prevents radiating cable lines from falling, in case of fire.

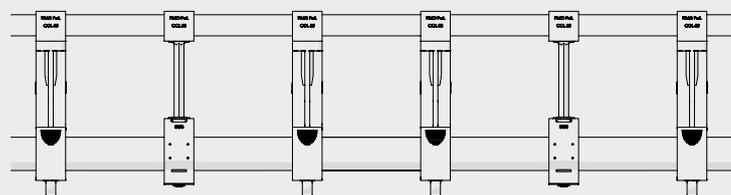

### KIT SCC + COL Sicherheitsschelle auf abstrahlenden Kabeln auf Kabel-Leitern

Die Sicherheitsschellen KIT SCC + COL sind für eine schnelle Installation von abstrahlenden Kabeln auf Kabel-Leitern entwickelt. Es wird eine Verwendung mit Schellen KIT RAX + COL empfohlen. Es wird eine Verlegung in angemessenen Abständen (10-15 m) zwischen den Schellen KIT RAX + COL empfohlen, um die Anlage im Brandfall vor einem Zusammenbruch zu schützen.

### RAR – No Tool Radiating Cable Clamps For Hanging on Stainless Steel/Synthetic Ropes

The RAR cable clamps are used in tunnels to hang radiating cables to either stainless steel or synthetic ropes.

The RAR cable clamps are designed to allow secure click-on installation of cables on hanging ropes without need of tools. Two independent housings, for cable and rope, provided with one cap each allow a fast installation without need of screws.

The RAR cable clamps are available for ropes 7 and 10 mm (other dimensions available upon request).

The RAR monobloc cable clamps include integrated spacer (40 mm).

### RAR – Kabelschellen für abstrahlende Kabel, Installation ohne Werkzeuge

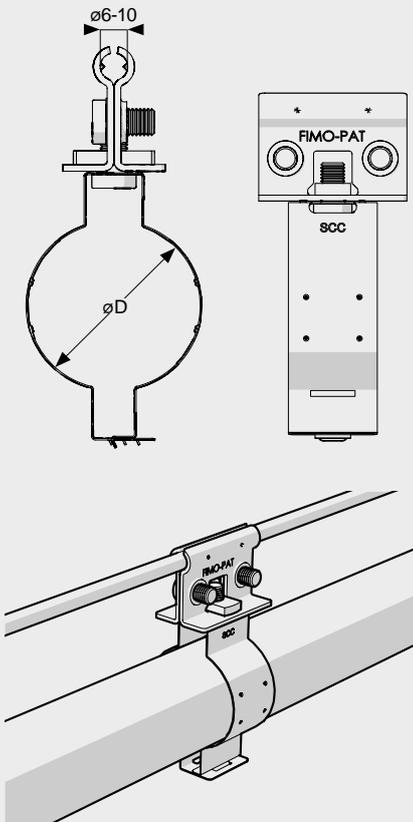

*Aufhängung auf Tragseilen aus Edelstahl/Synthetik*

*RAR-Schellen werden in Tunneln zur Aufhängung von abstrahlenden Kabeln an Tragseilen aus Edelstahl oder Synthetischematerial verwendet. Die RAR-Schellen wurden für eine sichere Befestigung von abstrahlenden Kabeln auf Tragseilen entwickelt, ohne die Verwendung von Werkzeug. Die beiden unabhängigen Sitze für das Kabel und das Seil, jeweils mit einer Abdeckung versehen, gestatten eine schnelle Installation ohne Schrauben. RAR-Schellen sind für Seile von 7 und 10 mm erhältlich (weitere Maße auf Anfrage). Die einteiligen RAR-Schellen haben einen Abstandhalter von 40 mm integriert.*

# KIT SCC + RAF8

## Safety Collar for Radiating Cables on Ropes

### MATERIAL

SCC	AISI 301 Stainless Steel
RAF8	AISI 304 Stainless Steel

### KIT SCC + RAF8

Safety Collar for Radiating Cables on Stainless Steel Ropes

The KIT SCC + RAF8 safety collar is used in tunnels to hang radiating cables to stainless steel ropes  $\varnothing 6 - 10$  mm.

It is recommended in combination with RAR clamps for radiating cables. Whether inserted at a suitable distance (10 - 15 m) among RAR cable clamps, it prevents radiating cable lines from falling down, in case of fire.

