### TYPICAL APPLICATIONS

#### PRODUCT DESCRIPTION

The Cable Support Block is a second generation block hanger system designed specifically for cable applications. Stackable space saving units provide versatility in all applications reducing material and installation costs by over 50% by requiring only one 8mm, 10mm, or 3/8" threaded rod to secure up to six runs of coax. Support Blocks are manufactured from a durable weather resistant Long Glass Polypropylene which exceeds the recommended temperature parameters for coaxial cable i.e. (-40° to 185° F). Thermal, chemical, and UV resistance ensure long term integrity in extreme environments including mountain tops, deserts, coastal, and industrial type applications.
