ABOUT FIMO®

Our Vision, Our Mission, Our Values

KNOW-HOW AND MODERNITY

In a constantly evolving market, such as Telecommunications, FIMO® Group is committed to always provide customers with “on purpose” studied, designed and manufactured components. All FIMO® solutions, aimed at solving any possible installation problem, are fully supported by a continuous efforts and investment into research and development, technology innovation, manufacturing process optimization and excellence in execution.

With over 80 years of history and experience, a significant geographical presence, the Group is strongly positioned at the high-tech end of the telecom accessories sector.

FIMO® has solid technical and ethical foundations and his business approach is a perfect blend of technical know-how and managerial modern vision.

OUR VISION, OUR MISSION, OUR VALUES

The FIMO® Group's vision and mission provide the fundamental engine of our daily engagement. Our values drive our commitment to customers and work.

Our vision

We are convinced that the development of telecommunications is a cornerstone for the

evolution of modern society. We believe in creating value through significant products and services in the telecommunications sector. And we do so in light not only of efficiency, but also of sustainability and ethics.

Our mission

We work in such a way as to establish an essential partnership with our customers. This is why we let ourselves be guided by research and innovation, which drive us to optimise our production processes and ensure improved levels of technology and performance.

Our values

Reliability – our teams are able to combine engineering knowledge, design and experience in the field to ensure the highest quality results.

Innovation – for more than 80 years, our constant drive to evolve and to evolve the market has been a fundamental part of our DNA.

Speed – we act quickly and effectively to reach the excellence. Communication is the main pillar of our process: we reach outstanding results starting from listening and understanding customer needs.

OUR CUSTOMERS ... OUR FOCUS

FIMO has established strong relationships with the major players in the Telecommunication industry thanks to a unique understanding capability of their primary needs. Customer centricity, guaranteed by ensuring that customers are always at the centre of FIMO business's philosophy, operations and ideas, is a constant behaviour of the Group and is reflected from product design through to delivery, and provision of a constantly monitored level of service.

SUPPORTING THE SUSTAINABLE DEVELOPMENT OF THE WORLD'S TELECOM INFRASTRUCTURE

The FIMO® Group's solutions are designed to support the development of the world's telecoms infrastructure. Supporting the infrastructures of many of the world's leading telecoms operators, the FIMO® Group delivers solutions that help link communications to communities around the globe.

Our business is made up of three business units – Components, Concealing and Subsystems.

Components

Any kind of cable clamps and fixing devices, weatherproofing kits, grounding kits, wall entries and other components repre-

sents one of the widest offer of these products to the market, delivered through a state-of-the-art supply chain. FIMO® offers a comprehensive range of products, services and the knowledge required to meet the increasing demands of our customers in terms of quality, efficiency and cost-effectiveness.

Concealing

Rooftop solutions, fake trees, architectural solutions, all of them perfectly integrated with the surrounding environment.

FIMO® group provides to its customers these top quality solutions combined with an end-to-end support, going from listening to customer needs, to designing a tailor made solution, to support him until the installation.

Subsystems

FIMO® Group provides small cells and DAS solutions, cabinet, energy saving cabinets, boxes, harnesses, and whatever is needed to smartly connect the different parts of telecom installation.

An unbeatable supply chain together with the capability to design tailor made solution made FIMO® group solution the best choice for telecom players for what concerns interconnection bespoke devices.

OUR PEOPLE ... OUR STRENGTH

FIMO strongly relies on the expertise of its people to provide valuable solutions and services to all major customers involved in projects on every continent.

Our people are our most valuable asset and we are continuously investing in their capabilities, training and expectations. We strongly support the value of teamwork and we consider the quality of our human resource management as fundamental to the success of our business.

Cable Clamps

Product Catalogue

Cable Clamps

Cable clamps for coaxial, fiber optic and power cables. FIMO cable clamps are suitable for a quick, safe and secure installation of cables and pipes on any kind of support.

Fissacavi per cavi coassiali, fibra ottica e energia. I fissacavi FIMO sono adatti per l'installazione rapida e sicura di cavi o tubi su qualsiasi tipo di struttura.

sRF - Self-locking Cable Clamps
Secure and Safe Locking

Self-locking sRF fasteners are the optimal solution for an easy and quick fastening to various supports of: coaxial cables, wave guides and fiber optic cables.

The cables are firmly secured, without danger of deformation, by calibrated saddles which hold them without crushing. The installer can visually control the pressure exerted by the screw (pat.). Between 1 and 12 cables can be fastened with the same clamp. The calibrated saddles, secured by a clip, can be inserted either frontally or laterally in the bow.

Main features:

- simple and strong structure
- secured components with easy mounting
- selected high quality materials
- resistance to atmospheric factors (U.V. rays, salty air, a.s.o.)
- high resistance to temperature variations (from -30°C to +120°C)
- absolute safety for cables and installers
- easy and quick installation

sRF - Fissacavi Autobloccanti
A Bloccaggio Sicuro Antisfondamento

I fissacavi autobloccanti della serie sRF sono la soluzione ottimale per un fissaggio comodo e rapido a strutture varie di: cavi coassiali, guide d'onda e cavi a fibre ottiche. I cavi vengono bloccati saldamente, senza pericolo di deformazione, da selle calibrate che li trattengono senza schiacciarli. L'installatore controlla visivamente la pressione esercitata dalla vite (brev.). Possono essere posati da 1 a 12 cavi per morsetto. Le selle calibrate, rese impermeabili da una clip, possono essere inserite a piacere frontalmente o lateralmente nel cavallotto.

Caratteristiche principali:

- struttura semplice e robusta
- componenti impermeabili e di uso comodo
- materiale selezionato di elevata qualità
- resistenza agli Agenti atmosferici (U.V., salini ecc.)
- resistenza agli sbalzi termici (-30°C a +120°C)
- sicurezza per i cavi e per l'installatore
- facilità e rapidità di posa

SAS · SAT

Saddles

CABLE CLAMPS
PRODUCT CATALOGUE

SAS - Single Calibrated Saddles SAT - Twin Calibrated Saddles

The SAS and SAT saddles are supplied with the sRF cable clamps and RF Q collars. The internal indentation allows gripping on the cable without compressing nor deforming it. The closure of the cables is calibrated.

SAS - Selle Calibrate Singole SAT - Selle Calibrate Gemellate

Le selle SAS e SAT sono fornite con i morsetti sRF e i collari RF Q. Grazie alla dentellatura speciale interna fanno presa sul cavo coassiale senzaprimerlo né deformato. La chiusura di due selle abbinata è calibrata sui diametri dei cavi coassiali.

SRF A4

Cable Clamps

CABLE CLAMPS
PRODUCT CATALOGUE

sRF A4 - Self-Locking Cable Clamps

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.
Hooking on 40x40 mm angular

sRF A4 - Fissacavi Autobloccanti

Completi di Selle Calibrate

Per 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 cavi coassiali sRF.
Con l'impiego di guarnizioni elastiche **GRE-GRR-GRQ** permettono il fissaggio di guide d'onda.
Aggancio ad angolare 40x40 mm

MATERIAL

Metal Parts	AISI 304 Stainless Steel
Saddles	Fiberglass P.A. U.V. Resistant Halogen Free
Colour	Black (Grey On Request)

SRF A5

Cable Clamps

CABLE CLAMPS
PRODUCT CATALOGUE

sRF A5 - Self-Locking Cable Clamps

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.
Hooking on 50x50 mm angular

sRF A5 - Fissacavi Autobloccanti

Completi di Selle Calibratee

Per 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 cavi coassiali sRF.
Con l'impiego di guarnizioni elastiche **GRE-GRR-GRQ** permettono il fissaggio di guide d'onda.

Aggancio ad angolare 50x50 mm

MATERIAL

Metal Parts	AISI 304 Stainless Steel
Saddles	Fiberglass P.A. U.V. Resistant Halogen Free
Colour	Black (Grey On Request)

On Angular

sRF B - Self-Locking Cable Clamps

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.
Hooking on flat and round 3-12 mm

sRF B - Fissacavi Autobloccanti

Completi di Selle Calibrate

Per 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 cavi coassiali sRF.
Con l'impiego di guarnizioni elastiche **GRE-GRR-GRQ** permettono il fissaggio di guide d'onda.

Aggancio su piatto e tondo 3-12 mm

sRF E - Self-Locking Cable Clamps Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.
Hooking on: section 40x22, flat and round 3-12 mm.

sRF E - Fissacavi Autobloccanti Completi di Selle Calibrate

Per 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 cavi coassiali sRF.
Con l'impiego di guarnizioni elastiche **GRE-GRR-GRQ** permettono il fissaggio di guide d'onda.
Aggancio su: profilo PCI 40x22, piatto e tondo 3-12 mm.

SRF E
On Round

SRF E
On Round

sRF M - Self-Locking Cable Clamps

Complete with Calibrated Saddles

For 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 coaxial sRF cables.
With use of **GRE-GRR-GRQ** elastic cushions allow fastening of waveguides.
Hooking on round ø 8-25 and flat 3-25 mm.

sRF M - Fissacavi Autobloccanti

Completi di Selle Calibrate

Per 1/ 2/ 3/ 4/ 5/ 6/ 8/ 12 cavi coassiali sRF.
Con l'impiego di guarnizioni elastiche **GRE-GRR-GRQ** permettono il fissaggio di guide d'onda.

Aggancio a tondo ø 8-25 e piatto 3-25 mm.

MATERIAL

Metal Parts	AISI 304 Stainless Steel
Saddles	Fiberglass P.A. U.V. Resistant Halogen Free
Colour	Black (Grey On Request)

mRF - Self-locking Cable Clamps Secure and Safe Locking

Self-locking mRF fasteners are the optimal solution for an easy and quick fastening to various supports of: coaxial cables and fiber optic cables.