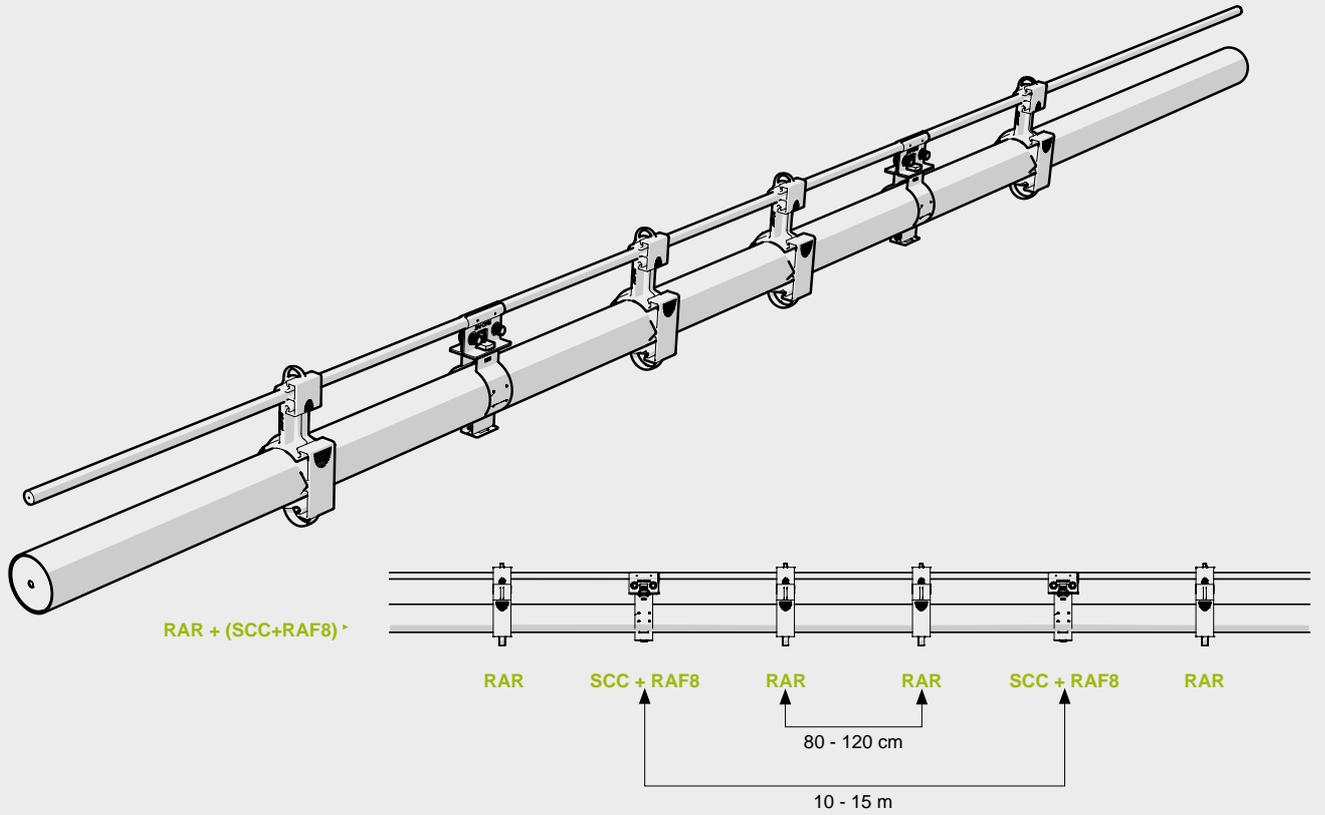

### KIT SCC + RAF8

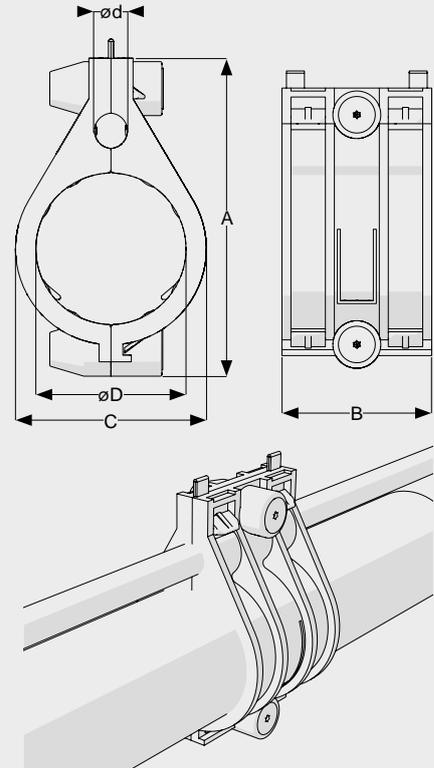

Sicherheitskragen für hängende abstrahlende Kabel an Edelstahlkabelträgern

Die KIT SCC + RAF8 Sicherheitskragen werden in Galerien für die Aufhängung von abstrahlenden Kabeln mit Stahlseilen  $\varnothing 6 - 10$  mm verwendet.

Es ist ratsam, es in Verbindung mit den Kabelklemmen für RAR abstrahlende Kabel zu verwenden. Die Verwendung wird in einem geeigneten Abstand (10 - 15 m) zwischen den Befestigungen mittels RAR-Kabelklemmen einzuschieben, um das System im Falle eines Feuers zu schützen.

**RAP - Radiating Cable Clamp**  
For Hangings on Steel/Synthetic Ropes

The **RAP** Clamp, consisting of two hinged shells, is used in tunnels to hang coaxial radiating cables to ropes made of either stainless steel or synthetic materials. It holds the coaxial cable without compressing nor deforming it.

Some small elastic snap-in hooks guarantee the closure as well as a quick pre-fixing around cable and rope.

Two screws assure the final fixing of RAP Clamp on cable and rope.

**RAP – Kabelhalter für abstrahlende Kabel**  
Aufhängung auf Trageilen aus Stahl/Synthetik

Der Kabelhalter **RAP**, aus zwei mit Scharnieren versehene Hälften verbunden, wird in Tunneln zur Aufhängung von abstrahlenden Koaxialkabeln mit Trageilen aus Edelstahl oder synthetischem Material verwendet. Das Koaxialkabel wird weder zusammengedrückt noch verformt. Elastische Haken gewährleisten den Schnappverschluss und die schnelle Vormontage um das Kabel und das Trageil herum. Zwei Schrauben gewährleisten die endgültige Befestigung des RAP auf dem Kabel und dem Trageil.

**Storage :** UEK M kit does not require a particular care in storing, apart from keeping it in its original packing, which protects it from water, grease and dust. Even extreme temperature conditions do not negatively affect the product.

### UGK - Monobloc Earthing Kit

For coaxial cables and elliptic or rectangular waveguides.  
Easy to handle, safe, quick to install.  
Complete with connecting cable.

### UGK – Monoblock-Erdungsgarnitur

*Für Koaxialkabel und elliptische und rechteckige Wellenleiter.  
Einfach, sicher, schnell.  
Komplett mit Anschlusskabel.*

# Wall Entries & Cushions

Product Catalogue

# Wall Entries

Wall entries, waterproof and fire resistant, for coaxial cables, waveguides, optical fibers, power cables and any type of pipes. FIMO's wall entries are suitable for installations in the telecommunication industry as well as in the shipyards, constructions, oil&gas, offshore, aeolian industry and in all industrial infrastructures.

