Universal Snap-in Hanger Kits for Coaxial Cable Applications

TYPICAL APPLICATIONS

PRODUCT DESCRIPTION

Universal Snap-in Hangers simplify installation of coaxial cable by eliminating the need for mounting hardware. Coax fingers inside the body of the hanger automatically adjust to the outer diameter of the coax jacket. These unique internal coax fingers allow the Universal Snap-in Hanger to effectively support many manufactured brands of coaxial cable. Universal Snap-in Hangers are designed to insert into a 3/4" hole in material between .120" and .135" thick (11GA or 1/8" (3.2mm) material is optimum). Universal Snap-in Hangers are manufactured from stainless steel ensuring long term integrity over the life of the product in extreme environments including mountain tops, coastal and industrial applications.