The cables are firmly secured, without danger of deformation, by calibrated saddles which hold them without crushing. The installer can visually control the pressure exerted by the screw (pat.). Between 1 and 3 cables can be fastened with the same clamp. The calibrated saddles, with flexible hinge, can be inserted either frontally or laterally in the bow.

Main features:

- simple and strong structure
- selected high quality materials
- resistance to atmospheric factors (U.V. rays, salty air, a.s.o.)
- high resistance to temperature variations (from -30°C to +120°C)
- absolute safety for cables and installers
- easy and quick installation

mRF - Fissacavi Autobloccanti A Bloccaggio Sicuro Antisfondamento

I fissacavi autobloccanti della serie mRF sono la soluzione ottimale per un fissaggio comodo e rapido a strutture varie di: cavi coassiali e cavi a fibre ottiche.

I cavi vengono bloccati saldamente, senza pericolo di deformazione, da selle calibrate che li trattengono senza schiacciarli.

L'installatore controlla visivamente la pressione esercitata dalla vite (brev.). Possono essere posati da 1 a 3 cavi per morsetto. Le selle calibrate, con cerniera flessibile, possono essere inserite a piacere frontalmente o lateralmente nel cavallotto.

Caratteristiche principali:

- struttura semplice e robusta
- materiale selezionato di elevata qualità
- resistenza agli Agenti atmosferici (U.V., salini ecc.)
- resistenza agli sbalzi termici (-30°C a +120°C)
- sicurezza per i cavi e per l'installatore
- facilità e rapidità di posa

DAS - Calibrated Double Saddles

With Flexible Hinge

DAT - Calibrated Double Twin Saddles

With Flexible Hinge

The two hinged half saddles are calibrated on the diameter of coaxial cables. Its closure system allows a provisional locking onto the cable, allowing to slip and beeing introduced laterally inside the bow of the mRF cable clamp.

DAS - Bi-selle Calibrate Singole

Con Cerniera Flessibile

DAT - Bi-selle Calibrate Gemellate

Con Cerniera Flessibile

Sella calibrata sui diametri dei cavi coassiali, incernierata, con chiusura a scatto che consente l'applicazione anticaduta sul cavo stesso. La sella resta libera di scorrere sul cavo per essere infilata lateralmente nel cavallotto del morsetto mRF.

mRF B - Self-Locking Mini Cable Clamps With Hinged DAS/DAT Saddles

Speedy and easy installation due to the special hinged **DAS/DAT** saddles. The hinged saddles are applied allowing a provisional locking onto the cables. The saddles slip on the cable for insertion in the bow. Final locking by tightening the self-locking screw.

Hooking on flat and round 3-12 mm

mRF B - Mini Fissacavi Autobloccanti Con Selle Incernierate DAS/DAT

*Installazione veloce ed agevole, facilitata dalle speciali selle incernierate **DAS/DAT**. Le selle, applicate sui cavi, risultano imperdibili; scorrono liberamente sui cavi stessi per essere infilate nel cavallotto. Il bloccaggio avviene serrando la vite autobloccante.*

Aggancio su piatto e tondo 3-12 mm

BRF - Self-Locking Cable Clamps complete with Calibrated Stainless Steel Saddles

Stainless Steel Clamps for large Cable and Pipe diameters.
Recommended for coax cables in broadcasting installations.

Versions:

1. **BRF A5** hooking on flat 50x50 mm angular
2. **BRF C** hooking on **PCI 40x22** section
3. **BRF M** hooking on flat 3-25 and rond 8-25

Use:

For 1 cable or tube diam. = D

BRF - Fissacavi Autobloccanti Completi di Selle Calibrate, in Acciaio Inox

Fissacavi in acciaio inox adatti al fissaggio di cavi e tubi di grande diametro.
Particolarmente raccomandati per cavi coassiali del broadcasting.

Versions:

1. **BRF A5** aggancio ad angolare 50x50 mm
2. **BRF C** aggancio su profilato **PCI 40x22**
3. **BRF M** aggancio su piatto 3-25 e tondo 8-25

Impiego:

Per 1 cavo o tubo diametro = D

SET

SEP/SET

SEP - "V" Profiled Saddles

The SEP saddles of **OX** cable clamps, have a large "V". Profile, that allows the fastening of a large range of cables and pipes.

SEP - Selle con Profilo a "V"

Le selle SEP, dei fissacavi della serie **OX**, presentano un profilo a "V" largo. Questo permette l'adattamento a grandi escursioni di diametri per il fissaggio di cavi elettrici e tubi.

USO-USC Single Clamps for Coaxial Cables

Versions:

- **USO** for flat iron with holes
- **USC** for flat, round, angular

Components:

1. **SAM** single Saddle of Talc Reinforced P.P
2. Threaded Bar - **BFI M8** (M10 on request)
3. **RPI 10/20** flat Washers
4. **DAI 8** Hexagon nuts
5. Flexible Hinge

Use:

Fixing 1 to 4 coaxial cables.

GRE-GRQ-GRR elastic cushions allow fastening of waveguides.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

USO-USC Fissacavi Singoli per Cavi Coassiali

Versioni:

- **USO** per piatto forato
- **USC** per piatto, tondo e angolare

Composizione:

1. Monosella calibrata **SAM** di P.P. talco rinforzato vetro
2. Barra filettata - **BFI M8** (M10 a richiesta)
3. Rondelle piane **RPI 10/20**
4. Dadi esagonali **DAI 8**
5. Cerniera flessibile

Impiego:

Fissaggio 1 - 4 cavi coassiali.

Fissaggio di guide d'onda mediante guarnizioni elastiche **GRE-GRQ-GRR**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

SAM - Hinged Single Saddles

The internal indentation allows gripping on the cable without compressing nor deforming it. The saddle size is calibrated and corresponds to the diameter of the coaxial cables.

A flexible hinge (patented) allows a controlled opening and closing of the two shells

SAM - Monoselle Incernierate

Grazie alla dentellatura speciale interna fanno presa sul cavo coassiale senza comprimerlo né deformarlo.

La chiusura della sella è calibrata sui diametri dei cavi coassiali.

Una cerniera flessibile (brev.) consente l'apertura e la chiusura controllata dei due gusci

**UCO-UCC-UCM****Twin Coaxial Cable Clamps****Versions:**

- **UCO** for flat iron with holes
- **UCC** for flat, round, angular
- **UCM** for flat, round, angular

Components:

1. **SAB** double saddles made of reinforced H.D.P.E.
2. Threaded bar - **BFI M8 (M10 on request)**
3. **PUC** steel-Flanges
4. **DAI 8** Hexagonal Nuts
5. **REI 8** Elastic Washers

Use:

Fixing 1 to 8 coaxial cables.

GRE-GRQ-GRR elastic cushions allow fastening of waveguides.

Options:

Available upon request threaded bar, nuts and washers M10, M12 and 3/8".

UCO-UCC-UCM**Fissacavi Doppi per Cavi Coassiali****Versioni:**

- **UCO** per piatto forato
- **UCC** per piatto, tondo e angolare
- **UCM** per piatto, tondo e angolare

Composizione:

1. Selle doppie **SAB** di H.D.P.E. rinforzato vetro
2. Barra filettata - **BFI M8 (M10 a richiesta)**
3. Piastre di spinta **PUC**
4. Dadi esagonali **DAI 8**
5. Rondelle elastiche **REI 8**

Impiego:

Fissaggio 1 - 8 cavi coassiali.

Fissaggio di guide d'onda mediante guarnizioni elastiche **GRE-GRQ-GRR**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10, M12 e 3/8".

UMO-UMC Twin Coaxial Cable Clamps

Versions:

- **UMO** for flat iron with holes
- **UMC** for flat, round, angular

Components:

1. **SEB** double saddles made of fiberglass reinforced P.P.
2. Threaded bar - **BFI M8 (M10 on request)**
3. **DAI 8** Hexagonal Nuts
4. **REI 8** Elastic Washers

Use:

Fixing 1 to 8 coaxial cables.

GRE-GRQ-GRR elastic cushions allow fastening of waveguides.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

UMO-UMC Fissacavi Doppi per Cavi Coassiali

Versioni:

- **UMO** per piatto forato
- **UMC** per piatto, tondo e angolare

Composizione:

1. Selle doppie **SEB** di P.P. rinforzato vetro
2. Barra filettata - **BFI M8 (M10 a richiesta)**
3. Dadi esagonali **DAI 8**
4. Rondelle elastiche **REI 8**

Impiego:

Fissaggio 1 - 8 cavi coassiali.

Fissaggio di guide d'onda mediante guarnizioni elastiche **GRE-GRQ-GRR**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

MATERIAL

Saddle	Fiberglass P.P. U.V. Resistant Halogen Free
Colour	Black

SEB - Calibrated Twin Saddles

The internal indentation allows the cable grip without compressing nor deforming it. The two saddles fitting is calibrated and corresponds to the diameter of the coaxial cables.

SEB - Selle Calibrate Gemellate

Grazie alla dentellatura speciale interna fanno presa sul cavo coassiale senza comprimerlo né deformarlo. La chiusura di due selle abbinata è calibrata sui diametri dei cavi coassiali.

LCO-LCC Fasteners for Side Insertion

Versions:

- **LCO** for flat iron with holes
- **LCC** for flat, round, angular

Components:

1. **SAL** double Saddle in H.D.P.E.
2. Threaded Bar - **BFI M8**
3. **PSL** steel Flanges
4. **REI 8** Elastic Washer
5. **DAI 8** Hexagonal Nuts

Use:

Fixing 1 to 6 coaxial cables.

GRE-GRQ elastic cushions allow fastening of waveguides.

Options:

Available upon request threaded bar, nuts and washers M10, M12 and 3/8".