*Wasserdichte und feuerfeste Wanddurchführungen für Koaxialkabel, Wellenleiter, optische Faserkabel, Leistungskabel und Verlegerohre im Allgemeinen. Wanddurchführungen von FIMO eignen sich für die Installation in den Bereichen der Telekommunikation, Schiffsindustrie, Baugewerbe, Oil&Gas, Offshore-Plattformen, Windkraftenergie und Infrastrukturen im Allgemeinen.*

### PMR - Rectangular Wall Entry

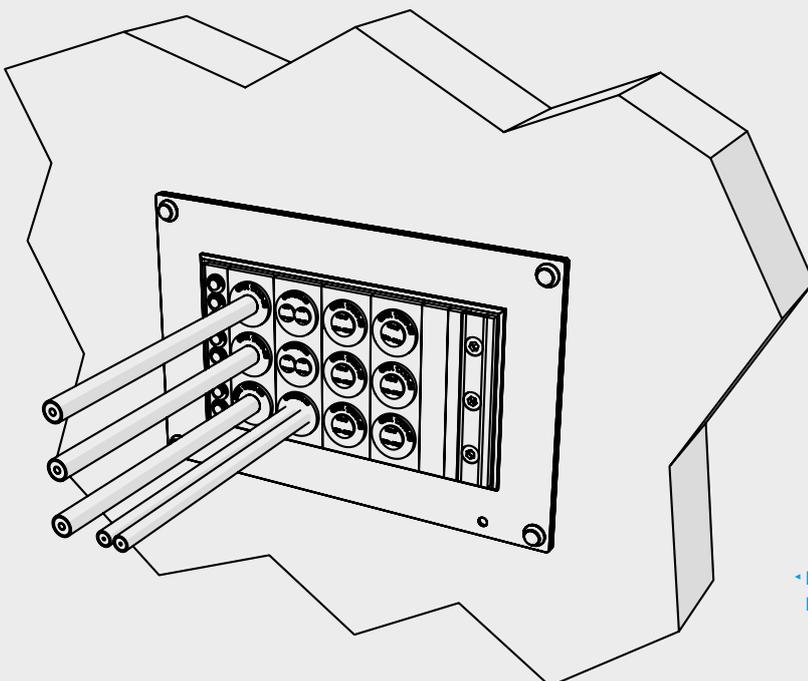

- For a tight sealing of cables
- For rectangular openings in masonry or shelters
- Compact outer dimensions
- Large choice of combinable cushions
- Simple and quick installation procedure
- Rapid sealing, with 3 screws only

### PMR – Rechteckige Wanddurchführung

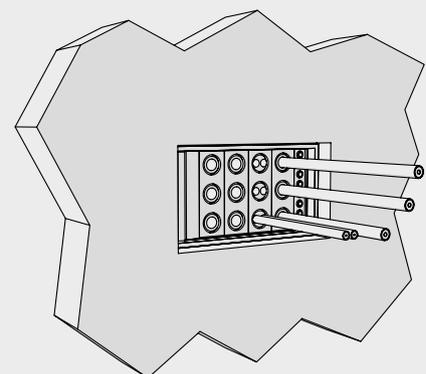

- *Abdichtung für Kabeldurchführungen*
- *Rechteckige Öffnung in Wänden und Paneelen*
- *Kompakte Außenmaße*
- *Große Auswahl von kombinierbaren Dichtungen*
- *Besonders montagefreundlich*
- *Schnelle Abdichtung mittels nur 3 Schrauben*

PMR Kit Example Components

**DESCRIPTION**

1. AISI 304 stainless steel Frame
2. Black EPDM Body of Wall Entry
3. Internal AISI 304 stainless steel Collar
4. EPDM black rectangular Cushions - **GPR**
5. EPDM black round Reductions - **GRR**
6. Blind Cushion - **GTR**
7. Tightening Expander - **GPE 20**

**BESCHREIBUNG**

1. Äußerer Stahlrahmen AISI 304
2. Durchführung Körper EPDM schwarz
3. Innerer Stahl-Kragen AISI 304
4. Rechteckige EPDM-Dichtung schwarz - **GPR**
5. Runde Reduzierdichtungen EPDM schwarz - **GRR**
6. Stopfen EPDM schwarz - **GTR**
7. Dichtungselement - **GPE 20**

## Empty Frames

### PMR - Basic Built-in Frame Empty, closed by removable membrane

The rectangular built-in Frame, is joined to an EPDM rubber gasket, temporarily closed by a removable sheet.

Its window is suitable to house rectangular GPR cushions with round passages of different diameters.

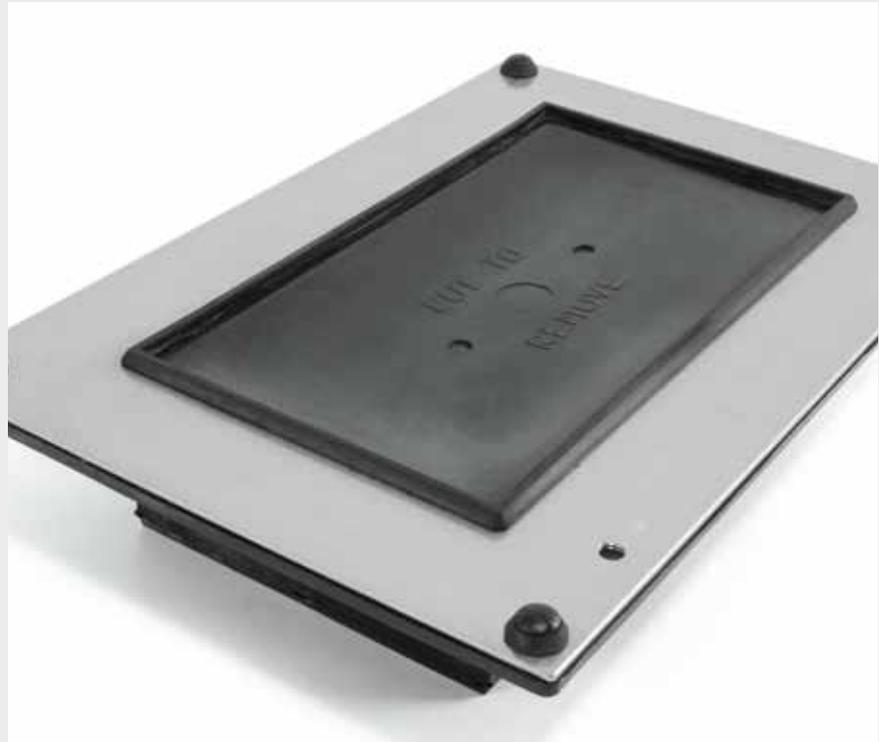

Round GRR and GRE reductions with GTR round plugs, fit in the passages. The GPE mechanical expander efforts the final tightening of the system.

