

Cable Support Blocks for Cable Management

TYPICAL APPLICATIONS

Note:
Hanger Clamps may vary
depending on cable configurations.

NOTE:

1. Critical to maintain a tightening torque between 6-8Nm (4.4256-5.9008 ft/lbs). Failure to do so will adversely affect hanger performance.
2. Double stack shown, installation procedure is the same for Single and Triple stack locking coax blocks.

PRODUCT DESCRIPTION

Hanger Clamps are designed specifically for wireless applications. Multiple runs of Coaxial Cable can be stacked in space saving configurations of one, two, or three. It is recommended that the Hanger Clamps be placed at one-meter intervals. The hanger Clamps are manufactured from a durable weather resistant Polycarbonate which exceeds the recommended temperature for Coaxial Cable. A complete line of support accessories are available to provide versatility when securing cable in unique applications such as roof tops, water towers, and wood poles.