LCO-LCC Fissacavi ad Inserimento Laterale

Versioni:

- **LCO** per piatto forato
- **LCC** per piatto, tondo e angolare

Composizione:

1. Sella doppia **SAL** di H.D.P.E.
2. Barra filettata - **BFI M8**
3. Piastre di spinta **PSL**
4. Rondella elastica **REI 8**
5. Dadi esagonali **DAI 8**

Impiego:

Fissaggio 1 - 6 cavi coassiali.

Fissaggio di guide d'onda mediante guarnizioni elastiche **GRE-GRQ**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10, M12 e 3/8".

MCO-MCC

Universal Mini-Clamps for RF, RG, and FO

Versions:

- **MCO** for flat iron with holes
- **MCC** for flat, round, angular

Components:

1. **SAC** Calibrated double Saddles P.A. 6
2. Threaded bar - **BFI M8**
3. **DAI 8** Hexagonal Nuts
4. **RPI** Washers
5. Flexible Hinge

Use:

Fixing 1 to 6 coaxial cables.
Fixing for RG and FO cables.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

MCO-MCC

Mini Fissacavi Universali per RF, RG e FO

Versioni:

- **MCO** per piatto forato
- **MCC** per piatto, tondo e angolare

Composizione:

1. Bi-Sella calibrata **SAC** di P.A. 6
2. Barra filettata - **BFI M8**
3. Dadi esagonali **DAI 8**
4. Rondelle piane **RPI**
5. Cerniera flessibile

Impiego:

Fissaggio 1 - 6 cavi coassiali.
Fissaggio di cavi **RG** e **FO**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

SAC - Calibrated Double Saddles with Flexible Hinge for RF, RG and FO

SAC Mini double saddles are used for small diameter cables.

They consist of two hinged calibrated half saddles that snap down on **couples of cables**, remaining blocked on the cables to be fixed.

The two cables, can be led to the fixing point and finally blocked there **through M8/ M10 threaded bars and screws, or sRF Cable Clamps.**

Cables are gently held, thanks to the internal special geometry of the saddles. They are specially recommended for **RG** and **FO** cables.

SAC - Bi-selle Calibrate con Cerniera Flessibile per RF, RG e FO

Le miniselle doppie **SAC**, destinate al fissaggio di cavi di piccolo diametro, sono costituite da due semiselle calibrate incernierate tra loro. Vengono chiuse a scatto su una **coppia di cavi**, restandovi bloccate.

I due cavi, così trattenuti, vengono trascinati al punto di fissaggio ed ivi bloccati definitivamente mediante **viti e perni filettati M8/ M10, o morsetti fissacavi sRF.**

I cavi sono trattenuti delicatamente grazie alla particolare geometria interna delle miniselle SAC.

Sono particolarmente raccomandate per cavi **RG** e **FO**.

MMO-MMC

Universal Mini-Clamps for RF, RG, and FO

Versions:

- **MMO** for flat iron with holes
- **MMC** for flat, round, angular

Components:

1. **SEC** Calibrated double Saddles P.A. 6
2. Threaded bar - **BFI M8**
3. **DAI 8** Hexagonal Nuts
4. **RPI** Washers

Use:

Fixing for POWER and FO cables.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

MMO-MMC

Mini Fissacavi Universali per RF, RG e FO

Versioni:

- **MMO** per piatto forato
- **MMC** per piatto, tondo e angolare

Composizione:

1. Bi-Sella calibrata **SEC** di P.A. 6
2. Barra filettata - **BFI M8**
3. Dadi esagonali **DAI 8**
4. Rondelle piane **RPI**

Impiego:

Fissaggio di cavi **POWER** e **FO**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

SEC - Double Saddles for a Wide Range of Diameters

SEC mini saddles are used for small diameter cables. The innovative design of the saddle allows the fixing of cables with a wide range of diameters.

The two saddles fitting corresponds to the diameter of a wide range of POWER and FO cables.

SEC - Bi-selle per un'Ampia Gamma di Diametri

Le miniselle SEC sono utilizzate per i cavi di piccolo diametro. Il design innovativo delle selle permette il fissaggio dei cavi con un'ampia gamma di diametri.

La chiusura di due selle abbinate si adatta al diametro di un'ampia gamma di cavi POWER e FO.

SDS M - No Tools Stackable Modular Double Saddles

SDS M no tools stackable modular double saddles are used for small diameters cables.

SDS M consists of a central body and modular fasteners for a quick side insertion of cables. Security Clips prevent accidental exit of cables from its housing.

The central body can be connected with a M8 screw to any type of clamp (**MAM 8**, **MBM 8**, **MIM 8**) or socle (**BAM**, **BOM**).

Two slides on the central body allow the stack up of other SDS M saddles without any hardware like threaded bars, washers and nuts.

The side modular fasteners are locked on the body of the saddles through a central slide and allow a fast and safe fixing of power and fiber optic cables without the use of tools.

SDS M - Selle Gemellate Modulari Impilabili, Installazione senza utensili

Le selle gemellate impilabili SDS M sono usate per i cavi di piccolo diametro.

Le selle SDS M sono composte da un corpo centrale e da fissacavi modulari per un rapido inserimento laterale dei cavi.

Le clip di sicurezza prevengono l'uscita accidentale dei cavi dalla loro sede.

Il corpo centrale può essere connesso con una vite M8 a ogni tipo di morsetto (**MAM 8**, **MBM 8**, **MIM 8**) o basetta (**BAM**, **BOM**).

Due slitte ricavate nel corpo centrale permettono di impilare altre selle SDS M senza l'utilizzo di mezzi di collegamento come barre filettate, rondelle e viti.

I fissacavi laterali modulari sono bloccati sul corpo della sella per mezzo di un slitta centrale e permettono un fissaggio veloce e sicuro di cavi elettrici e fibre ottiche senza l'uso di utensili.

UX
Single Clamps for Power Cables and Pipes

Versions:
UXC for flat round and angular

Components:

1. **SOX** fiberglass P.A., U.V. resistant saddle
2. Threaded Bar - **BFI M8**
3. **RPI 10/20** flat Washers
4. **DAI 8** Hexagon nuts
5. **RPI 8** Washers

Use:
Fixing 1 to 3 power cables and pipes.

UX
Fissacavi Singoli per Cavi Elettrici e Tubi

Versions:
UXC per piatto tondo e angolare

Composizione:

1. **SOX** - Sella P.A. fibra di vetro, resistente agli U.V.
2. Barra filettata - **BFI M8**
3. Rondelle piane **RPI 10/20**
4. Dadi esagonali **DAI 8**
5. Rondella Piane **RPI**

Impiego:
Fissaggio 1 - 3 cavi elettrici e tubi.

SOX - "V" Profiled Saddles for BFI 8 Threaded Bars

The **SOX** saddles of UX clamps, have a large "V" profile, that allows the fastening of a wide range of cables and pipes.

SOX - Selle con Profilo a "V" per Barre Filettate BFI 8

Le selle **SOX** dei fissacavi della serie UX, presentano un profilo a "V" largo. Questo permette l'adattamento a grandi escursioni di diametro per il fissaggio di cavi e tubi.

UXC - Clamps for Power Cables and Pipes

UXC cable clamps are equipped with SOX "V" profile saddles. A single clamp is suitable for various cables and pipes, with a large diameters range.

Composition:

SOX saddles + M8 threaded bars + nuts + washers + MIM 8 mini clamps

UXC - Fissacavi per Conduttori Elettrici e Tubi

I fissacavi della serie UXC sono muniti di selle SOX con profilo interno a "V". Ciò permette di fissare più cavi e tubi, con un'ampia escursione di diametri, utilizzando un singolo fissacavo.

Composizione:

Selle SOX + perno filettato M8 + dadi + rondelle + mini morsetto MIM 8

SAS M - Single Saddles for a Wide Range of Diameters
SAT M - Double Saddles for a Wide Range of Diameters

The **SAS M** and **SAT M** saddles are supplied with the OX cable clamps and are used for small diameter cables. The innovative design of the saddles allows the fixing of cables the a wide range of diameters. The two saddles fitting corresponds to the diameter of a wide range of cables.

SAS M - Selle Singole per un'Ampia Gamma di Diametri
SAT M - Selle Doppie per un'Ampia Gamma di Diametri

Le selle **SAS M** e **SAT M** sono fornite con i fissacavi OX e sono utilizzate per i cavi di piccolo diametro. Il design innovativo delle selle permette il fissaggio di cavi con un'ampia gamma di diametri. La chiusura di due selle abbinate si adatta al diametro di un'ampia gamma di cavi.

SAT H – Double saddles with embedded thermoplastic elastomeric cushion

The SAT H double saddles are supplied with OX cable clamps and are recommended for FO cables.

The saddles are realized combining an outer plastic body with an inner thermoplastic elastomeric cushion, which protects the outer jacket of the cables.

The innovative design of the thermoplastic elastomeric cushions allows a secure fixing of cables with a wide range of diameters.

SAT H - Selle doppie con guarnizione interna in elastomero termoplastico

Le selle doppie SAT H sono fornite con i fissacavi OX e sono consigliate per cavi FO.

Le selle sono realizzate combinando un corpo esterno in plastica ed una guarnizione interna in elastomero termoplastico, che protegge la guaina esterna dei cavi.

Il design innovativo della guarnizione in elastomero termoplastico consente il fissaggio sicuro di cavi con un'ampia gamma di diametri.

Snap-in Hangers for Electrical Cables and Pipes

The **EMC** snap-in hangers consist of an elastic stainless steel clip connected, by central rivet, with a hanging and supporting adapter/socle. The hanger is 360° revolving.

It can be fixed onto various structures, such as angulars, flats, tubes and "C" sections. Four hanger sizes only allow 9 to 52 mm diameter cables hanging.

By means of an usual hose-clamps the **EMC-U** version can be applied to structures of any kind of form and dimension.