### PMR – Basis-Einbaurahmen Leer, durch Membran verschlossen

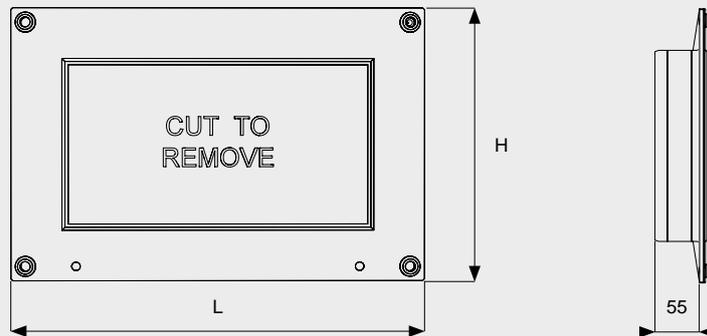

Der rechteckige Stahl-Einbaurahmen ist mit einer EPDM-Dichtung verbunden.

Diese ist mit einer leicht trennbaren Membran verschlossen.

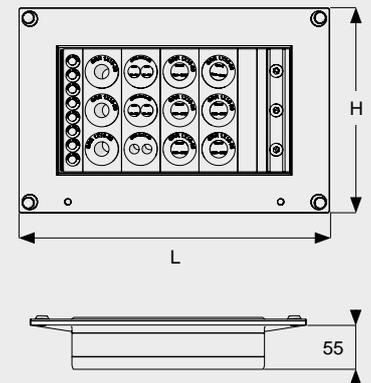

Rechteckige GPR-Dichtungen werden formschlüssig darin aufgenommen. Runde GRR und GRE Reduzierdichtungen, mit GTR Stopfen, passen dazu. Der vorgesehene GPE Spreizkörper ermöglicht die endgültige Abdichtung.

# PTR 200/185 RO

## Wall Entries

### PTR 200/185 RO - Waterproof Wall Entry

The central 185 Ø opening is temporarily sealed with an easily removable rubber sheet. The opening is conceived to host broadcasting cables and big diameter pipes, as well as different diameters, thanks to the use of **GRR** round reduction cushions.

The final sealing is ensured by tightening the hose clamp.

### PTR 200/185 RO – Wasserdichte Wanddurchführung

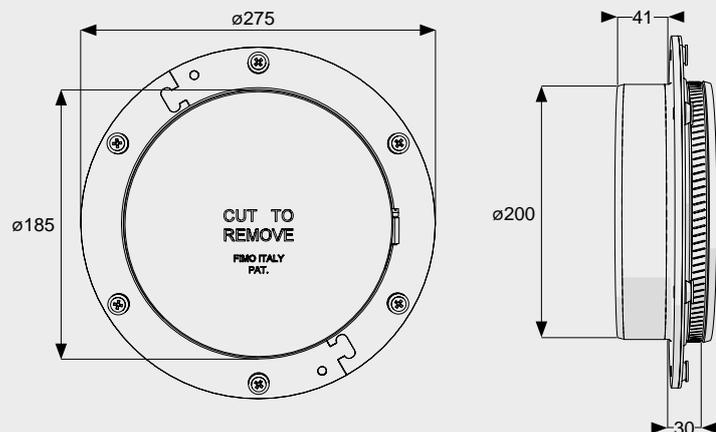

Die Öffnung Ø 185 ist werkseitig mit einer leicht trennbaren Gummimembran verschlossen und ist für den Durchgang von großen Kabeln mittels Reduzierdichtungen der Serie **GRR** geeignet.

Die endgültige Abdichtung erfolgt mittels Schlauchklemme.

# GPT · GPE

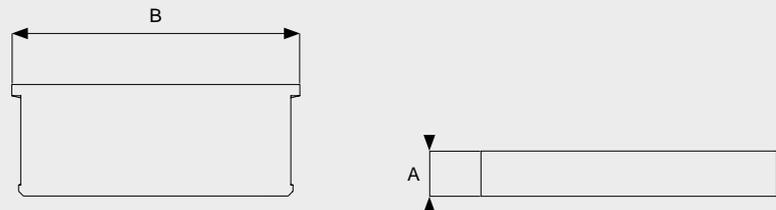

## Rectangular Cushions

### GPT - Rectangular Blind Cushions

Rectangular cushions to complete the configuration of the **PMR** and **COR** wall entry, after the **GPR** cushions introduction.

#### GPT – Rechteckige Dichtungsblöcke

Rechteckige Einbaudichtung für **PMR** und **COR** zum Ausgleichen von Lücken bei bereits eingebauten Kabeldichtungen **GPR**.

MATERIAL	
Black EPDM, U.V. Resistant	

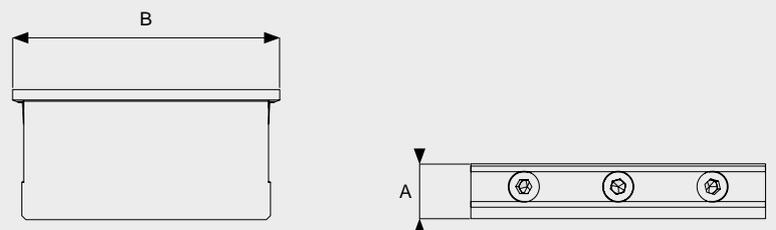

FIGURE	CODE	ARTICLE	A	B	BAG	BOX	WEIGHT

	61 0120 0020	GPT 20	20	120	10	50	140

### GPE 20 - Tightening Expander

Consisting of an external rubber body extendable by means of the wedge expander. Only three M8 screws, to seal the **PMR** and **COR** wall entry, after the insertion of **GPR** cushions and cables.

#### GPE 20 - Dichtungselement

Gummikörper mit eingebautem keilförmigen Spreizkörper der mittels drei M8 Schrauben aufgeweitet wird. Die Abdichtung der Durchführungen **PMR** und **COR** erfolgt nach dem Einbau der **GPR** Dichtungen und Kabel.

MATERIAL	
<b>Cushions</b>	Black EPDM U.V. Resistant
<b>Metal Wedge</b>	Black ZAMAK
<b>M8 screws</b>	AISI 304 Stainless Steel

### PPS - Wall Entry

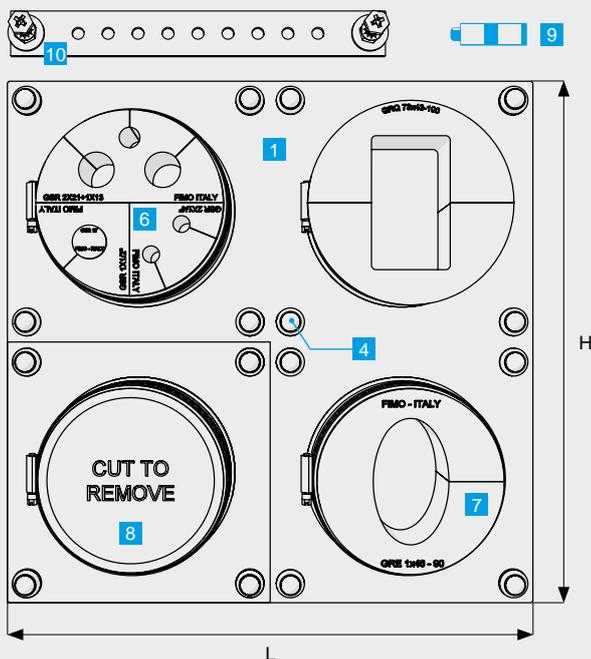

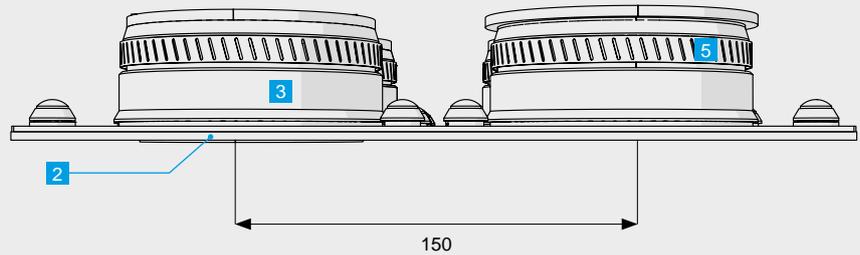

Passing through Ø 40, 62, 90, for any kind of cable.  
Easy and quick sealing with hose clamp.  
Easy and quick installation.  
Fixings accessories included.  
Round and sectorial cushions available.  
Grounding bar on request.

### PPS - Wanddurchführung

Durchgänge Ø 40, 62, 90 für alle Kabeltypen  
Schnelle Abdichtung mittels Schlauchklemme Besonders montagefreundlich.  
Komplett mit Befestigungszubehör  
Große Auswahl von zylinderförmigen und Sektorialdichtungen  
Equipotentialschiene nach Wunsch

### CERTIFICATION

Waterproof	IEC 60529 IP67
Fire Resistance	REI 120
Fire Resistance	EN 1366-3:2009

### DESCRIPTION

1. AISI 304 Stainless Steel Plate
2. Black EPDM Gasket
3. Elastic Collar
4. Removable Plastic Pin
5. Hose Clamp AISI 304 for Collar (**FAS**)
6. Sectorial Cushions (**GSR** and **GST**)
7. Round Cushions (**GRE**)
8. Removable Protective Film
9. Silicon Lubricant (**LUS**)
10. Grounding Bar on request (**BEI - BEC - BES**)

### BESCHREIBUNG

1. Stahlplatte AISI 304 (V2A)
2. Dichtung EPDM schwarz
3. Elastischer Kragen
4. Kunststoff-Haltestift
5. Schlauchklemme AISI 304 (**FAS**)
6. Sektorialdichtungen (**GSR** und **GST**)
7. Reduzierdichtungen (**GRE**)
8. Trennbare Verschlussmembran
9. Silikon Gleitmittel (**LUS**)
10. Equipotentialschiene (**BEI - BEC - BES**) auf Wunsch

## Cap Wall Entries

### PGA 4/90 and PGA 5/90 - Cap Wall Entry

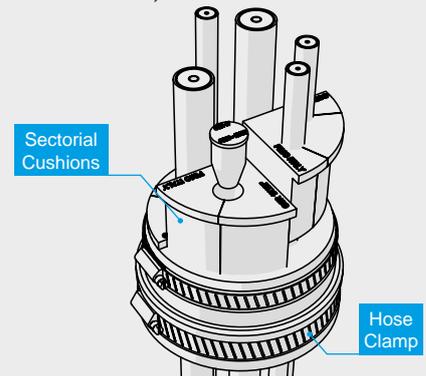

Waterproof gasket to seal passages of cables, even on installed ones.  
Easy sealing by means of two hose clamps.  
Combinable with **GSR, GSE, GST FIMO®** sectorial cushions.

- **PGA 4/90** for Steel Plate with collar diam. 4" and diam. 4" tube (103 ÷ 105 mm)
- **PGA 5/90** for Steel Plate with collar diam. 5" and diam. 5" tube (128 ÷ 130 mm)

### PGA 4/90 und PGA 5/90 Haube Wanddurchführung

Verschlussdichtung für Kabeldurchführungen  
Einfacher Verschluss mittels zwei Schlauchklemmen Einsetzbar auch bei bereits verlegten Kabeln. Kombinierbar mit Sektorialdichtungen FIMO® **GSR, GSE, GST**.