Fissaggi Rapidi per Cavi Elettrici e Tubi

I fissacavi rapidi **EMC** sono costituiti da una clip elastica di acciaio inossidabile applicata, a mezzo di un rivetto centrale, ad un adattatore/basetta di aggancio. Il fissacavo è così orientabile a 360°. E' applicabile a strutture varie come angolari, piatti, tondi e profilati a "C". Il montaggio rapido avviene senza l'uso di utensili. Con sole quattro misure si possono fissare cavi e tubi di diametro variante da 9 mm fino a 52 mm.

La versione **EMC-U**, abbinata a fascette stringitubo commerciali, permette l'applicazione a strutture di ogni genere e dimensione.

EMC-A

Snap-in hangers, suitable for 3 to 8 mm thick flat or angular structures.

360° revolving.

Quick and safe installation, with no tools

EMC-A

Fissacavi rapidi, predisposti per l'aggancio a profilati piatti e angolari con spessore da 3 a 8 mm.

Orientabili a 360°.

Installazione veloce e sicura senza uso di utensili.

EMC-C

Snap-in hangers bayonet hooking on **PCI B 40x22** sections (EMC-C). The hanger is 360° revolving.

Quick and safe installation by self-locking rotation into the "C" section, with no tools.

EMC-C

Fissacavi rapidi predisposti per aggancio a baionetta, su profilati **PCI B 40x22** (EMC-C). Sono orientabili a 360°.

L'installazione sul profilato è veloce e sicura tramite rotazione autobloccante, senza uso di utensili.

EMC-M

Snap-in hangers suitable for Ø 16÷22 mm rounds.

360° revolving.

Quick and safe installation with no tools.

EMC-M

Fissacavi rapidi per aggancio a tondo Ø 16÷22 mm.

Orientabili a 360°.

Installazione veloce e sicura senza uso di utensili.

EMC-U

Snap-in hangers to be fixed on various structures by means of the **FAS, FAU** stainless steel hose clamps or **BIT 19** strip.

360° revolving.

Quick and safe installation with no tools.

EMC-U

Fissacavi rapidi per il fissaggio tramite fascette di acciaio **FAS, FAU** o nastro inox **BIT19** a strutture varie. Orientabili a 360°.

Installazione veloce e sicura senza uso di utensili.

Click Collars and Clamps

CABLE CLAMPS
PRODUCT CATALOGUE

SCC - Click Collars MRM 6 - Fastening Clamps

The **SCC round collar** has been especially designed for quick installation of HF and DC cables as well as for pipes, using high flexible stainless steel.

The cables will be secured by a manually easy to reopen grid system.

The base has been formed giving optimal and stable support for various surfaces as well as for direct combination with the **FIMO MRM 6 special stainless steel clamp**.

This will ensure easy mountings of **SCC round collar** on round, flat and rectangular steel profiles.

Furthermore the **SCC round collar** can be installed using standard fastening devices on walls and profiles.

Two lateral slots along the lower base will allow the use of steel straps for mounting on masts with any diameter.

The progressive ratcheting of the locking system will easily allow for all clamp sizes the adjustment for different cable & tube diameters.

The locking is in any case easy, secure and long-living.

Technical Features of SCC round collar and MRM 6 clamp

SCC: Monoblock body made of flexible stainless steel, ratchet-tightening and opening by hand, without tool. Mounting via standard screws, plugs, steel straps and special **FIMO MRM 6** clamp.

MRM 6: Monobloc body with M6 tightening screw. Additional M8 screw available for other applications.

SCC - Collari a Clic MRM 6 - Morsetti d' Ancoraggio

*Il **collare SCC** ha forma sostanzialmente circolare aperta superiormente, per trattene cavi elettrici e coassiali nonché tubi. Costituito da nastro di acciaio inossidabile flessibile, presenta nella parte superiore un dispositivo a cremagliera di facile chiusura e riapertura manuale. La base del collare è configurata per appoggiarsi bene a supporti come pareti, tralicci, profilati. Il fissaggio avviene mediante elementi convenzionali come viti, tasselli e similari. L'apposito morsetto di*

***acciaio inossidabile MRM 6**, si incastona perfettamente nella base del **collare SCC**, e forma un sistema di fissaggio strutture, come angolari, piatti, tubi ecc.*

*Due fessure, ricavate alla base del **collare SCC**, permettono anche il fissaggio a pali di grande diametro, con fascette metalliche di comune impiego nell'impiantistica.*

*In ogni caso il **collare SCC** può essere facilmente aperto e divaricato per introdurre il cavo o il tubo da fissare. Viene poi richiuso semplicemente stringendo i suoi lembi superiori.*

La chiusura a scatto è progressiva; può essere regolata manualmente in base al diametro dell'oggetto da trattenere.

La chiusura è facile, sicura e durevole.

Caratteristiche del Collare SCC e del Morsetto MRM 6

SCC: corpo monoblocco di acciaio a struttura elastica Chiusura a scatto e riapertura senza utensili Fissaggio mediante viteria, fascette d'acciaio stringitubo e morsetto speciale **FIMO MRM 6**.

MRM 6: Corpo monoblocco, con vite di serraggio M6. A richiesta vite M8 supplementare per fissaggi vari

AISI 301 Stainless Steel

SIC - Speedy Snap-in Clamps For Cables and Pipes

SIC square shaped clamps. The high flexible Monobloc stainless steel body, with corresponding claws, allows an easy handling by snapping into 19 mm (3/4") wide round holes.

After widening the lower opening of the clamp it can be superimposed onto the cable or rigid line. The final mounting is performed by locking the clamp into the perforation of the according socket.

An inner bracket pair holds the cable in a position by applying elastic pressure with its variable geometry.

The top boring with a diameter of 19 mm facilitates the mounting and stacking of further **SIC** clamps.

By using an adaptor, the **SIC** clamp can also be fastened to various flat and rectangular irons, respectively to standard "C" profiles.

The mounting can be performed quickly, conveniently and without the need of tools. Only 4 clamps version/dimensions are sufficient in order to install the majority of coaxial cables for the telecommunications industry (1/2" - 7/8" - 1.1/4" - 1.5/8"), as well as electrical cables and pipes.

Technical features:

- Monobloc Stainless steel body
- Elastic, simple and strong structure
- Freehand speedy mounting
- Uphead installation
- Secure and soft fastening of cables

SIC - Collari a Fissaggio Rapido Per Cavi e Tubi

*I fissacavi rapidi **SIC** hanno forma di collare quadro.*

Costituiti di acciaio inossidabile monoblocco, hanno una struttura elastica. Come tale possono essere facilmente divaricati alla base che dispone di piedi uncinati.

Innestati dapprima su cavi o tubi vengono successivamente inseriti in fori diam. 19 mm (3/4") di strutture appositamente preparate.

I collari dispongono sui fianchi di due alette sagomate rivolte all'interno, tali da trattenere in modo sicuro ma elastico il cavo installato.

Il lato superiore dei collari quadri dispone di un foro per accogliere altri collari similari.

*I fissacavi rapidi **SIC** vengono applicati velocemente e con facilità su appositi profilati opportunamente predisposti di forature diam. 19 mm, come anche su adattatori appositamente studiati per essere applicati a strutture di ogni genere, come ferri piatti, angolari e profilati a "C" commerciali.*

Il montaggio rapido avviene in ogni caso senza l'uso di utensili. Con sole 4 misure si possono fissare cavi coassiali delle misure più correnti (1/2" - 7/8" - 1.1/4" - 1.5/8") come anche cavi di forza e tubi di vari diametri.

Caratteristiche:

- Corpo monoblocco di acciaio
- Struttura elastica, semplice e robusta
- Applicabile a mano, velocemente, senza utensili
- Sovrapponibilità di più collari, anche di misure diverse
- Tenuta morbida ed elastica dei cavi

SIC H Hybrid Snap-in Cable Clamps

The SIC H quick cable fasteners have the shape of a square collar. Consisting of a stainless-steel body and a plastic fastening system, they are characterized by an elastic structure.

In this way, they can be easily spread out at the base, on which the plastic hooked feet are attached. First plugged into cables or pipes, they are then inserted into 19 mm (3/4") holes in specific dedicated structures. The collars have two shaped fins on the sides facing the inside, so as to securely but elastically hold the installed cable. The upper side of the square collars has a hole to accommodate other similar collars.

SIC H quick cable fasteners are quickly and easily applied on special profiles with holes diam. 19 mm, as well as on adapters specifically designed to be applied to structures of all kinds, such as flat irons, angles and commercial C-profiles. Quick assembly is performed in any case without the help of any tools. The plastic feet make possible to electrically insulate the cable clamp from the structure on which they are fixed or from another SIC H cable clamp (when stacked together).

The product thus created, allows to significantly reduce the phenomenon of passive intermodulation (PIM).

SIC H Hybrid Snap-in Cable Clamps

I fissacavi rapidi SIC H hanno forma di collare quadro. Costituiti da un corpo in acciaio inossidabile e un sistema di fissaggio in plastica, sono caratterizzati da una struttura elastica.

In questo modo, possono essere facilmente allargati alla base, sulla quale sono attaccati i piedini in plastica. Innestati dapprima su cavi o tubi vengono successivamente inseriti in fori diametro 19 mm (3/4") di strutture appositamente preparate. I collari dispongono sui fianchi di due alette sagomate rivolte all'interno, tali da trattenere in modo sicuro ma elastico il cavo installato. Il lato superiore dei collari quadri dispone di un foro per raccogliere altri collari simili.

I fissacavi rapidi SIC H vengono applicati velocemente e con facilità su appositi profilati opportunamente predisposti di forature diametro 19 mm, come anche su adattatori appositamente studiati per essere applicati a strutture di ogni genere, come ferri piatti, angolari e profilati a "C" commerciali.

Il montaggio rapido avviene in ogni caso senza l'uso di utensili. I piedini in plastica permettono di isolare elettricamente i fissacavi dalla struttura su cui sono fissati o da un altro fissacavo SIC H (quando impilati uno sull'altro).