- **PGA 4/90** für Stahlplatte mit Kragen Durchm. 4" und Rohre Durchm. 4" (mm 103 ÷ 105)
- **PGA 5/90** für Stahlplatte mit Kragen Durchm. 5" und Rohre Durchm. 5" (mm 128 ÷ 130)

# Cushions for Cable Clamps & Collars

Cushions for Cable Clamps and Collars  
FIMO cushions are suitable for reducing hole diameter of saddles, collars and cable clamps to allow the fixing of a wider range of cables.

*Dichtungen für Kabelklemmen und -ringe. FIMO-Dichtungen eignen sich zur Reduzierung des Durchmessers der Sitze, Manschetten und Kabelklemmen, um eine größere Auswahl an Kabeln zu ermöglichen*

### GRR - Round Cushions for Cable Clamps

For FIMO cable clamps and round collars.

### GRR – Runde Reduzierdichtungen

Mit rundem Innenprofil für FIMO Wanddurchführungen und verschiedenen Kabelschellen.

# Accessories for Installation

Accessories for Installation. FIMO accessories for installation are the completion of the range of products offered for fastening, grounding and sealing cables and pipes.

*Montagezubehör. Das Montagezubehör von FIMO rundet das Sortiment der angebotenen Produkte für die Befestigung, Erdung und Versiegelung von Kabeln oder Verlegerohren ab.*

# PCI B

## 3-Sided Punched Cut Down Size Section

### PCI B - Punched Cut Down Size Sections

Stainless steel section 40x22x1,5  
Holes 8,5x11 on base and sides.

### PCI B – 3-Seitig Gelochte Profilabschnitte

Stahlprofil 40x22x1,5  
Langlöcher 8,5x11 unten und seitlich.

#### MATERIAL

## Self-agglomerating Tapes

### NEP - Self-Agglomerating Tape For Tightening and Insulating

**Description:**

Self-agglomerating Ethylenpropylen (EPR) Rubber, non adhesive, Highly elastic (1000%), not hardening. Waterproof. insulating (35 kV/mm), U.V. resistant. Temperature range -40°/ +70°C. Packed in rolls with protective film.

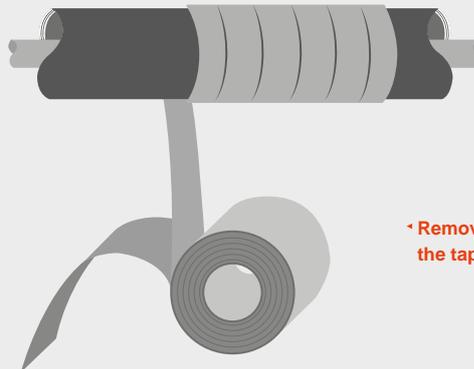

### NEP – Selbstverschweißende Wickelbinde Zum Abdichten und Isolieren

**Eigenschaften:**

Selbstverschweißendes Äthylen-Propylen (EPR), nicht klebend. Hochelastisch (1000%), nicht aushärtend. Wasserdicht, isolierend (35kV/mm), U.V.-Beständig. Temperaturbeständigkeit -40°/+ 70°C. Verpackt in Rollen mit Schutzfolie.

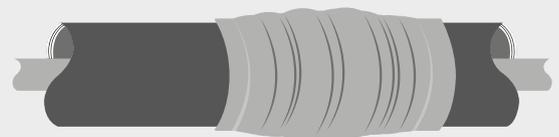

<b>MATERIAL</b>
EPR

\* Remove protective film and wrap the tape, pulling it strongly.

\* The operation is completed. Bandage is waterproof.

CODE	ARTICLE	MEASURE	LENGHT	BAG	BOX	WEIGHT
61 2100 1975	NEP 19	19x0.75	10 m	1	10	170
61 2100 3875	NEP 38	38x0.75	10 m	1	10	340

### TECHNICAL FEATURES

<b>Temperature Resistance</b>	-50° + 150°
<b>UV Resistance</b>	U.V. Resistant
<b>Hardness</b>	60/65 Shore A (ASTM D 2240)
<b>Tensile Strength</b>	45 Kg/cm <sup>2</sup> (ASTM D 412)
<b>Elongation</b>	350% (ASTM D 412)
<b>Brittleness Point</b>	-50°C (ASTM D 2137)
<b>Dielectric Strength</b>	2700V/0.1mm (ASTM D 149)

### NAS

Self-agglomerating Silicone Tape Protecting, Insulating and Waterproof

1. Self agglomerating silicone tape.
2. Removable PET protection film.
3. Mid line wrapping reference.

The self-agglomerating NAS silicone rubber tape, is ideal to insulate, seal and protect various objects (not only metal ones). It can be used under extreme temperature conditions, (-50°C,+150°C). NAS tape is non adhesive, and may be used on both sides. Tightly wrapped around the object, it doesn't unwind, thanks to its outstanding elasticity.

The single tape layers merge progressively within 24hours.

An immediate excellent waterproofing, as well as mechanical protection and electrical insulation is however guaranteed.

NAS is not subject to aging, is UV rays proof and does not harden.

NAS stands up to 350% elongation, assuring high performances even on complex shape objects. The mean line represents a useful reference to make a correct tape wrapping superimposition easier.

Remove the protective film just on the application time, avoiding moisture, dirt, dust and grease contamination. NAS tape is to be kept in its protective plastic bag.

### NAS

Selbstverschweißende Silikonbinde zum Schützen, Isolieren und Abdichten

1. Selbstverschweißende Silikonwickelbinde.
2. Entfernbare PET-Schutzfolie.
3. Mittiger Orientierungsstreifen zur korrekten Überlappung.

Die selbstverschweißende Silikon-Wickelbinde NAS ist hervorragend geeignet für Schutz, Versiegelung, Isolierung und Abdichtung an metallischen Teilen und anderen Materialien.