Il prodotto così realizzato permette di ridurre in modo significativo il fenomeno dell'intermodulazione passiva (PIM).

FEATURES & BENEFITS

- Monobloc steel body + plastic feet
- Simple, robust and elastic structure
- Hand-applied, fast, tool-free
- Possibility of overlap several collars, even of different sizes
- Soft and elastic hold of the cables
- Ideal for reducing passive intermodulation PIM

CARATTERISTICHE & VANTAGGI

- Corpo monoblocco in acciaio + piedini in plastica
- Struttura semplice, robusta ed elastica
- Applicabile a mano, velocemente e senza utensili
- Impilabile anche tra differenti grandezze
- Tenuta cavi elastica e non aggressiva
- Ideale nella riduzione della intermodulazione passiva PIM

SIC P Plastic Snap-in Clamps

SIC P plastic snap-in clamps have been specifically designed for a quick and tool-less installation of cables. The high flexibility of the body, obtained with high-performance compound and optimal design, allows an easy handling by snapping into 19 mm (3/4") wide round holes.

After superimposing the clamp onto the cable, the SIC P can be mounted by locking it into the perforation of the according socket.

An inner bracket pair holds the cable in position by applying elastic pressure with its variable geometry. Two pairs of flaps extending from the base cooperate with the brackets to further increase the axial retention of cable especially with bigger diameter cables. The high security factor K allows horizontal as well as vertical installations.

The head portion with the pass-through circular opening facilitates the mounting and stacking of further SIC P clamps, allowing mutual rotation and twistability.

4 versions, all sharing a common external frame, guarantee the capability to install cables in the range spanning from 4 to 17 mm, covering the majority of fiber optic cables, jumpers, electrical cables and pipes commonly used in the telecommunications industry.

SIC P Plastic Snap-in Clamps

Fissa cavi rapidi in plastica SIC P sono progettati per una rapida installazione di cavi senza l'uso di utensili. L'elevata deformabilità del corpo, ottenuta grazie all'utilizzo di materiali con elevate caratteristiche meccaniche e al design ottimizzato, permette una facile manipolazione del prodotto che può essere applicato all'interno di fori di diametro 19 mm (3/4").

Dopo aver inserito il fissacavo sul cavo, il SIC P può essere installato bloccandolo all'interno della struttura appositamente forata.

Una coppia di staffe interne blocca il cavo applicando una pressione elastica grazie alla geometria variabile delle stesse. Una coppia di alette, che si estendono dalla base, coopera con le staffe per ulteriormente aumentare la tenuta assiale del cavo specialmente con cavi di diametro maggiore. L'elevato fattore di sicurezza K permette l'utilizzo in installazioni sia verticali che orizzontali.

La parte superiore del fissacavo con l'apertura circolare passante facilita il montaggio e l'impilabilità di ulteriori fissacavi SIC P, permettendo la rotazione e torsione reciproca. Quattro versioni, che condividono un unico telaio esterno, garantiscono la possibilità di installare cavi con un range di diametri da 4 a 17 mm, coprendo la maggior parte dei cavi fibra ottica, dei jumper, dei cavi elettrici e dei tubi comunemente utilizzati nel settore delle telecomunicazioni.

FEATURES & BENEFITS

- Free hand, quick and easy installation
- Stackable and twistable (up to three clamps)
- Easily removable without tools
- Suitable for horizontal and vertical installations
- Single external frame for 4 versions (range: 4 – 17 mm diameter cables)
- Optimal design and high-performance compound with high mechanical resistance and flexibility
- High security factor K in all axial tests
- High ice and wind load resistance (up to 300 km/h)

CARATTERISTICHE & VANTAGGI

- Applicabile a mano, installazione facile e veloce
- Impilabile e ruotabile (fino a 3 collari)
- Rimovibile senza utensili
- Adatto per installazioni verticali e orizzontali
- Corpo esterno unico per 4 versioni (range: 4 – 17 mm diametro cavi)
- Design ottimale e materiale ad alte prestazioni con elevata resistenza meccanica e flessibilità
- Elevato fattore di sicurezza K in tutte le prove assiali
- Elevata resistenza al carico dovuto a ghiaccio e vento (fino a 300 km/h)

SRG Safe Rubber Guard

SRG rubber guards combined with SIC and SIC H snap-in clamps are the perfect solution for a quick, easy and safe installation of coaxial, fiber and power cables. SRG rubber guard allows safe locking of coaxial, fiber optics and power cables, protecting cable and its jacket. SRG rubber guards sizes cover a wide diameter range (4.5 – 40 mm / .177 – 1.574 inches) of fiber optic and power cables.

FEATURES & BENEFITS

- Strong and elastic structure
- Outer frame optimized for a smooth cable insertion
- One-hand instant mounting
- Safe and flexible fastening of cables
- Ideal for reducing passive intermodulation PIM

SRG Guarnizione protettiva

Le guarnizioni protettive SRG combinate come fissacavi rapidi SIC e SIC H sono la soluzione perfetta per una installazione facile, rapida e sicura dei cavi coassiali, fibra ottica e energia. Le guarnizioni protettive SRG permettano il bloccaggio sicuro di cavi coassiali, fibra ottica e energia proteggendo il cavo e la sua guaina esterna. Le versioni di guarnizioni SRG permettono di coprire l'intera gamma di diametri (4,5 - 40 mm / .177 – 1.574 pollici) dei cavi fibra ottica e energia.

CARATTERISTICHE & VANTAGGI

- Struttura resistente ed elastica
- Struttura esterna ottimizzata per un facile inserimento del cavo
- Installazione rapida con una mano
- Bloccaggio sicuro e flessibile dei cavi
- Ideale per ridurre l'intermodulazione passiva PIM

SRR

Round Reduction Cushions for a wide range of cables' diameters.

SRR round reduction cushions allow a safe fixing of coaxial, fiber optic and power cables with a wide range of diameters.

They consist of two hinged half cushions with an innovative internal structure designed to be easily shaped around cables with a wide range of diameters. SRR round cushions guarantees a secure locking of cables, protecting cable and its jacket.

Two cushions are covering the entire diameter's range (4-32 mm / .157 -1.260 inches) of fiber optic and power cables.

SRR round reduction cushions can be combined either with **SIC** snap-in cable clamps or with **SEB** calibrated double saddles

Not Available for US market

SRR

Guarnizioni tonde di riduzione per un'ampia gamma di diametri dei cavi.

Le guarnizioni SRR permettono un fissaggio sicuro di cavi coassiali, fibra ottica e energia con un'ampia gamma di diametri.

Esse sono composte da due semi-guarnizioni incernierate reciprocamente con una struttura interna innovativa ideata per essere facilmente modellata attorno ai cavi con un'ampia gamma di diametri. Le guarnizioni SRR garantiscono un bloccaggio sicuro dei cavi proteggendo il cavo e la sua guaina esterna.

Due guarnizioni permettono di coprire l'intera gamma di diametri (4-32 mm/ .157-1.260 pollici) dei cavi fibra ottica e energia.

*Le guarnizioni SRR possono essere combinate sia con i fissacavi rapidi **SIC** che con le selle calibrate gemellate **SEB**.*

Morsetto universale in plastica

Heavy Duty monobloc bidirectional plastic clamp available with three 3/4" holes and slots for the installation with two plastic tie wraps to various structures like poles and pylons. The 3/4" holes allow the combination with SIC H and SIC P snap-in cable clamps. Two specific plastic reduction inserts (ISP 3/4" - 3/8" V and O) are foreseen for the installation with a 3/8" locking screw on flats, rounds and angular, and for the installation of cable blocks with 3/8" hardware.

Morsetto universale in plastica con tre fori 3/4" e due feritoie per l'installazione con fascette di plastica a varie strutture come pali e tralicci. I fori 3/4" permettono utilizzo in abbinamento ai fissacavi SIC H e SIC P. Due specifici inserti (ISP 3/4"-3/8" V - ISP 3/4"-3/8" O) sono previsti per l'installazione con vite di bloccaggio 3/8" su piatto, tondo e angolare virgola e per l'installazione di selle con barre filettate 3/8".

RF Q - Square Collar With SAS/SAT Calibrated Saddles

The **RF Q** square collar is formed by two shells joined by cylindrical headed cross-slotted screws.

The parts are pre-assembled and without any loose parts. A $\phi 8,5$ hole allows the installation of M8 screws.

Combined with **MAM**, **MBM**, **MCM** and **MIM** multidirectional clamps, **BAM** socles or **GOP** round collar it allows fastenings on any structure with any orientation.

RF Q - Collare Quadro Con Selle Calibrate SAS/SAT

Il collare **RF Q**, a sezione quadra, è formato da due gusci uniti da viti M6 a testa cilindrica con taglio croce/cacciavite.

I componenti sono assemblati in modo imperdibile per facilitare al massimo le operazioni di montaggio. Un foro $\phi 8,5$ serve al fissaggio con viti M8. Abbinato ai morsetti multidirezionali **MAM**, **MBM**, **MCM** e **MIM** alle basette **BAM** o al collare **GOP** permette fissaggi agevoli a qualsiasi struttura con qualsiasi orientamento.

MOT 8 - Copper Wire Fastener Rope $\varnothing$ 6-10 (16-70 mm²)

To fix copper wire ropes $\varnothing$ 6-10 mm (25 - 50 - 70 mm²) to various supports.

Description:

1. Steel bow
2. cable protection clip $\varnothing$ 6-10
3. M8 locking screw

MOT 8 - Morsetto Fissacorda Corda $\varnothing$ 6-10 (16-70 mm²)

Per il fissaggio di corde di rame nudo $\varnothing$ 6-10 mm (25 - 50 - 70 mm²) su supporti vari.

Descrizione:

1. cavallotto
2. clip di protezione del cavo $\varnothing$ 6-10
3. vite premente M8

GO - Round Collar

The GO collar is formed by two shells connected by two cylindrical headed M6 screws with cross/screwdriver cut. It is pre-assembled in order to avoid losing any parts. A central $\varnothing 8,5$ mm hole allows the installation on supports with M8 screws. The M8-threaded hole of the upper shell allows more fastenings on the top. The nominal diameter D fits with the outer diameters of the **GRE**, **GRR** and **GRQ** elastic cushions.

GO - Collare Tondo

*Il collare GO è formato da due gusci uniti da viti M6 con testa cilindrica taglio croce/cacciavite. Il tutto è assemblato in modo da permettere il montaggio senza il rischio di perdere particolari. Un foro centrale $\varnothing 8,5$ mm del guscio inferiore consente il fissaggio a supporti con viti M8. Il guscio superiore è provvisto di un foro centrale M8 per altri abbinamenti. Il diametro nominale D corrisponde a quello esterno delle guarnizioni elastiche **GRE**, **GRR** e **GRQ**.*

MPS - Clamp for Ladders

Hanging element which allows additional side fixings to ladders. It can be used in combination with brackets, threaded bars, collars and other accessories. It is useful when ladders are overcrowded.

Description:

- hanging bow
- protection and stabilization plate
- M8 locking screw
- Ø 8,5 hole for M8 screws/threads

MPS - Morsetto per Scalette

Elemento per agganci ai correnti di scalette per montaggi aggiuntivi laterali. Può essere combinato con mensole, barre filettate, collari e altri accessori. Utile per lo sfruttamento degli spazi su scalette affollate di cavi.

Descrizione:

- cavallotto di aggancio
- piastrino di protezione e stabilizzazione
- vite di bloccaggio M8
- foro Ø 8,5 per viti/filetti M8

RAC

Cable Clamps for Radiating Cables

RAC cable clamps are used for the installation of radiating cables in tunnels. RAC clamps may be installed with or without spacers.

RAC cable clamps are designed with two clips coupled to a central snap-in cap.

The two clips allow a quick insertion of the cable, while the central snap-in cap assures the final locking.

RAC Cable Clamps are designed also for installatons in high speed railway tulle applications (up to 400 km/h).

RAC

Fissacavi per Cavi Radianti

I fissacavi RAC vengono utilizzati per il fissaggio di cavi radianti alle pareti di gallerie o tunnel, direttamente o con distanziatori.

I fissacavi RAC sono costituiti da due clips elastiche abbinate ad un cappellotto centrale a chiusura a scatto.

Le due clips permettono l'innesto e il prefissaggio rapido del cavo durante l'installazione. Il cappellotto centrale, grazie alla sua chiusura rapida a scatto, assicura il bloccaggio definitivo del cavo.

I fissacavi RAC sono progettati anche per l'impiego in tunnel ferroviari per l'alta velocità (fino a 400 km/h).

RF Q - Square Collar for Radiating Cables Complete with SAS rigid Calibrated Saddles

The **RF Q** square collar is formed by two shells joined by M6 screws and calibrated saddles **SAS**.

It is recommended in combination with **RAC** clamps for radiating cables.

Whether inserted at a suitable distance (10-15 m) among **RAC** clamps, it prevents radiating cable lines from falling down, in case of fire.

RF Q - Collare Quadro per Cavi Radianti Completo di Selle Calibrate SAS

Il collare **RF Q**, a sezione quadra, è formato da due gusci uniti da viti M6, con selle calibrate **SAS**.

E' consigliato l'impiego in abbinamento coi fissacavi **RAC**. Si suggerisce l'impiego intercalato ad opportuna distanza (10-15 m) tra i fissaggi a mezzo dei fissacavi **RAC**, per conferire all'impianto protezione anticaduta in caso di incendio.

SCC

Click Collars for Radiating Cables

The **SCC round collar** has been especially designed for quick installation of HF and DC cables as well as for pipes.

It is recommended in combination with **RAC** clamps for radiating cables. Whether inserted at a suitable distance (10-15 m) among **RAC** clamps, it prevents radiating cable lines from falling down, in case of fire.

SCC

Collari a Clic per Cavi Radianti

Il collare SCC ha forma sostanzialmente circolare aperta superiormente, per trattenere cavi elettrici e coassiali nonché tubi. E' consigliato l'impiego in abbinamento coi fissacavi RAC. Si suggerisce l'impiego intercalato ad opportuna distanza (10-15 m) tra i fissaggi a mezzo dei morsetti RAC, per conferire all'impianto protezione anticaduta in caso di incendio.

RAW Monoblock Radiating Cable Clamps

The RAW cable clamps are used to fasten radiating cables to walls and ladders in railway, motorway and underground tunnels. The RAW cable clamps include integrated spacer for the installation of cables directly on walls. Foreseen two versions with spacer 50 mm and 80 mm. The RAW cable clamps are designed to allow fast and easy installation of radiating cables. The RAW cable clamps are suitable for durable fastening of radiating cables also for installation in high speed railway tunnel applications (up to 400 km/h)*.

*Combined with MF and MFI Steel Anchors

RAW Fissacavi Monoblocco per Cavi Radianti

I fissacavi RAW vengono utilizzati per il fissaggio di cavi radianti alle pareti o alle scalette presenti all'interno di tunnel ferroviari, autostradali e metropolitane.

I fissacavi RAW hanno il distanziatore integrato, per la posa diretta del cavo radiante a parete. Sono disponibili le versioni con distanziatore da 50 mm e 80 mm.

I fissacavi RAW sono progettati per una semplice e rapida installazione dei cavi radianti.

I fissacavi RAW sono realizzati per garantire una duratura installazione dei cavi radianti, anche all'interno di tunnel ferroviari per l'alta velocità (fino a 400 km/h).*

**In abbinamento con tasselli in acciaio MF e MFI*

RSD	AISI 316 Stainless Steel

RSD – RAW Security Device

The RSD Security Device is designed to be used in combination with RAW radiating cable clamps. The RSD can be pre-assembled with RAW clamps using different fastening anchors (available on request) for a fast and easy installation of the kit.

The monoblock stainless steel body of RSD allows a secure elastic fastening of cables, without the use of tools.

The installation of a RAW + RSD kit at a suitable distance of 5 – 10 m prevents cable lines from falling down, in case of fire.

RSD – Dispositivo di Sicurezza per RAW

Il dispositivo di sicurezza RSD è progettato per l'impiego in combinazione ai fissacavi per cavi radianti RAW.

Il dispositivo RSD può essere pre-assemblato con i fissacavi RAW usando diversi tasselli (disponibili su richiesta) per una semplice e rapida installazione del kit. Il corpo monoblocco in acciaio INOX del dispositivo RSD permette un sicuro bloccaggio elastico del cavo, senza l'utilizzo di utensili.

Si suggerisce l'impiego del kit RAW + RSD ad opportuna distanza (5 – 10 m) per conferire all'impianto protezione anticaduta in caso di incendio.

RAW – APP

Monoblock Radiating Cable Clamps for Ladders

The RAW – APP cable clamps have been especially designed for quick installation of radiating cables on ladders, provided with rectangular slots 9x35 mm and 11x35 mm.

The RAW – APP cable clamps can be safely installed on metal ladders with thickness 1.25 – 1.5 mm, and include integrated spacer (80 mm).

The RAW – APP cable clamps are designed to allow fast installation of radiating cables on ladders without need of tools. For installation insert the cable clamp in the rectangular slot on ladder and rotate till lock position.

To prevent cable lines from falling down, in case of fire, a RAW + RSD cable clamp can be installed among RAW – APP cable clamps, using metal screws and nuts, at a suitable distance of 5 – 10 m.

RAW – APP

Fissacavi Monoblocco per Cavi Radianti su Scalette

I fissacavi RAW – APP sono progettati per una rapida installazione di cavi radianti su scalette dotate di finestre rettangolari 9x35 mm e 11x35 mm.

I fissacavi RAW – APP possono essere installati su scalette metalliche di spessore 1.25 – 1.5 mm e hanno integrato il distanziatore da 80 mm.

I fissacavi RAW – APP sono progettati per un veloce aggancio di cavi radianti su scalette, senza l'utilizzo di utensili. Per l'installazione inserire il fissacavo nella finestra rettangolare sulla scaletta e ruotare fino alla posizione di bloccaggio.

Per conferire all'impianto protezione anticaduta in caso di incendio, è possibile installare un RAW + RSD intercalato ai fissacavi RAW – APP, utilizzando viteria metallica, ad opportuna distanza (5 – 10 m).

RAX + COL

Radiating Cable Clamps for Ladders

The KIT RAX + COL cable clamps are used in tunnels to fasten radiating cables on specific sections (e. g. OEGLAND SYSTEM LOE – 55, LOE – 75, LOE – 100). The KIT RAX + COL cable clamps are designed to allow fast click-on ladder installation of cables without need of tools. The RAX monobloc cable clamps include integrated spacer (90 mm).

The COL clip-on ladder hanger is made with AISI 301 Stainless Steel for adaptive and tight fastening on cable ladders. Customized click-on hooks are available upon request.

RAX + COL

Fissacavi per Cavi Radianti su Scalette

I fissacavi KIT RAX + COL vengono utilizzati nelle gallerie per il fissaggio di cavi radianti su specifiche sezioni (es.: OEGLAND SYSTEM LOE – 55, LOE – 75, LOE – 100). I fissacavi KIT RAX + COL sono progettati per un veloce aggancio di cavi radianti su scalette, senza l'utilizzo di utensili. I fissacavi monoblocco RAX hanno integrato il distanziatore da 90 mm. Il sistema di aggancio rapido COL è realizzato in acciaio INOX AISI 301 per un bloccaggio adattabile e sicuro su scaletta. Sistemi di fissaggio personalizzati sono disponibili su richiesta.