Dieses hochwertige Band ist unter extremen Temperaturbedingungen (-50°C +150°C) verwendbar.

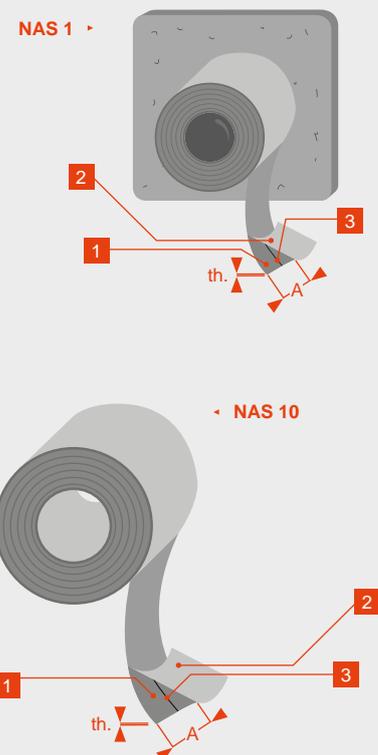

Es besitzt keine Klebeschicht und kann beidseitig verwendet werden.

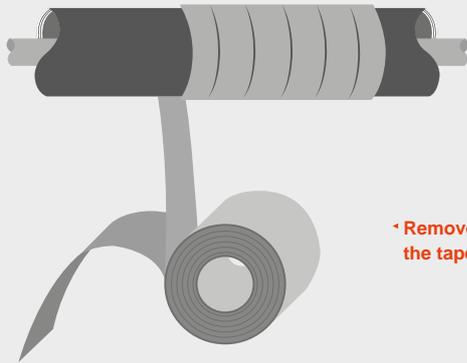

Die Haftung wird dank hoher Elastizität unter starkem Zug erreicht, sodass bereits direkt nach der Verarbeitung eine sichere Abdichtung erfolgt ist.

Die einzelnen Lagen verschweißen sich nach und nach zu einem Block. Bereits nach etwa 24 Stunden ist dieses spürbar.

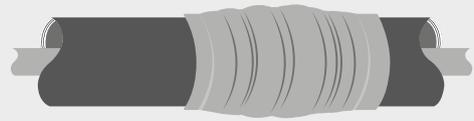

Der weitere Verschweißungsvorgang kann mehrere Tage dauern. NAS besitzt höchste Alterungs- und UV- Beständigkeit, ist hochelastisch, lässt sich um ca. 350% dehnen und passt sich ideal Unebenheiten an. Es ist nicht aushärtend.

Der mittige Orientierungsstreifen hilft bei der Verarbeitung für eine korrekte Überlappung. Die Schutzfolie ist zu entfernen. Wasser, Fett sowie Staub und Dreck sollten bei der Verarbeitung möglichst nicht auf die Bandfläche gelangen. Die NAS-Binde soll im Kunststoffbeutel aufbewahrt werden.

Remove protective film and wrap the tape, pulling it strongly.

The operation is completed. Bandage is waterproof.

## Connectors Weatherproofing Kit

### WPK - Connectors Weatherproofing Kit For Feeder Cables and Jumpers

FIMO WPK weatherproofing kit provides a reliable sealing of cable connections exposed to the outside environment.

FIMO WPK weatherproofing kit contains:

- 2 rolls of 19 mm x 20 m black PVC tape
- 1 roll of 50 mm x 8 m black PVC tape
- 3 or 6 rolls of 50 mm x 600 mm butyl-rubber tape

This kit provides an efficient moisture block and connector's protection against pollution and dust. It also prevents disconnection of connectors caused by vibrations during wind exposition.

The kit protects cable's outer jacket and connectors that are directly buried or exposed to severe environmental conditions.

FIMO WPK weatherproofing kit is recommended in applications:

- Jumper to Antenna
- Jumper to Feeder Cable

#### FEATURES & BENEFITS

- Simple installation
- No heat or tools required for installation
- Compatible with any connector and cable
- High protection against moisture and dirt
- No loosening of connections

### WPK – Wetterschutz-Kit für Stecker Für Koaxialkabel und Jumper

*Der WPK-Wetterschutz-Kit garantiert eine Abdichtung von der Witterung ausgesetzten Steckern.*

*Der WPK-Wetterschutz-Kit FIMO enthält:*

- 2 Rollen schwarzes PVC-Band 19 mm x 25 m
- 1 Rolle schwarzes PVC-Band 50 mm x 8 m
- 3 oder 6 Rollen 50 mm x 600 mm Butylband

*Der Kit gewährleistet eine geeignete Abdichtung gegen Feuchtigkeit und schützt die Stecker gegen Verschmutzungen und Staub. Ferner verhindert er die Trennung der Stecker, verursacht durch die vom Wind ausgelösten Vibrationen. Er schützt die Außenhülle des Kabels und die direkt erdverlegten oder ausgesetzten Stecker vor schweren Umwelteinflüssen.*

*FIMO empfiehlt die Verwendung des WPK Wetterschutz-Kits bei Anschlüssen:*

- vom Jumper zur Antenne
- vom Jumper zum Koaxialkabel

#### ANGABEN und VORTEILE

- Einfache Montage
- Benötigt für die Montage weder Werkzeuge noch eine Erhitzung durch Flamme
- Mit allen Steckern und Kabeln kompatibel
- Hoher Schutz gegen Feuchtigkeit und Schmutz
- Keine Abtrennungen des Steckers

### WPE- Waterproofing Enclosure For Coaxial Cable Applications

The WPE is a gel closure sealing system that provides a reliable sealing of coaxial connectors used at the transition between:

- JUMPER and ANTENNA
- JUMPER and FEEDER CABLE exposed to the outside environment.

The housing contains an innovative gel material and provides an efficient moisture block. The ease of installation and long-term protection makes it reliable and cost effective solution.

### FEATURES & BENEFITS

- Quick and Easy installation
- No need special training
- Easy removable and reusable
- Wraparound and no disconnection of the connector
- No tape, no mastics or tools required for installation and removal

**Operating temperature range:** -40 C° / +65 C°  
**Storage temperature range:** -40 C° / +65 C°

### WPE- Abdichtungssystem für Stecker Für Anwendungen mit Koaxialkabeln

Die WPE sind Gel-Abdichtungen, die eine vollständige Abdichtung der Stecker in folgenden Anschlüssen gewährleisten:

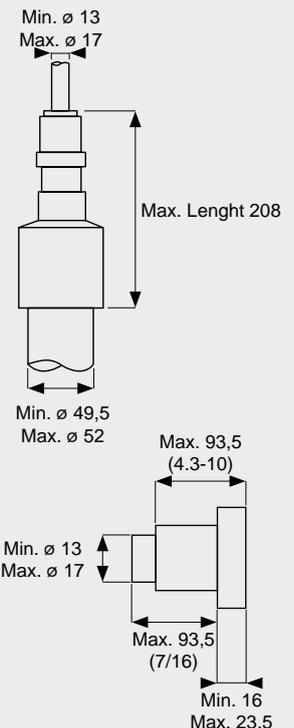

- JUMPER und ANTENNE
- JUMPER und KOAXIALKABEL die der Witterung ausgesetzt sind.

Das Plastikgehäuse enthält ein innovatives Gel, das angebracht gegen Feuchtigkeit schützt. Die Montagefreundlichkeit und ein langfristiger Schutz machen das WPE zu einer zuverlässigen und vorteilhaften Lösung.

### ANGABEN & VORTEILE

- Besonders montagefreundlich.
- Keine spezielle Ausbildung erforderlich
- Leicht abnehmbar und wiederverwendbar
- Vollständiger Schutz ohne die Gefahr von Abtrennungen des Steckers
- Für den Ein- oder Ausbau sind keine Bänder, Kitt oder Werkzeuge erforderlich

**Temperaturbeständigkeit:** -40 C° / +65 C°  
**Aufbewahrungstemperatur:** -40 C° / +65 C°

\* TEF 1.5/8": EPDM RUBBER

#### TEF - Cold Shrink Tube

TEF cold shrink tubes are a series of open-ended tubular silicone/EPDM rubber sleeves, pre-expanded on a removable core for easy installation. After the core is removed, the tube shrinks to its original diameter guaranteeing a perfect sealing on connectors. In applications where the different cable diameter cannot be covered with the tube range, a special cushion is included in the package. The rubber cushion is used to increase the smaller cable diameter and assure the sealing of the cold shrink tube.

#### Application

Sealing of feeder connections. TEF offers a timesaving and easy way to secure a waterproof protection. No tools or heating are requested for installation. The shrinking process is done by simply unwinding the removable core.

#### TEF – Kälteschrumpfende Hülsen

Die kälteschrumpfenden Hülsen TEF sind eine Serie von Muffen aus Silikon/EPDM, an den Enden offen, und für eine leichte Montage auf einen entfernbaren Zylinder vorgedehnt. Der Zylinder wird anschließend entfernt, die Muffe schrumpft bis auf ihren ursprünglichen Durchmesser und garantiert dadurch die perfekte Abdichtung der Stecker. Bei Anwendungen, in denen der Unterschied der Kabeldurchmesser nicht von der Spannweite der Muffe abgedeckt werden kann, ist ein besonderes Band aus Moosgummi im Lieferumfang enthalten. Das Moosgummi-Band wird verwendet, um den kleineren Kabeldurchmesser zu vergrößern und die Abdichtung der kälteschrumpfenden Hülse zu garantieren.

#### Anwendungen:

Abdichtung von Anschlüssen. Die TEF bieten eine schnelle und sichere Lösung für einen hermetischen Schutz. Für die Montage sind weder Werkzeuge noch eine Erhitzung durch Flamm erforderlich. Die Schrumpfung erfolgt ganz einfach durch Entrollen des entfernbaren Zylinders.

\*\*For smaller diameter cables, use the included round rubber cushion

## Heat-shrinking Tubes

### MWT - Heat-shrinking Tubes For the Protection of Cable Joints

Applied through heating with open flame or hot air generator. Excellent protection of cables against humidity.

### MWT - Wärmeschrumpfende Hülsen für den Schutz von Steckverbindungen

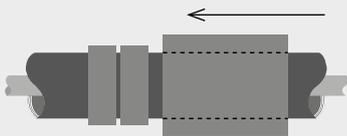

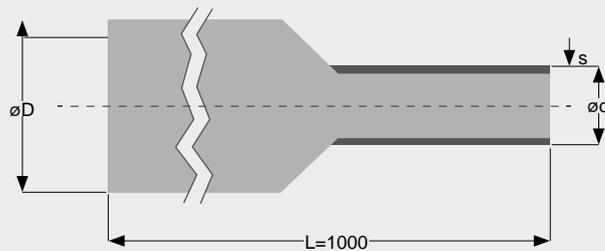

Wird mittels freier Flamme oder heißer Luft auf das Kabel aufgeschrumpft und versiegelt. Ausgezeichneter Feuchtigkeitsschutz der Kabel.

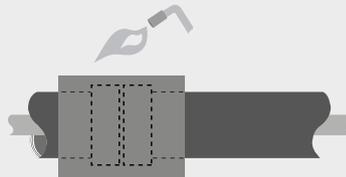

#### MATERIAL

Reticulated Polyolefine

Internal Thermo-Sensitive Adhesive

Cut off a section,  
slide on cable and set it in position

Heat the section

Cover is waterproof when  
the operation is completed.

## **GENERAL INFORMATION**

### **Products developments and improvements**

Figures, drawings, dimensions and technical information included in our catalogue are valid at the time of printing.

The continuous technical evolution may require developments intended to improve the product.

Fi.Mo.Tec S.p.A. reserves the right to modify the technical specifications without prior notice, according to the technological progress.

Possible misprints will in no case lead to disputes for incidental damage caused to persons or things.