KIT SCC + COL

Safety Collar for Radiating Cables on Ladders

The KIT SCC + COL safety collar has been especially designed for quick installation of radiating cables on ladders.

It is recommended in combination with KIT RAX + COL clamps for radiating cables. Whether inserted at a suitable distance (10 – 15 m) among KIT RAX + COL clamps, it prevents radiating cable lines from falling, in case of fire.

KIT SCC + COL

Collare di Sicurezza per Cavi Radianti su Scalette

I collari di sicurezza KIT SCC + COL sono progettati per una rapida installazione di cavi radianti su scalette.

È consigliabile l'impiego in abbinamento coi fissacavi KIT RAX + COL. Si suggerisce l'impiego intercalato ad opportuna distanza (10 – 15 m) tra i fissaggi a mezzo dei fissacavi KIT RAX + COL, per conferire all'impianto protezione anticaduta in caso di incendio.

RAR – No Tool Radiating Cable Clamps For Hanging on Stainless Steel/Synthetic Ropes

The RAR cable clamps are used in tunnels to hang radiating cables to either stainless steel or synthetic ropes.

The RAR cable clamps are designed to allow secure click-on installation of cables on hanging ropes without need of tools. Two independent housings, for cable and rope, provided with one cap each allow a fast installation without need of screws.

The RAR cable clamps are available for ropes 7 and 10 mm (other dimensions available upon request).

The RAR monobloc cable clamps include integrated spacer (40 mm).

RAR – Fissacavi per Cavi Radianti, Installazione senza Utensili

Sospensione su Funi Portanti di Acciaio INOX/ Sintetiche

I fissacavi RAR vengono utilizzati nelle gallerie per la sospensione di cavi radianti a funi portanti sia di acciaio INOX sia di materiale sintetico. I fissacavi RAR sono progettati per un sicuro aggancio di cavi radianti su funi portanti senza l'utilizzo di utensili. Due sedi indipendenti, per il cavo e la fune, provviste di un coperchio ciascuna permettono una rapida installazione senza la necessità di aggiungere viti.

I fissacavi RAR sono disponibili per funi da 7 e da 10 mm (altre misure disponibili su richiesta). I fissacavi monoblocco RAR hanno integrato il distanziatore da 40 mm.

RAP

Hanging Cable Collar

RADIATING CABLE FIXINGS PRODUCT CATALOGUE

RAP - Radiating Cable Clamp For Hangings on Steel/Synthetic Ropes

The **RAP** Clamp, consisting of two hinged shells, is used in tunnels to hang coaxial radiating cables to ropes made of either stainless steel or synthetic materials. It holds the coaxial cable without compressing nor deforming it.

Some small elastic snap-in hooks guarantee the closure as well as a quick pre-fixing around cable and rope.

Two screws assure the final fixing of RAP Clamp on cable and rope.

RAP - Portacavo per Cavi Radianti Sospensioni su Funi Portanti di Acciaio/Sintetiche

Il portacavi **RAP**, formato da due gusci incernierati, viene utilizzato nelle gallerie per la sospensione di cavi radianti coassiali a funi portanti, sia di acciaio inox sia di materiale sintetico. Trattiene il cavo coassiale senza comprimerlo né deformarlo. Gancetti elastici assicurano la chiusura a scatto e il prefissaggio rapido attorno al cavo e alla fune portante. Due viti garantiscono il fissaggio definitivo del RAP sul cavo e sulla fune portante.

CGK M - Compact Monobloc Grounding Kit For Copper or Aluminum RF Coaxial Cables. Parallel Cable Exit

Technical features:

- Compact structure
- Fast and easy installation
- Closure with pressure plate
- Flexible metal shell
- No loose parts
- No extra taping needed

CGK M - Kit di Terra Monoblocco Compatto Per Cavi Coassiali RF, in Rame o Alluminio. Uscita Parallela

Caratteristiche:

- Struttura compatta
- Installazione veloce
- Chiusura con piastrino
- Guscio metallico deformabile
- Senza parti sciolte
- Nastratura supplementare non neces-
saria

ISO
Electrical Insulators

ISO Electrical Insulators are used to insulate grounding bars fixed on towers or other metal structures. Installed between the equipotential bar and the metal structure, **ISO** insulators guarantee electrical insulation of the bar with respect to the structure.

ISO
Isolatori Elettrici per Barre Equipotenziali

Gli isolatori ISO sono usati per isolare le barre equipotenziali fissate alle torri o ad altre strutture metalliche. Installati tra la barra equipotenziali e la struttura metallica gli isolatori ISO garantiscono l'isolamento elettrico della barra rispetto alla struttura.

Wall Entries & Cushions

Product Catalogue

Wall Entries

Wall entries, waterproof and fire resistant, for coaxial cables, waveguides, optical fibers, power cables and any type of pipes. FIMO's wall entries are suitable for installations in the telecommunication industry as well as in the shipyards, constructions, oil&gas, offshore, aeolian industry and in all industrial infrastructures.

Passanti a parete a tenuta stagna e resistenti al fuoco per cavi coassiali, guide d'onda, fibre ottiche, cavi di potenza e tubi in genere. I passanti a parete FIMO sono adatti per installazioni nei settori delle telecomunicazioni, industria navale, edilizia, oil&gas, piattaforme offshore, industria eolica e infrastrutture in genere.

PMR Kit Example Components

DESCRIPTION

1. AISI 304 stainless steel Frame
2. Black EPDM Body of Wall Entry
3. Internal AISI 304 stainless steel Collar
4. EPDM black rectangular Cushions - **GPR**
5. EPDM black round Reductions - **GRR**
6. Blind Cushion - **GTR**
7. Tightening Expander - **GPE 20**

DESCRIZIONE

1. Cornice frontale di acciaio AISI 304
2. Corpo del passante di EPDM nero
3. Collare interno di acciaio AISI 304
4. Guarnizioni rettangolari di EPDM nero - **GPR**
5. Riduzioni tonde di EPDM nero - **GRR**
6. Tappo guarnizione di EPDM nero - **GTR**
7. Espansore per sigillatura - **GPE 20**

PMR - Basic Built-in Frame Empty, closed by removable membrane

The rectangular built-in Frame, is joined to an EPDM rubber gasket, temporarily closed by a removable sheet.

Its window is suitable to house rectangular **GPR** cushions with round passages of different diameters.

Round **GRR** and **GRE** reductions with **GTR** round plugs, fit in the passages. The **GPE** mechanical expander efforts the final tightening of the system.

PMR - Cornice Base da Incasso Vuota, chiusa da membrana

La cornice rettangolare da incasso di acciaio, è abbinata ad una guarnizione di EPDM. L'apertura di passaggio rettangolare è chiusa da una membrana asportabile.

Il passaggio rettangolare può accogliere le guarnizioni rettangolari **GPR**, che possono contenere le guarnizioni tonde **GRR** e **GRE** di vario diametro e relativi tappi **GTR**. L'apposito espansore **GPE** viene inserito per ottenere la chiusura sigillata del sistema.

PTR 200/185 RO

Wall Entries

WALL ENTRIES & CUSHIONS
PRODUCT CATALOGUE

PTR 200/185 RO - Waterproof Wall Entry

The central 185 Ø opening is temporarily sealed with an easily removable rubber sheet. The opening is conceived to host broadcasting cables and big diameter pipes, as well as different diameters, thanks to the use of **GRR** round reduction cushions.

The final sealing is ensured by tightening the hose clamp.

PTR 200/185 RO - Passante a Parete Stagno

L'apertura centrale Ø 185, chiusa da una pellicola facilmente asportabile, è predisposta per accogliere cavi broadcasting e tubi di grandi dimensioni e di diversi diametri per mezzo di guarnizioni di riduzione rotonde della serie **GRR**.

La sigillatura finale si ottiene serrando la fascetta.

PGA 4/90 and PGA 5/90 - Cap Wall Entry

Waterproof gasket to seal passages of cables, even on installed ones.
Easy sealing by means of two hose clamps.
Combinable with **GSR**, **GSE**, **GST FIMO®** sectorial cushions.

- **PGA 4/90** for Steel Plate with collar diam. 4" and diam. 4" tube (103 ÷ 105 mm)
- **PGA 5/90** for Steel Plate with collar diam. 5" and diam. 5" tube (128 ÷ 130 mm)

PGA 4/90 e PGA 5/90 Passante a Cappuccio

Guarnizione di chiusura di passaggi di cavi.
Chiusura semplice con due fascette stringitubo.

Applicabile anche su cavi già installati.
Combinabile con guarnizioni settoriali FIMO® **GSR**, **GSE**, **GST**.

- **PGA 4/90** per piastra con collare diam. 4" e su tubi diam. 4" (mm 103 ÷ 105)
- **PGA 5/90** per piastra con collare diam. 5" e su tubi diam. 5" (mm 128 ÷ 130)

NEP - Self-Agglomerating Tape For Tightening and Insulating

Description:

Self-agglomerating Ethylenpropylen (EPR) Rubber, non adhesive, Highly elastic (1000%), not hardening. Waterproof. insulating (35 kV/mm), U.V. resistant. Temperature range -40°/ +70°C. Packed in rolls with protective film.

NEP - Nastro Autoagglomerante Per sigillatura e isolamento

Caratteristiche:

Gomma etilenpropilenica (EPR) autoagglom., non adesiva.
Grande elasticità (1000%), non indurente.
Impermeabile, isolante (35kV/mm), resistente ai raggi U.V.
Temperature d'esercizio -40°/+ 70°C.
Confezione in rotoli con pellicola protettiva.

MATERIAL

EPR

* Remove protective film and wrap the tape, pulling it strongly.

* The operation is completed. Bandage is waterproof.

CODE	ARTICLE	MEASURE	LENGHT	BAG	BOX	WEIGHT
61 2100 1975	NEP 19	19x0.75	10 m	1	10	170
61 2100 3875	NEP 38	38x0.75	10 m	1	10	340

TECHNICAL FEATURES

Temperature Resistance	-50° + 150°
UV Resistance	U.V. Resistant
Hardness	60/65 Shore A (ASTM D 2240)
Tensile Strength	45 Kg/cm ² (ASTM D 412)
Elongation	350% (ASTM D 412)
Brittleness Point	-50°C (ASTM D 2137)
Dielectric Strength	2700V/0.1mm (ASTM D 149)

NAS

Self-agglomerating Silicone Tape Protecting, Insulating and Waterproof

1. Self agglomerating silicone tape.
2. Removable PET protection film.
3. Mid line wrapping reference.

The self-agglomerating NAS silicone rubber tape, is ideal to insulate, seal and protect various objects (not only metal ones). It can be used under extreme temperature conditions, (-50°C, +150°C). NAS tape is non adhesive, and may be used on both sides. Tightly wrapped around the object, it doesn't unwind, thanks to its outstanding elasticity.

The single tape layers merge progressively within 24 hours.

An immediate excellent waterproofing, as well as mechanical protection and electrical insulation is however guaranteed.

NAS is not subject to aging, is UV rays proof and does not harden.

NAS stands up to 350% elongation, assuring high performances even on complex shape objects. The mean line represents a useful reference to make a correct tape wrapping superimposition easier.

Remove the protective film just on the application time, avoiding moisture, dirt, dust and grease contamination. NAS tape is to be kept in its protective plastic bag.

NAS

Nastro Autoagglomerante Siliconico per Isolamento, Protezione e Sigillatura

1. Nastro autoagglomerante siliconico.
2. Pellicola protettiva asportabile in PET.
3. Linea guida per l'avvolgimento corretto.

Il nastro autoagglomerante di gomma silconica NAS, è ideale per l'isolamento, la sigillatura, la protezione, di oggetti metallici e non.

E' applicabile in condizioni di grande escursione termica (-50°C +150°C).

Il nastro è privo di adesivo. Può essere utilizzato indifferentemente su entrambi i lati.

Avvolto attorno all'oggetto con forte stiramento, si mantiene in posizione grazie alla sua notevole elasticità.

I singoli strati si fondono progressivamente trasformando nel tempo l'avvolgimento in un blocco unico e compatto. Già dopo circa 24 ore gli strati sono ben fusi tra loro, assicurando subito una eccellente impermeabilizzazione, protezione meccanica e isolamento elettrico.

NAS non indurisce, resiste ottimamente all'invecchiamento e ai raggi UV.

Il nastro si allunga fino al 350%, garantendo una resa elevata, anche su oggetti di sagoma complessa.

La linea mediana costituisce un utile riferimento per la corretta sovrapposizione dei lembi durante la nastratura.

Si rimuova la pellicola protettiva solo al momento dell'applicazione, evitando di operare in presenza di acqua, grasso, polveri e sporco.

Il nastro NAS va conservato nel suo sacchetto di plastica protettiva.

• Remove protective film and wrap the tape, pulling it strongly.

• The operation is completed. Bandage is waterproof.

Connectors Weatherproofing Kit

ACCESSORIES FOR INSTALLATION
PRODUCT CATALOGUE

WPK - Connectors Weatherproofing Kit For Feeder Cables and Jumpers

FIMO WPK weatherproofing kit provides a reliable sealing of cable connections exposed to the outside environment.

FIMO WPK weatherproofing kit contains:

- 2 rolls of 19 mm x 20 m black PVC tape
- 1 roll of 50 mm x 8 m black PVC tape
- 3 or 6 rolls of 50 mm x 600 mm butyl-rubber tape

This kit provides an efficient moisture block and connector's protection against pollution and dust. It also prevents disconnection of connectors caused by vibrations during wind exposition.

The kit protects cable's outer jacket and connectors that are directly buried or exposed to severe environmental conditions.

FIMO WPK weatherproofing kit is recommended in applications:

- Jumper to Antenna
- Jumper to Feeder Cable

FEATURES & BENEFITS

- Simple installation
- No heat or tools required for installation
- Compatible with any connector and cable
- High protection against moisture and dirt
- No loosening of connections

WPK – Kit Sigillatura per Connettori Per Cavi Coassiali e Jumper

I kit di sigillatura WPK garantiscono una tenuta stagna dei connettori esposti agli agenti atmosferici.

I kit di sigillatura WPK FIMO contengono:

- 2 rotoli da 19 mm x 25 m di nastro PVC nero
- 1 rotolo da 50 mm x 8 m di nastro PVC nero
- 3 o 6 rotoli da 50 mm x 600 mm di nastro butilico

Il kit garantisce un'adeguata tenuta all'umidità e protegge i connettori contro l'inquinamento e la polvere. Il kit inoltre impedisce la disconnessione dei connettori causata dalle vibrazioni durante l'esposizione al vento.

Il kit protegge la guaina esterna del cavo ed i connettori direttamente interrati o esposti a severe condizioni ambientali.

FIMO raccomanda l'utilizzo dei kit di sigillatura WPK nelle connessioni:

- da Jumper ad Antenna
- da Jumper a Cavo Coassiale

SPECIFICHE e BENEFICI

- Installazione semplice
- Né utensili né riscaldamento a mezzo di fiamma sono richiesti per l'installazione
- Compatibile con qualsiasi connettore e cavo
- Alta protezione contro umidità e sporcizia
- Assenza di disconnessione del connettore

WPE- Waterproof Enclosure For Coaxial Cable Applications

The WPE is a gel closure sealing system that provides a reliable sealing of coaxial connectors used at the transition between:

- JUMPER and ANTENNA
 - JUMPER and FEEDER CABLE
- exposed to the outside environment.

The housing contains an innovative gel material and provides an efficient moisture block. The ease of installation and long-term protection makes it reliable and cost effective solution.

FEATURES & BENEFITS

- Quick and Easy installation
- No need special training
- Easy removable and reusable
- Wraparound and no disconnection of the connector
- No tape, no mastics or tools required for installation and removal

Operating temperature range: -40 C° / + 65 C°

Storage temperature range: -40 C° / + 65 C°

WPE- Sistema di Sigillatura per Connettori Per Applicazioni con Cavi Coassiali

I WPE sono dei sistemi di sigillatura con gel che garantiscono una tenuta stagna dei connettori usati nelle connessioni tra:

- JUMPER e ANTENNA
 - JUMPER e CAVO COASSIALE
- esposti agli agenti atmosferici.

Il guscio di plastica racchiude un gel innovativo che provvede adeguata tenuta all'umidità. La facilità d'installazione e una protezione di lunga durata fanno del WPE una soluzione affidabile e conveniente.

SPECIFICHE & BENEFICI

- Installazione semplice e veloce
- Addestramento specifico non necessario
- Facilmente removibile e riutilizzabile
- Avvolgente e senza rischio di disconnessione del connettore
- Per l'installazione e la rimozione non sono richiesti nastri, mastici o utensili

Temperatura di esercizio: -40 C° / + 65 C°

Temperatura di stoccaggio: -40 C° / + 65 C°

TEF

Cold Shrink Tube

ACCESSORIES FOR INSTALLATION
PRODUCT CATALOGUE

MATERIAL

Tube	Silicone / EPDM rubber*
Colour	Black
Waterproof	IP68
Tube	UV Resistance

* TEF 1.5/8": EPDM RUBBER

TEF - Cold Shrink Tube

TEF cold shrink tubes are a series of open-ended tubular silicone/EPDM rubber sleeves, pre-expanded on a removable core for easy installation. After the core is removed, the tube shrinks to its original diameter guaranteeing a perfect sealing on connectors. In applications where the different cable diameter cannot be covered with the tube range, a special cushion is included in the package. The rubber cushion is used to increase the smaller cable diameter and assure the sealing of the cold shrink tube.

Application

Sealing of feeder connections. TEF offers a timesaving and easy way to secure a waterproof protection. No tools or heating are requested for installation. The shrinking process is done by simply unwinding the removable core.

TEF - Tubolari Retraibili a Freddo

I tubolari retraibili a freddo TEF sono una serie di manicotti in silicone/EPDM aperti agli estremi, pre-espansi su un cilindro removibile per una facile installazione. Dopo che il cilindro viene rimosso, il manicotto si retrae fino alla suo diametro originale garantendo una perfetta sigillatura dei connettori. Nelle applicazioni dove la differenza dei diametri dei cavi non può essere coperta dall'escursione del manicotto, una speciale guarnizione è inclusa nella confezione. La guarnizione di gomma viene usata per aumentare il diametro del cavo minore e garantire la sigillatura del tubolare retraibile a freddo.

Applicazioni:

Sigillatura di connessioni. I TEF offrono una soluzione rapida e sicura per una protezione stagna. Né utensili né riscaldamento a mezzo di fiamma sono richiesti per l'installazione. Il processo di restringimento avviene semplicemente svolgendo il cilindro removibile.

**For smaller diameter cables, use the included round rubber cushion

MWT - Heat-shrinking Tubes For the Protection of Cable Joints

Applied through heating with open flame or hot air generator. Excellent protection of cables against humidity.

MWT - Tubolari Termoretraibili Per la Protezione di Giunzioni

Viene applicato mediante riscaldamento a mezzo di fiamma libera oppure generatore di aria calda.
Ottima protezione dei cavi dall'umidità.

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

GENERAL INFORMATION
Products developments and improvements

Figures, drawings, dimensions and technical information included in our catalogue are valid at the time of printing.

The continuous technical evolution may require developments intended to improve the product.

Fi.Mo.Tec S.p.A. reserves the right to modify the technical specifications without prior notice, according to the technological progress.

Possible misprints will in no case lead to disputes for incidental damage caused to persons or things.
